Class A NZD Distributing (M) (Hedged) Plus: 1.43% (estimated)²

Class A GBP Distributing (M) (Hedged) Plus: 1.43% (estimated)²

Class A CAD Distributing (M) (Hedged) Plus: 1.43% (estimated)²

[#] The ongoing charges figure is expressed as a percentage of the expenses over the average net asset value of the share class for the corresponding period as described below. This figure may vary from year to year.

¹ This figure is based on the expenses for the 12 month period from 1 September 2020 to 31 August 2021 and the average net asset value of the share class for the corresponding period.

² This figure is the Investment Manager's best estimate of the expenses and the average net asset value of the share class over a 12 month period based on information available on another active share class of the Fund with similar fee structure, as this share class is newly established or is yet to be launched.

Dividend Policy:

For Class A Distributing (M) Share Classes* – any dividends will be declared and paid monthly

No distributions will be made for Class A Accumulating Share Classes

* Distributing Plus Share Classes available within this Fund may, at the discretion of the Directors of Legg Mason Global Funds Plc, pay dividends out of capital. Such distribution will result in a corresponding immediate decrease in the net asset value per share of the Distributing Plus Share Classes.

Minimum Investment:

Class A US\$ – US\$ 1,000 (Initial)

Class A EUR – EUR 1,000 (Initial)

Class A AUD – AUD 1,000 (Initial)

Class A HKD – HKD 8,000 (Initial)

Class A NZD – NZD 1,000 (Initial)

Class A GBP – GBP 1,000 (Initial)

Class A CAD – CAD 1,000 (Initial)

There is no minimum for subsequent investment.

WHAT IS THIS PRODUCT?

Legg Mason Western Asset Short Duration High Income Bond Fund (the "Fund") is a sub-fund of Legg Mason Global Funds Plc, which is constituted in the form of a mutual fund. It is domiciled in Ireland and its home regulator is Central Bank of Ireland.

OBJECTIVE AND INVESTMENT STRATEGY

Objective: The Fund seeks to provide a high level of current income.

Strategy: The Fund invests at least 80% of its net asset value in high-yielding debt securities and instruments (either directly or indirectly via investment in other collective investment schemes that primarily invest in such securities, subject to restrictions herein) that are (i) denominated in US dollars and currencies of a variety of other developed countries, and (ii) listed or traded on regulated markets.

Such high-yielding debt securities and instruments include: (i) corporate debt securities; (ii) structured notes whose underlying exposure may be to fixed income securities; (iii) mortgage-backed securities; (iv) asset-backed securities and (v), subject to the restrictions set out below, unsecuritised participations in or assignments of floating rate mortgages or other commercial loans that are liquid and will provide for interest rate adjustments at least every 397 days and which may be secured by real estate or other assets, provided that the Fund invests at least two thirds of its net asset value in non-convertible debt securities. Such high-yielding debt securities are rated below Investment Grade, or unrated securities deemed to be of equivalent quality by the Investment Manager and Sub-Investment Manager (collectively, "Western Asset"). Western Asset does not rely solely on the ratings of rated securities in making investment decisions but also evaluate other economic and business factors affecting the issuer.

The Fund's remaining assets may be invested in the following types of securities that are listed or traded on regulated markets: debt securities rated Investment Grade, or unrated securities deemed by Western Asset to be of equivalent quality; preferred shares and other open ended collective investment schemes, as well as cash and Money Market Instruments.

As restrictions to the foregoing, the Fund may not invest more than 10% of its net asset value, respectively, in the following types of securities: (i) structured notes that are transferable securities; (ii) mortgage-backed securities; and (iii) asset-backed securities.

Further, the Fund does not intend to invest more than 10% of its net asset value in debt securities issued by or guaranteed by any single sovereign issuer (including its government, public or local authority) which is rated below Investment Grade or unrated.

The Fund is a global fund and is not confined to investing in any specific country or region. While not a major strategy of the Fund, the Fund may, when opportunities arise that Western Asset determines will further the investment objective of the Fund, also invest up to 30% of its net asset value in debt securities of issuers domiciled in emerging market countries.

The Fund may invest in convertible notes, collective investment schemes, unsecuritised participations in or assignments of floating rate mortgages or other commercial loans and debt securities of issuers domiciled in emerging market countries and other investments.

The Fund will not invest in equity securities, including warrants, except (1) for preferred shares, provided that not more than 10% of the Fund's net asset value may be invested in preferred shares and (2) equity securities acquired via conversions of convertible debt securities or via corporate actions of issuers (such as issuing equities to replace previously issued debt securities).

It is expected that the Fund will maintain an average portfolio duration of between zero and three years depending on Western Asset's forecast for interest rates and yields. However, the Fund may invest in individual securities of any duration.

The Fund may invest up to 30% of its net asset value in (i) Additional Tier 1 capital, Tier 2 capital and senior non-preferred debt instruments; (ii) contingent convertible securities and (iii) bail in bonds that have contingent write down or loss absorption features.

The Fund may have exposure to reverse repurchase agreements for efficient portfolio management purposes and subject to the requirements of the Central Bank.

The Fund typically will purchase a corporate debt security if the yield and, to a lesser extent, the potential for capital appreciation, of the debt security are sufficiently attractive in light of the risks of ownership of the debt security.

Western Asset believes that inefficiencies exist in the debt market and create opportunities, which may include undervalued securities, out-of-favour securities and securities whose credit rating might be upgraded, that Western Asset seeks to exploit. In determining whether the Fund should invest in a particular debt security, Western Asset will consider factors such as: price, coupon and yield to maturity; Western Asset's assessment of the credit quality of the issuer; the issuer's available cash flow and the related coverage ratios; the property, if any, securing the debt obligation and the express terms of the obligation, including default and early redemption

provisions. Western Asset also will review the ratings, if any, assigned to the securities by Moody's, S&P or other nationally recognised statistical rating organisation ("NRSRO"). Western Asset's judgment as to credit quality of a debt security may differ, however, from that suggested by the ratings published by various NRSROs.

USE OF DERIVATIVES/ INVESTMENT IN DERIVATIVES:

The Fund's net derivative exposure¹ may be up to 50% of the Fund's net asset value.

¹ Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **Debt Securities Risk:** Investments in debt securities are subject to risks such as credit risk, market risk, liquidity risk, interest rate risk, valuation risk and pricing volatility, which may cause substantial losses to the Fund. The prices of debt securities fluctuate in response to perceptions of the issuer's creditworthiness and also tend to vary inversely with market interest rates. Generally, and in the absence of hedging measures, the longer the average weighted duration of a fund, the greater the sensitivity to interest rates. Investment Grade securities may be subject to the risk of being downgraded to below Investment Grade. Debt securities rated below Investment Grade are deemed by rating agencies to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal and may involve major risk of exposure to adverse conditions.
- **Risk related to below investment grade / unrated securities:** Debt securities rated below Investment Grade are deemed by rating agencies to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal and may involve major risk exposures to adverse conditions affecting the issuer. Unrated debt securities are not necessarily of lower quality than rated securities, however, they may not be attractive to as many buyers hence may be less liquid and with higher risks. The Fund may be invested in 'below investment grade' and/or unrated debt securities, which carry a higher degree of pricing volatility, market risk, liquidity risk and default risk than 'investment grade' debt securities. When any such risk materialises, the Fund may suffer a substantial loss.
- **Interest Rate Risk:** The value of debt securities is likely to decline in times of rising interest rates. Conversely, when rates fall, the value of these investments is likely to rise. The longer the time to maturity the greater are such variations.
- **Credit Risk:** The Fund's investment in debt securities expose the Fund to credit risk, i.e. the risk that an issuer of securities will be unable to pay principal and interest when due, or that the value of the security will suffer because investors believe the issuer is less able to pay. Ratings are only the opinions of the agencies issuing them. Such ratings are relative and subjective, and are not absolute standards of quality. The credit rating agency may change their ratings on particular debt securities held by the Fund, and downgrades are likely to adversely affect the price hence the Fund may suffer a substantial loss.
- **Liquidity Risk:** In certain circumstances it may be difficult to sell the Fund's investments because there may not be enough demand for them in the markets, in which case the Fund may not be able to sell or liquidate such investments or to sell them at a significant discount to the purchase price hence the Fund may suffer a substantial loss.
- **Mortgage-Backed Securities and Asset-Backed Securities Risk:** The Fund invests in mortgaged-backed securities (including collateralized debt obligations) and asset-backed securities which may be highly illiquid and prone to substantial price volatility. These instruments may be subject to greater credit, liquidity and interest rate risk compared to other debt securities. They are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the returns of the securities.
- **Derivatives Risks:** This Fund may use certain types of financial derivative instruments (FDIs). These instruments may involve a higher degree of risk including but not limited to counterparty, volatility, liquidity, leverage and valuation risks, and the Fund may suffer a substantial loss. There is no guarantee that the performance of FDIs will result in a positive effect to the Fund.

- **Currency Risk:** Fluctuations in exchange rates between the currency of the underlying securities and the Fund's base currency may adversely affect the value of an investment and any income derived from it. In addition, the value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the Fund. With respect to any share class with "(Hedged)" in its name, the Fund will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so. The use of share class hedging strategies may substantially limit shareholders in the relevant Hedged Share Class from benefiting if the currency of the Hedged Share Class falls against the base currency and/or the currencies that are significant to the Fund's investment strategy, as applicable. Any hedging transactions, while potentially reducing the currency risks to which the Fund would otherwise be exposed, may involve certain other risks, including the risk of a default by a counterparty, and the risk that the Fund's forecast with respect to currency movements is incorrect. If the abovementioned hedging transactions become ineffective, the Fund may suffer a substantial loss.
- **Risk of Investing in Distributing Plus Share Classes:** Distributing Plus share classes may pay dividends out of capital. The payment of dividends out of capital effectively amounts to a return or withdrawal of an investor's original capital investment or of capital gains attributable to that original investment. Such distribution will result in a corresponding immediate decrease in the net asset value per share of the Share Classes. There is also an increased risk that on a redemption, you may not receive back the full amount invested. The distribution amount and net asset value of the Distributing (Hedged) Plus Share Class may be adversely affected by differences in the interest rates of the reference currency of the Distributing (Hedged) Plus Share Class and the Fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other Share Classes.
- **Investment Risk:** The value of investments in the Fund and the income from them can go down as well as up, and investors may not get back the amount originally invested and may suffer a substantial loss to their investments. Past performance is no guide to future returns and may not be repeated. There is no guarantee of the repayment of principal.
- **Risk of investing in instruments with loss-absorption features:** The Fund may invest in debt instruments that have contingent write down or loss absorption features. Such instruments may be written-off fully or partially or converted to common stock on the occurrence of a trigger event. These instruments generally absorb losses in a trigger event, for example, where the issuer's capital falls below a certain level, and may be compulsorily redeemed as a result which may be out of the issuer's control. Such trigger events are complex and hard to predict, and may potentially lead to losses to the Fund. The Fund may invest in contingent convertible debt securities, commonly known as CoCos, which are highly complex and are of high risk. Upon the occurrence of the trigger event, CoCos may be converted into shares of the issuer (potentially at a discounted price), or may be subject to the permanent write-down to zero. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time. The Fund may also invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss of principal invested.

HOW HAS THE FUND PERFORMED?

The investment objective, policy and/or restrictions were changed in 2015 and 2016. As a result, the performances of these years were achieved under circumstances that may no longer apply.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Class A US\$ Accumulating* increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Fund launch date: 2004.
- Class A US\$ Accumulating* launch date: 2007.
- Effective 13 May 2015, the benchmark of the Fund was changed from FTSE 1 Month U.S. Treasury Bill Index to Bloomberg US High Yield 1-5 Years Cash Pay Index 2% constrained (formerly known as Bloomberg Barclays US High Yield 1-5 Years Cash Pay Index 2% constrained) to reflect the new investment objective and policies of the Fund.

* This share class is a representative share class of the Fund as it represents the total return on the Fund's investment strategy and is the most widely available share class in Hong Kong.

IS THERE ANY GUARANTEE?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund:

Fees in respect of each Class A Share Class	What you pay
Subscription Fee (Initial Sales Charge)	Up to 5.00% of the amount you subscribed
Switching Fee	Not applicable
Redemption Fee	Not applicable

Ongoing fees payable by the Fund

The following expenses will be paid out of the Fund. They affect you because they reduce the return you get on your investments:

Expenses in respect of each Class A Share Class*	Annual rate (as a % of the Fund's NAV)
Management Fee	Up to 1.10%
Combined Administration and Depositary Fee	Up to 0.15%
Performance Fee	Not applicable
Shareholder Servicing Fee	Up to 0.15%

* For Hedged Share Classes, (i) the Currency Administrator is entitled to receive fees for hedging administration services (currently charged at 0.04% per annum of the value of the hedging transactions), which shall be borne exclusively by the relevant Hedged Share Class; and (ii) the Collateral Manager is entitled to receive fees for its collateral management services in relation to currency hedging (such fees not exceeding GBP 340 per month for the Fund), which shall be charged only to the relevant Hedged Share Classes.

Other fees

You may have to pay other fees when dealing in the shares of the Fund.

ADDITIONAL INFORMATION

- You generally buy and redeem shares at the Fund's next-determined net asset value (NAV) after the authorised dealer or sub-distributor receives your request in good order on or before 4:00 p.m. in New York (EST) on any relevant dealing day. Certain dealer or sub-distributors may impose a deadline for receipt of orders that is earlier than this.
- The NAV of this Fund is calculated on each dealing day and published no later than the second business day immediately succeeding each dealing day on www.leggmason.com.hk.
- In respect of Distributing Plus Share Classes, the composition of dividend payouts (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months will be available from the Hong Kong Representative on request and on our website, www.leggmason.com.hk.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors from our website, www.leggmason.com.hk.
