## What is this product?

T. Rowe Price Funds SICAV - Global Value Equity Fund (the “**Sub-Fund**”) is an open-ended investment company incorporated under Luxembourg law and regulated by the Commission de Surveillance du Secteur Financier.

## Objective and Investment Policy

### Objective

The objective of the Sub-Fund is to increase the value of its shares, over the long term, through growth in the value of its investments.

### Investment Policy

The Sub-Fund is actively managed and invests mainly in a widely diversified portfolio of undervalued shares of companies (i.e. shares of companies which the Investment Manager considers are inexpensive relative to the market, peers, and the shares’ own history) anywhere in the world, including emerging markets. The Investment Manager determines whether shares of companies are undervalued and if so, whether the cause for the underperformance is likely to be corrected, by utilising a clearly defined investment process based on fundamental research and active, bottom-up stock selection. Although the Sub-Fund has a global investment universe, the securities selected for investment based on the Investment Manager’s approach as described below may at times result in a portfolio that is concentrated in certain geographical area(s), for example, the United States.

Specifically, the Sub-Fund invests at least 70% of its net asset value in undervalued equity and equity-related securities such as common shares, preferred shares, warrants (up to 10% of net asset value), American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs). The Sub-Fund may invest up to 10% of its net asset value in China A and B shares that are listed on the Shenzhen Stock Exchange or Shanghai Stock Exchange, where the Sub-Fund may invest directly in China A shares through Stock Connect (a joint securities trading and clearing program designed to permit mutual stock market access between mainland China and Hong Kong).

The Sub-Fund may use derivatives for hedging and efficient portfolio management purposes.

The Investment Manager’s approach is to:

- emphasise attractively valued companies with prospects for improving earnings growth;
- employ rigorous and comprehensive research to identify and assess investment opportunities;

- allocate country and sector positions through the consideration of the attractiveness of individual investments (on the basis of whether such individual investments are undervalued) as well as the macroeconomic environment; and
- assess environmental, social and governance (“ESG”) factors with particular focus on those considered most likely to have a material impact on the performance of the holdings or potential holdings in the Sub-Fund’s portfolio. These ESG factors, which are incorporated into the investment process alongside financials, valuation, macro-economics and other factors, are components of the investment decision. Consequently, ESG factors are not the sole driver of an investment decision but are instead one of several important inputs considered during investment analysis. See the ‘Environmental, Social and Governance (ESG) Investment Policy’ section in the prospectus for more details.

The Sub-Fund is actively managed but may use MSCI World Net Index for performance comparison. The Investment Manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark index and has complete freedom to invest in securities that do not form part of the benchmark. However, at times, market conditions may result in the Sub-Fund’s performance being more closely aligned with that of the benchmark index.

For temporary defensive purposes, the Sub-Fund has the flexibility to invest in money market securities up to 100% of its net asset value.

## **Use of derivatives / investment in derivatives**

The Sub-Fund’s net derivative exposure may be up to 50% of the Sub-Fund’s net asset value.

## **What are the key risks?**

**Investment involves risks. The follow sets out the key risks. Please refer to the offering document for details of other applicable risk factors.**

### **General investment risk**

The Sub-Fund’s investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

### **Equity market risk**

In general, equities involve higher risks than bonds or money market instruments. Equities investment is subject to market risks, whose value may fluctuate due to factors such as changes in investment sentiment, political and economic news, issuer-specific factors, government policy and market changes. Equities can lose value rapidly and remain at low prices indefinitely. Equities of rapidly growing companies can be highly sensitive to adverse news, because much of their value is based on high expectations for the future. Equities of companies that appear to be priced below their intrinsic value may continue to be undervalued. If a company goes through bankruptcy or a similar financial restructuring, its equities may lose most or all of their value.

### **Geographic concentration risk**

Although the Sub-Fund has a global investment universe, the Sub-Fund may at times invest a large portion of its assets in securities with growth potential which are concentrated in certain geographical area(s), for example, the United States. Therefore, its performance will be more strongly affected by any adverse social, political, government policy, foreign exchange, liquidity, tax, legal, regulatory, economic, environmental or market conditions within that area. This can mean higher volatility and risk of loss as compared to a fund that invests more broadly.

**Risks associated with depositary receipts**

Investment into a given country may be made via direct investments into that market or by depositary receipts traded on other international exchanges. Investments in depositary receipts may be subject to counterparty risk, in which a significant or even total loss might be suffered in the event of the liquidation of the depositary or custodian bank issuing the depositary receipts.

Investments in depositary receipts may also be subject to liquidity risks as depositary receipts are often less liquid than the corresponding underlying securities.

Further, holders of depositary receipts are not direct shareholders of the underlying company and generally do not have voting and other shareholder rights.

**Currency risk**

The Sub-Fund may invest in securities denominated in currencies other than the base currency of the Sub-Fund. Also, a share class may be designated in a currency other than the base currency of the Sub-Fund. Therefore, changes in currency exchange rates between these currencies and the base currency or exchange rate controls could reduce investment gains or increase investment losses and affect the net asset value of the Sub-Fund unfavourably.

**Derivatives risk**

Risk associated with derivatives include credit/counterparty risk, liquidity risk, valuation risk, volatility risk and exchange-traded and over-the-counter transaction risk. The leverage element/component of derivatives can result in a loss significantly greater than the amount invested in the derivatives by the Sub-Fund. Exposure to derivatives may lead to a risk of significant loss by the Sub-Fund.

## How has the Sub-Fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend re-invested.
- These figures show by how much Class A increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- The Investment Manager views Class A being the most appropriate representative share class as this share class has the lowest minimum investment amount, a long track record, is available for investment by Hong Kong retail investors and broadly indicative of the Sub-Fund's performance characteristics.
- The benchmark used for performance comparison is MSCI World Net Index.
- Sub-Fund launch date: 11/2012
- Class A launch date: 11/2012

## Is there any guarantee?

This Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

## What are the fees and charges?

### Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Sub-Fund.

Fee	What you pay
Subscription fee (Entry Charge)	Class A / Class A (HKD): Up to 5% of the subscription amount Class Q: Nil
Switching fee	Class A / Class A (HKD) / Class Q: Nil
Redemption fee	Class A / Class A (HKD) / Class Q: Nil

### Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the net asset value of the relevant share class unless otherwise indicated)
Management fee (Management Co. fee)	Class A / Class A (HKD): up to 1.60% Class Q: up to 0.75%
Custodian fee (Custodial fee) <sup>#3</sup>	Class A / Class A (HKD) / Class Q: up to 0.017%, subject to a minimum of 0.0005%
Performance fee	N/A
Administration fee (Administration agent fee) <sup>#3</sup>	Class A / Class A (HKD) / Class Q: up to 0.07%, subject to a minimum of 0.01% or USD 40,000 per sub-fund whichever is higher

<sup>#3</sup> The total operating and administrative expenses will be subject to a limit of 0.17% of the respective net asset value of Class A, Class A (HKD) and Class Q. Should the actual total operating and administrative costs attributable to the respective share classes exceed the expense limit, the Management Company will bear the excess. If the actual total operating and administrative costs attributable to the respective share classes fall below the limit, only the actual amount incurred will be deducted from the assets of the respective share classes.

### Other fees

You may have to pay other fees when dealing in the shares of the Sub-Fund.

## Additional Information

- You generally buy, switch or redeem shares at the Sub-Fund's next determined net asset value after your request is received by the Hong Kong Representative in good order on or before 5pm (Hong Kong time) on a dealing day of the Sub-Fund. Please note that if you submit your application through an authorised distributor of the Sub-Fund, such distributor may apply an earlier deadline.
- There may be share classes with various characteristics and investor eligibility requirements within the Sub-Fund. Each class represents a proportional share of the underlying portfolio of the Sub-Fund. Each share class is identified by a basic share class designation (e.g. A). Where appropriate, one or more suffixes may be added to indicate certain characteristics.

- The net asset value of the Sub-Fund is calculated and the price of shares is published each business day in the South China Morning Post and the Hong Kong Economic Times.
- Investors may obtain the past performance information of other share class(es) offered to Hong Kong investors from the Hong Kong Representative upon request.

### **Important**

If you are in doubt, you should seek professional advice.
