Financial year end of this fund:	30 April		
Minimum investment:		<u>Initial Investment</u>	<u>Subsequent Investment</u>
	Class A	USD 2,500	USD 1,000

What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The fund is a Cash fund and aims to provide a return in line with money market rates where both capital security and liquidity are primary considerations from professionally managed portfolios of Money Market Instruments and other assets permitted by law in different geographical areas and currencies, with the opportunity to achieve the objective of regular income and high liquidity.
- The fund invests principally (i.e. at least 70% (and normally 75%) of the fund's assets) in Euro denominated debt securities and other permitted assets, including cash and cash equivalents and, within the restrictions imposed by law, Money Market Instruments, reverse repurchase agreements and deposits.
- For the remaining assets, the Investment Manager has the freedom to invest in other permitted assets which meet the aim of the fund, within the restrictions imposed by MMFR.
- The assets of the fund shall exclusively be composed of Money Market Instruments, and other eligible assets under the MMFR and ancillary liquid assets.
- The fund is part of the Fidelity Sustainable Family of Funds and adopts a Sustainable Focused strategy (i.e. the fund will actively seek to select companies of higher ratings with reference to MSCI ESG Ratings and Fidelity Sustainability Ratings than companies/issuers within the same industry) under which a minimum of 70% of the fund's net assets will be invested in securities deemed to maintain sustainable characteristics (defined by reference to a combination of different measurements such as ESG* ratings provided by external agencies or Fidelity Sustainability Ratings). The fund will consider a wide range of environmental and social characteristics on an ongoing basis. Environmental characteristics include carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights. Controversies involving environmental and social characteristics are regularly monitored. Environmental and social characteristics are analysed by Fidelity's fundamental analysts and rated through Fidelity Sustainability Ratings. The fund seeks to promote these characteristics by adhering to the Fidelity Sustainable Family Framework.
- The fund is actively managed without reference to an index.
- The fund may use financial derivative instruments only for the purpose of hedging the interest rate or exchange rate risks inherent in other investments of the fund. Financial derivative instruments may include interest rate futures, interest rate swaps, forward contracts or a combination thereof.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in repurchase and reverse repurchase transactions. The fund will not enter into securities lending transactions nor margin lending transactions.

Use of derivatives/investment in derivatives

The fund's net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong Prospectus for details including the risk factors. The purchase of shares is not the same as placing monies on deposit with a bank or a deposit taking company and that the fund has no obligation to redeem or sell shares at the dealing price paid by the investor. The fund does not guarantee a stable net asset value. The fund is not subject to supervision of the Hong Kong Monetary Authority.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Bonds and other Debt Instruments

- The value of bonds or other debt instruments will fluctuate depending on e.g. market interest rates, the credit quality of the issuer, the currency of the investment (when it is different from the base currency of the fund) and liquidity considerations. In general, the prices of debt instruments rise when interest rates fall, whilst their prices fall when interest rates rise.

Downgrading risk

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may or may not be able to dispose of the debt instruments that are being downgraded.

* ESG means collectively environment (E), social (S) and governance (G)

Credit/Default Risk

- Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or are otherwise unable to pay interest or principal (default). Credit risk also arises from the uncertainty about the ultimate repayment of principal and interest from bond or other debt instrument investments. In both cases the entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default.

Credit rating risk

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

Valuation Risk

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

Eurozone Risk

- In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, the fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of the fund.

Foreign Currency Risk

- The fund's assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund's net asset value.

Stock/Issuer Concentration

- At times, the fund will invest in a relatively small number of investments or issuers and may experience a more volatile net asset value as a result of this concentration of holdings relative to a fund that diversifies across a larger number of investments or issuers.

Sustainable Investing

- The use of ESG criteria may affect the fund's investment performance and may result in a return that at times compares unfavourably to similar products without such focus. Sustainable characteristics used in the fund's investment policy may result in the fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so and/or selling securities due to their sustainable characteristics when it might be disadvantaged to do so. As such, the application of ESG criteria may restrict the ability of the fund to acquire or dispose of its investments at a price and time that it wishes to do so, and may therefore result in a loss to the fund.
- The ESG characteristics of securities may change over time, which may in some cases require the Investment Manager disposing of such securities when it might be disadvantageous to do so from a financial perspective only. This may lead to a fall in the value of the fund.
- The use of ESG criteria may also result in the fund being concentrated in companies with ESG focus and its value may be volatile when compared to other funds having a more diversified portfolio of investments.
- There is a lack of standardised taxonomy of ESG evaluation methodology and the way in which different ESG funds will apply ESG criteria may vary, as there are not yet commonly agreed principles and metrics for assessing the sustainable characteristics of investments of ESG funds.
- The information and data sources provided by internal research teams and complemented by external ESG rating providers for evaluating sustainable characteristics of the securities may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess a security or issuer.
- Evaluation of sustainable characteristics of the securities and selection of securities may involve the Investment Manager's subjective judgment. As a result, there is a risk that the relevant sustainable characteristics may not be applied correctly or that the fund could have indirect exposure to issuers who do not meet the relevant sustainable characteristics, and sustainable characteristics of a security can change over time.

Financial Derivative Instruments

- The fund's net derivative exposure may be up to 50% of its net asset value. The use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instrument by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

Risk of Investing in Cash Fund

- An investment in a Cash fund is neither insured nor guaranteed by any government, government agencies or government-sponsored agencies or any bank guarantee fund. The fund does not guarantee a stable net asset value. The performance of a Cash fund may be affected by changes in money market rates, economic and market conditions and in legal, regulatory and tax requirements. In a low interest rate environment or during adverse market conditions, the Cash fund may invest in negative yield instruments which may adversely impact the net asset value of the fund.

How has the fund performed?

The performance during the years prior to 2022 was achieved under circumstances that may longer apply as the investment objective was changed in 2022.

* On 18 January 2016, Fidelity Funds II - Euro Currency Fund merged into Fidelity Funds - Euro Cash Fund.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-Euro increased or decreased in value during the calendar year being shown. Performance data has been calculated in Euro including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- Fund launch date: 1993
- Class A-Euro launch date: 1993
- Class A-Euro is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund's reference currency.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

Subscription Fee	Class A – 0%
Switching Fee	Class A - 0%
Redemption Fee	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

Management Fee*	Class A – Up to 0.15% p.a. of NAV
Depositary Fee	Varies from 0.003% to 0.35% of NAV
Performance Fee	N/A
Administration Fee	Up to 0.35% of NAV

* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong Prospectus. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong Prospectus.

Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time on a dealing day, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund (other than Class A) will be published in the South China Morning Post and the Hong Kong Economic Times. Net asset value of Class A will be published on www.fidelity.com.hk *.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from www.fidelity.com.hk *.
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
