Dear Shareholder,

Change in delegation arrangement

We are writing to inform you of a change in delegation arrangement of the funds of the Company which are authorised by the Securities and Futures Commission of Hong Kong (the "**SFC**")¹, as set out in Appendix 2 (each an "**SISF SFC-Authorised Fund**").

As disclosed in the Prospectus of the Company, each investment manager may appoint one or more other Schroders group companies, at its own expense and responsibility, to manage all or part of the assets of a fund or to provide recommendations or advice on any part of the investment portfolio (each a "**Sub-Investment Manager**"). Any Sub-Investment Manager appointed by an investment manager may, in turn, appoint another Schroders group entity (each a "**Sub-Delegate**") to manage all or part of a fund's assets, subject to the prior written consent of the investment manager.

21 December 2021

Dear Shareholder,

Schroder International Selection Fund (the "Company") – Change of depositary and administrator

We are writing to inform you of a change of depositary and administrator of the Company and its sub-funds including those which are authorised by the Securities and Futures Commission ("**SFC**")¹ as set out in the Appendix A to this letter ("**Funds**").

Internal Restructuring of the Depositary and Administrator of the Company and the Funds

Currently, J.P. Morgan Bank Luxembourg S.A. ("**JPMBL**") is the Depositary and Administrator of the Company and the Funds. JPMBL and its affiliates are collectively referred to as "JPMorgan" in this letter.

As part of an internal restructuring with the aim to streamline JPMorgan's banking entity structure across Europe, three banking entities in the JPMorgan group domiciled respectively in Germany, Luxembourg and Ireland and their branches across the region will be merged into a single European bank ("**Merger**"). The Merger requires the approval by the sole shareholder of the merging entities (i.e. J.P. Morgan International Finance Limited), which has been obtained in the end of November 2021. The date when the Merger takes legal effect will be the date on which the local court of Frankfurt registers the Merger in the commercial register (the "**Effective Date**"), which is expected to be on or around 22 January 2022.

JPMBL will be one of the impacted legal entities of the Merger. In particular, the Merger will involve JPMBL merging into J.P. Morgan AG, which in turn will simultaneously change its legal form from a German Stock Corporation (*Aktiengesellschaft*) to a European company (*Societas Europaea*) known as J.P. Morgan Societas Europaea ("**JPMSE**") organised under the laws of Germany with registered office at Taunustor 1 (TaunusTurm), 60310 Frankfurt am Main, Germany and registered with the commercial register of the local court of Frankfurt under number HRB 16861. It will be a credit institution subject to direct prudential supervision by the European Central Bank (ECB), the German Federal Financial Supervisory Authority

It does not mean the scheme is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.

(*Bundesanstalt für Finanzdienstleistungsaufsicht*, BaFin) and Deutsche Bundesbank, the German Central Bank. All of JPMBL's assets and liabilities will be transferred to the Luxembourg Branch of JPMSE, which will operate as J.P. Morgan SE – Luxembourg Branch ("**JPMSE Luxembourg**").

We will notify you separately if there is any change in the Effective Date or any other material changes to the Merger.

The Commission de Surveillance du Secteur Financier ("**CSSF**") is the financial regulator in Luxembourg where the Company is domiciled and has been notified of the Merger. JPMSE Luxembourg is authorised by the CSSF to act as a depositary and fund administrator for Luxembourg undertakings for collective investment. The CSSF has confirmed no objection to JPMSE Luxembourg assuming the role of Depositary and Administrator of the Company and the Funds. JPMSE Luxembourg will be registered in the Luxembourg Trade and Companies' Register (RCS) under number B255938 and will be subject to the supervision of the home State supervisory authorities mentioned above, as well as local supervision by the CSSF.

On the Effective Date and in accordance with Luxembourg laws, JPMBL will cease to exist and the depositary and administration functions of JPMBL will transfer from JPMBL to JPMSE Luxembourg, and JPMSE Luxembourg will succeed JPMBL as the Depositary and Administrator of the Company and the Funds. JPMSE Luxembourg will assume all rights and obligations that JPMBL currently has under its existing agreements with the Company and accordingly the rights and obligations of the Company and the Funds with respect to the Depositary and Administrator will not be impacted. The business operations of JPMBL will be carried on without interruption by a locally fully passported, Luxembourg based branch of JPMSE (i.e. JPMSE Luxembourg) and the duties and obligations of JPMBL as stated in the Hong Kong offering documents and/or the constitutive documents of the Company and the Funds will be taken up by JPMSE Luxembourg as of the Effective Date. There will be no changes to the scope of services provided to the Company and the Funds, and no change in the level of fees payable by the Company and the Funds to the Depositary and Administrator. What is this product?

This is a sub-fund of Schroder International Selection Fund, a mutual fund domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and investment strategyInvestment Objective

The fund aims to provide capital growth in excess of the Tokyo Stock Exchange 1st Section index (TOPIX) (Net TR) after fees have been deducted over a three to five year period^{Note} by investing in equity and equity related securities of Japanese companies.

Investment Policy

The fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Japanese companies.

The fund seeks to identify and invest in undervalued stocks by estimating their fair value based on predicted returns over the medium to long term.

The fund is not subject to any limitation on the market capitalisation of the companies that it may invest in.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in Appendix I of the Prospectus).

Under exceptional circumstances (e.g. market crash or major crisis), the fund may be invested temporarily up to 100% of its net asset value in liquid assets such as bank deposits, certificates of deposit, commercial paper and treasury bills for cash flow management.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. Derivatives can be used for instance to create market exposures through equity, currency, volatility or index related financial derivative instruments and include over-the-counter and/or exchange traded options, futures, contracts for difference, warrants, swaps, forward contracts and/or a combination of the above.

^{Note} For clarification purpose, this means to exceed a medium to long term return of the stated index after fees have been deducted. The three to five year period is considered as a medium to long term period, and is the period over which an investor should assess the fund's performance.

Benchmark

The fund's performance should be assessed against its target benchmark being to exceed the Tokyo Stock Exchange 1st Section index (TOPIX) (Net TR). The fund's investment universe is expected to overlap materially with the components of the target benchmark.

Use of derivatives / investment in derivatives

The fund's net derivative exposure may be up to 50% of the fund's net asset value.

What are the key risks?

Investment involves risk. Please refer to the offering document for details including the risk factors.

1. Equity investment risk

Investment in equity securities is subject to the risk that the market value of the stocks may go down as well as up due to numerous factors such as changes in investment sentiment, political environment, economic environment, issuer-specific factors, regional or global economic instability, currency and interest rate fluctuations. If the market value of the stocks go down the net asset value of the fund may be adversely affected.

2. Concentrated geographical locations

The fund investing in concentrated geographical locations may be subject to a higher level of risks comparing to a fund investing in a more diversified portfolio/strategy. The value of the fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the relevant geographical locations.

3. Smaller companies risk

Fund invests in smaller companies may fluctuate in value more than other funds and may be more vulnerable to adverse developments than those in larger companies. During periods where markets are falling, securities of smaller companies may become less liquid and experience short-term price volatility and wide spreads between dealing prices.

4. Derivatives

The fund may use derivatives to meet its specific investment objective. There is no guarantee that the performance of derivatives will result in a positive effect for the fund. Derivative exposure may lead to a high risk of significant capital loss. Risks associated with derivatives include credit risk and counterparty risk, liquidity risk, valuation risk, volatility risk, over-the-counter transaction risks and hedging risk. The leverage element/component of derivatives can result in a loss significantly greater than the amount invested in the derivatives by the fund. There is no guarantee that the desired hedging instruments will be available or hedging techniques will achieve their desired result. In adverse situations, the use of hedging instruments may become ineffective in hedging and the fund may suffer significant losses.

5. Risks relating to distributions

- For distribution share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital; capital growth will be reduced and in periods of low growth capital erosion may occur.
- Distribution share classes with a fixed dividend policy will distribute the dividends based on a fixed amount or fixed percentage of the net asset value per share. This may result in share classes with fixed distributions either paying out both income and capital in distribution payments, or not substantially distributing all the investment income which a share class has earned.
- **You should note that in the circumstances where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the net asset value per share.**

- The distribution amount and net asset value of the currency hedged share class may be adversely affected by differences in the interest rates of the reference currency of the currency hedged share classes and the fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-currency hedged share classes.

6. Risks relating to hedging and the hedged classes

- In respect of the share classes which the management company of the fund has the ability to fully hedge the shares of such share classes in relation to the fund currency, currency exposures or currency hedging transactions within the fund's portfolio will not be considered. The aim of a currency hedged share class is to provide you with the performance returns of the fund's investments by reducing the effects of exchange rate fluctuations between the fund currency and the reference currency. However there is no assurance that the hedging strategies employed will be effective in fully eliminating the currency exposure to the reference currency thereby delivering performance differentials that are reflective only of interest rate differences adjusted for fees.
- Where undertaken, the effects of this hedging will be reflected in the net asset value and, therefore, in the performance of such share class. Similarly, any expenses arising from such hedging transactions will be borne by the share class in relation to which the expenses have been incurred.
- It should be noted that, where relevant, these hedging transactions may be entered into whether the reference currency is declining or increasing in value relative to the relevant fund currency and so, where such hedging is undertaken it may substantially protect investors in the relevant share class against a decrease in the value of the fund currency relative to the reference currency, but it may also preclude investors from benefiting from an increase in the value of the fund currency.

7. Currency risks

Assets and share classes may be denominated in currencies other than JPY and some may not be freely convertible. The fund may be adversely affected by changes in foreign exchange rates and exchange rate controls of the currencies in which securities are held, the reference currencies of the share classes and JPY. This exposes all share classes of the fund to exchange rate fluctuations and currency risk. It may not be practicable or possible to hedge against such foreign exchange/currency risk exposure.

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the fund's Class A JPY Accumulation increased or decreased in value during the calendar year being shown. Performance data has been calculated in JPY including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Target benchmark: Tokyo Stock Exchange 1st Section index (TOPIX) (Net TR)*
- Fund launch date: 2006
- Class A JPY Accumulation launch date: 2006
- The management company views the Class A JPY Accumulation, being the retail share class denominated in the base currency of the fund, as the most appropriate representative share class of the fund.

Note: The performance of these years was achieved under circumstances that no longer apply. During these years, there was material change(s) to the fund, namely, reduction of fee(s).

* With effect from 1 May 2021, the target benchmark of the fund has been changed from Tokyo Stock Exchange 1st Section index (TOPIX) (TR) to Tokyo Stock Exchange 1st Section index (TOPIX) (Net TR) in order to enhance the accuracy of the target benchmark as performance targets for the fund by using a net rather than gross variant.
