[†] The ongoing charges figure is based on expenses for the half year ended 30 November 2021. This figure may vary from year to year. The ongoing charges figure is an annualized figure based on information from semi-annual report calculated by adding the applicable charges and payments deducted from the assets of the Portfolio and then dividing by the Portfolio's average Net Asset Value for the fiscal year attributable to the relevant share class.

* Different minimum, additional and maximum investment limits may apply to different classes of shares denominated in different currencies. Investors should refer to the offering document of the Fund for details.

What is this product?

The Eurozone Equity Portfolio (the "Portfolio") is a portfolio of AB SICAV I (the "Fund"), an open-ended investment company with variable capital domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and Investment Strategy

Objectives

The Portfolio's investment objective is to increase the value of your investment over time through capital growth.

Strategy

In actively managing the Portfolio, the Investment Manager uses fundamental research and a proprietary quantitative risk/return model to select securities that appear to be undervalued and to offer attractive shareholder returns (bottom-up approach). The Investment Manager aims to exploit pricing opportunities that arise from investors' overreactions to macroeconomic, market, industry or company changes.

ALLIANCEBERNSTEIN®

Under normal market conditions, the Portfolio typically invests at least 80%, and not less than two thirds, of its net asset value in equity securities of companies that are organised, or have substantial business activities, in the Eurozone. A “Eurozone” country is a member state of the European Union that has adopted the Euro as its sole legal tender. The Eurozone comprises the following EU Member States: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Portugal, Slovakia, Slovenia and Spain. Eurozone companies include any company located in the Eurozone or which conducts significant business activity in the Eurozone. These companies may be of any market capitalisation and industry. The Portfolio’s investments may include convertible securities, depositary receipts, real estate investment trusts (REITs) and exchange traded funds (ETFs).

The Portfolio uses derivatives for hedging (reducing risks), efficient portfolio management and other investment purposes.

Under exceptional circumstances (e.g. market crash or major crisis), the Portfolio may be invested temporarily up to 100% in cash, cash equivalents (such as bank deposits, certificates of deposit, commercial paper and treasury bills) and high quality short-term securities for cash flow management. To the extent the Portfolio invests defensively, it may not be pursuing its objective.

Use of derivatives / Investment in derivatives

The Portfolio’s net derivative exposure may be up to 50% of the Portfolio’s net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. General Investment Risk

The Portfolio’s investment may fall in value due to any of the key risk factors below and therefore your investment in the Portfolio may suffer losses. There is no guarantee of the repayment of principal.

2. Equities Securities Risk

The Portfolio’s investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

3. Eurozone Risk

In light of ongoing concerns over the sovereign debt risk of countries within the Eurozone, the Portfolio’s investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of the Portfolio.

4. Concentration Risk

The Portfolio’s investments are concentrated in the Eurozone market. The value of the Portfolio may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Portfolio may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the market.

5. Smaller Capitalisation Companies Risk

Small- and mid-cap stocks may have lower liquidity and their prices are more volatile to adverse economic developments than large-cap stocks—smaller companies generally face higher risks due to their limited product lines, markets and financial resources.

6. Currency Risk

Underlying investments may be denominated in one or more currencies different from the Portfolio’s base currency. Also, a class of shares may be designated in a currency other than the base currency of the Portfolio. This means changes in exchange rate controls, currency movements in such underlying investments and fluctuations in the exchange rates between these currencies and the base currency may significantly and unfavorably affect the net asset value of the Portfolio’s shares.

7. Risk in Investing in Financial Derivative Instruments

Risks in investing with financial derivative instruments include counterparty / credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element / component of a financial derivative instrument

ALLIANCEBERNSTEIN®

can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Portfolio. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Portfolio.

How has the Portfolio performed?

The bar chart below shows the past performance of a share class of another fund restructured into Class A Shares of the Portfolio in 2018, as the restructured share class and Class A Shares of the Portfolio have the same features and fee structure. Class A EUR Shares has been designated as the representative share class by the Management Company as it is a focus share class made available to Hong Kong investors.

Portfolio launch year: 2018

Class A EUR Shares launch year: 2018

- The performance information prior to 2018 has been simulated based on the past performance of the restructured share class.
- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the restructured share class / Class A EUR Shares have increased or decreased in value during the calendar year being shown.
- Performance data has been calculated in EUR including ongoing charges and excluding any subscription fee and redemption fee you might have to pay.
- With effect from 4 May 2020, the benchmark of the Portfolio is MSCI EMU Index EUR.

Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

(Different fee structures apply to different classes of shares. Investors should refer to the offering document of the Fund for details.)

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Portfolio:

ALLIANCEBERNSTEIN®

Fee	What you pay
Subscription fee (Initial Sales Charge)	Classes A and AX Shares (and corresponding H Shares): up to 5% of the purchase price Class I USD H Shares: up to 1.50% of the purchase price Not applicable to other Share Classes
Switching fee ⁺	Not Applicable
Redemption fee	Not Applicable
Contingent Deferred Sales Charge	Class BX Shares: where applicable up to 4% (depending on years held) of the lesser of the current Net Asset Value or original cost of the Shares being redeemed Class C Shares (and corresponding H Shares): where applicable up to 1% (depending on years held) of the lesser of the current Net Asset Value or original cost of the Shares being redeemed Not applicable to other Share Classes

⁺Any additional fees charged by distributors may still apply.

Ongoing fees payable by the fund

The following expenses will be paid out of the Portfolio. They affect you because they reduce the return you get on your investments.

Performance fee	Not Applicable
Distribution fee*	Class BX Shares: 1.00% Not applicable to other Share Classes
Administration fee payable to the Management Company*	All Share Classes (and corresponding H Shares): 0.10%

*Percentage per annum of Net Asset Value

Other fees

You may have to pay other fees when dealing in the shares of the Portfolio.

Additional Information

- You may generally buy and redeem shares at the Portfolio's next-determined Net Asset Value plus any applicable charges after the Management Company receives your request in good order on or before 6:00 P.M. Central European Time on each Business Day (business day of both New York Stock Exchange and Luxembourg banks), such time being the order cut-off time. Investors should note that, for applications sent through a Hong Kong distributor, such distributor may have an earlier cut-off time.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors from www.alliancebernstein.com.hk.
- The Net Asset Value of the Portfolio is calculated on each Business Day and will be available on the following website www.alliancebernstein.com.hk or alternatively, you may contact AllianceBernstein Hong Kong Limited (as the Hong Kong Representative of the Fund) at +852 2918 7888.
