Minimum investment:		<u>Initial Investment</u>	<u>Subsequent Investment</u>
	Class A	USD 2,500	USD 1,000
	Class I	USD 10,000,000	USD 100,000

What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The fund is an Equity fund and aims to achieve long-term capital growth primarily (i.e. at least 70% of the fund's assets) through investments in equity securities of companies that are listed in, or have their registered office in, or currently exercise, or are expected to exercise, a majority of their activity in the Greater China region, which includes Hong Kong, China, Taiwan and Macau. This region includes certain countries considered to be emerging markets. For the remaining assets, the Investment Manager has the freedom to invest outside the fund's principal geographies, market sectors, currency or asset classes.
- Investments will be linked to the theme of innovation, such as technology innovation, lifestyle innovation and environmental innovation. The investment focus under the technology innovation theme includes, but is not limited to, artificial intelligence and digitization (i.e. technology of converting information into a digital form so as to optimize business processes, generate new revenue streams, expand market opportunities and increase productivity); automation and robotics and future mobility (i.e. technology and business model on driving, transport and travelling). The lifestyle innovation is based around transforming and improving lives through innovative solutions through health, wealth and education. Under the environmental innovation, focus will be on the development and application of products and processes that contribute to sustainable environmental protection and ecological improvements. Investments will include but are not limited to equity securities of companies that are involved in or are benefitting from the adoption of any of these themes.
- The largest ten holdings/securities held in the fund's portfolio may account for 50% or more of the fund's net asset value, resulting in a reasonably concentrated portfolio.
- A minimum of 50% of the fund's net assets will be invested in securities deemed to maintain sustainable characteristics (defined by reference to a combination of different measurements such as ESG* ratings provided by external agencies or Fidelity Sustainability Ratings). The fund will consider a wide range of environmental and social characteristics on an ongoing basis. Environmental characteristics include carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights. Environmental and social characteristics are analysed by Fidelity's fundamental analysts and rated through the use of sustainability research and ratings. Fidelity Sustainability Ratings is a proprietary rating system developed by Fidelity's research analysts to assess individual issuers.
- The fund may invest up to 100% of its net assets directly and/or indirectly in onshore China A and B Shares on an aggregated basis. Less than 70% of the fund's net assets will be invested in China A Shares through the Qualified Foreign Investor ("QFI") status.
- The fund may invest up to 100% of its net assets directly in China A Shares listed on the ChiNext market and/or the Science and Technology Innovation Board ("STAR Board"), on an aggregate basis.
- The fund can invest directly in China A Shares through the QFI status of FIL Investment Management (Hong Kong) Limited and/or through any permissible means available to the fund under prevailing laws and regulations (including through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programmes (collectively, "Stock Connect") or any other eligible means) or indirectly such as by way of China A-share access products including, but not limited to, equity linked notes, participation notes, credit-linked notes or funds investing in China A Shares.
- The fund is actively managed. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, reference MSCI China All Share Index (the "Index") as the Index constituents are representative of the type of companies the fund invests in. The fund's performance can be assessed against its Index.
- Shareholders' attention is drawn to the fact that the Index is not an index which integrates environmental and social considerations.
- The Investment Manager has a wide range of discretion relative to the Index. While the fund will hold assets that are components of the Index, it may also invest in companies, countries or sectors that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities. It is expected that over long time periods, the fund's performance will differ from the Index. However, over short time periods, the fund's performance may be close to the Index, depending on market conditions.
- In selecting securities for the fund, several factors are considered in the investment process; for example, consideration may include, but is not limited to, a company's financials, including revenue and profit growth, return on capital, cash flows and other financial measures. In addition, company management, industry and economic environment, and other factors may be considered in the investment process including non-financial criteria.
- The fund may invest in assets directly or achieve exposure indirectly through other eligible means including financial derivative instruments ("derivatives"). Such derivatives may include over-the-counter and/or exchange traded instruments such as futures, contracts for difference, equity swaps, options such as puts, calls and warrants, forwards, non-deliverable forwards and currency swaps. The fund may use derivatives with the aim of risk or cost reduction or to generate additional capital or income (including for investment purposes), in line with the risk profile of the fund.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.

* ESG means collectively environment (E), social (S) and governance (G)

Use of derivatives/investment in derivatives

The fund's net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong Prospectus for details including the risk factors.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Equities

- The fund's investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

Sector Concentration

- The fund may invest in a small number of sectors resulting in greater exposures to the market, liquidity, tax, legal, regulatory, and economic risks of those sectors, lower liquidity of the fund's assets and/or a higher volatility of the net asset value than a fund that diversifies across more sectors. Due to the fund's concentration on the technology and innovation sectors which are subject to rapid and significant changes in technology and innovation, the timely and successful introduction of new products will affect the success of companies in these sectors and hence the value of investments in these sectors can be adversely affected by the failure and delays in obtaining financing or regulatory approval, intense competition with numerous alternative technologies, product incompatibility, mismatched consumer preferences and the rapid obsolescence and research and development of new products.

Country Concentration

- The fund's investments are concentrated in the Greater China region and may have greater exposures to the market, political, policy, foreign exchange, liquidity, tax, legal, regulatory, economic and social risks of that region, and the value of the fund may be more volatile than a fund which diversifies across a larger number of countries.

Stock/Issuer Concentration

- At times, the fund will invest in a relatively small number of investments or issuers and may experience a more volatile net asset value as a result of this concentration of holdings relative to a fund that diversifies across a larger number of investments or issuers.

Emerging Markets

- The fund invests in emerging market securities which may involve increased risks and special considerations not typically associated with the investment in securities in more developed markets. The price of these securities may be more volatile and/or less liquid than those of securities in more developed markets.
- This volatility or lack of liquidity may stem from political, economic, legal, taxation, settlement, transfer of securities, custody and currency/currency control factors.
- Although care is taken to understand and manage these risks, the fund and accordingly the shareholders in the fund will ultimately bear the risks associated with investing in these markets.

China Assets Risk

- Investments by the fund in China A/B Shares and other permissible securities denominated in RMB may be made through any permissible means pursuant to any prevailing regulations, including through the QFI status, the Stock Connect and any other eligible means. The uncertainty and change of the relevant laws and regulations in the People's Republic of China ("PRC") and the potential for the PRC government and/or the regulators to implement political, social and economic policies that may affect the financial markets may have an adverse impact on the fund.
- High market volatility and potential settlement difficulties in the PRC markets may also result in significant fluctuations in the prices of the securities traded on such markets.

QFI Risk

- The fund's ability to make the relevant investments or to fully implement or pursue its investment objective and strategy is subject to the applicable laws, rules and regulations (including restrictions on investments, minimum investment holding periods and requirements on repatriation of principal and profits) in the PRC, which are subject to change and such change may have potential retrospective effect.
- The fund may suffer substantial losses if the approval of the QFI status is being revoked/terminated or otherwise invalidated as the fund may be required to dispose of its securities holdings or prohibited from trading of relevant securities and repatriation of the fund's monies, or if any of the key operators or parties (including QFI custodian/brokers) is bankrupt/in default and/or is disqualified from performing its obligations (including execution or settlement of any transaction or transfer of monies or securities).

Risks associated with the Stock Connect

- The fund may invest and have direct access to certain eligible China A Shares via the Stock Connect. The relevant rules and regulations on Stock Connect are subject to change which may have potential retrospective effect.
- Investments through the Stock Connect are subject to risks, such as quota limitations, suspension risk, operational risk, restrictions on selling imposed by front-end monitoring, recalling of eligible stocks, clearing and settlement risks, nominee arrangements in holding China A Shares and regulatory risk.
- Where a suspension in the trading through the programme is effected, the fund's ability to invest in China A Shares or access the PRC market through the programme will be adversely affected. In such event, the fund's ability to achieve its investment objective could be negatively affected.

Risks associated with ChiNext market and/or the STAR Board

- *Higher fluctuation on stock prices and liquidity risk:* Listed companies on ChiNext market and/or STAR Board are usually of emerging nature with smaller operating scale. In particular, listed companies on ChiNext market and STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main boards of the SZSE and/or the SSE.
- *Overvaluation risk:* Stocks listed on ChiNext market and/or STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
- *Differences in regulation:* The rules and regulations regarding companies listed on the ChiNext market and STAR Board are less stringent in terms of profitability and share capital than those in the main boards of the SZSE and/or the SSE.
- *Delisting risk:* It may be more common and faster for companies listed on ChiNext market and/or STAR Board to delist. In particular, ChiNext market and STAR Board have stricter criteria for delisting compared to other boards. This may have an adverse impact on the relevant fund if the companies that it invests in are delisted.
- *Concentration risk:* The STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in the STAR Board may be concentrated in a small number of stocks and subject the relevant fund to higher concentration risk.

Investments in the ChiNext market and/or STAR Board may result in significant losses for the fund and its investors.

Chinese Renminbi Currency and Conversion Risk

- Chinese Renminbi (RMB) is currently traded in two markets: one in Mainland China (onshore RMB, or CNY) and one outside Mainland China (primarily in Hong Kong) (offshore RMB, or CNH). Although CNH and CNY are the same currency, they trade at different rates, and any divergence between CNH and CNY may adversely impact investors. CNY is not freely convertible and is subject to exchange controls and certain requirements by the government of Mainland China, whereas CNH is freely tradable. There is no guarantee that the value of RMB against the investors' base currencies will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the fund. Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

Mainland China Tax Risk

- There are risks and uncertainties associated with the current tax laws, regulations and practice of Mainland China in respect of capital gains realised via QFI status or Stock Connect or access products on the fund's investments in Mainland China (which may have retrospective effect). Any increased tax liabilities on the fund may adversely affect the fund's value.
- Based on professional and independent advice, currently no provision is being made by the fund for tax on capital gains on disposals of China A Shares and B Shares or for tax on dividends, if any, received on China A Shares (including those acquired through Stock Connect), without deduction of tax provision made ultimately may prove excessive or inadequate to meet any at source. The actual tax liabilities (if any) will be debited from the fund's assets, and may adversely affect the fund's net asset value.

Foreign Currency Risk

- The fund's assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund's net asset value.

Sustainable Investing

- The use of ESG criteria may affect the fund's investment performance and may result in a return that at times compares unfavourably to similar products without such focus. Sustainable characteristics used in the fund's investment policy may result in the fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so and/or selling securities due to their sustainable characteristics when it might be disadvantaged to do so. As such, the application of ESG criteria may restrict the ability of the fund to acquire or dispose of its investments at a price and time that it wishes to do so, and may therefore result in a loss to the fund.

- The ESG characteristics of securities may change over time, which may in some cases require the Investment Manager disposing of such securities when it might be disadvantageous to do so from a financial perspective only. This may lead to a fall in the value of the fund.
- The use of ESG criteria may also result in the fund being concentrated in companies with ESG focus and its value may be volatile when compared to other funds having a more diversified portfolio of investments.
- There is a lack of standardised taxonomy of ESG evaluation methodology and the way in which different ESG funds will apply ESG criteria may vary, as there are not yet commonly agreed principles and metrics for assessing the sustainable characteristics of investments of ESG funds.
- The information and data sources provided by internal research teams and complemented by external ESG rating providers for evaluating sustainable characteristics of the securities may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess a security or issuer.
- Evaluation of sustainable characteristics of the securities and selection of securities may involve the Investment Manager's subjective judgment. As a result, there is a risk that the relevant sustainable characteristics may not be applied correctly or that the fund could have indirect exposure to issuers who do not meet the relevant sustainable characteristics, and sustainable characteristics of a security can change over time.

Financial Derivative Instruments

- The fund's net derivative exposure may be up to 50% of its net asset value. The use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instrument by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

How has the fund performed?

The performance during the years prior to 2021 was achieved under circumstances that may no longer apply as the investment objective was changed in 2021.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- When no past performance is shown there was insufficient data available in that year to provide performance.
- Fund launch date: 2009
- Class A-USD launch date: 2009
- Class A-USD is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund's reference currency.
- The benchmark is the MSCI China All Share Index.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

Subscription Fee	Class A – Up to 5.25% of NAV Class I – 0%
Switching Fee	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched into
Redemption Fee	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

Management Fee*	Class A – Up to 1.50% p.a. of NAV Class I – Up to 0.80% p.a. of NAV
Depository Fee	Varies from 0.003% to 0.35% of NAV
Performance Fee	N/A
Administration Fee	Up to 0.35% of NAV

* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong Prospectus. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong Prospectus.

Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time on a dealing day, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund (other than Class A) will be published in the South China Morning Post and the Hong Kong Economic Times. Net asset value of Class A will be published on www.fidelity.com.hk *.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from www.fidelity.com.hk *.
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
