*The ongoing charges figure is based on the expenses for the year ended 31 December 2021. This figure may vary from year to year.

As the share class is either not launched yet or fully redeemed, this figure is an estimated figure based on the ongoing charges figure based on expenses for the year ended 31 December 2021 of another active share class of the Fund with a similar fee structure. The actual figure may be different from this estimated figure and may vary from year to year.

PRODUCT KEY FACTS

What is this product?

The Fund is a collective investment scheme (investment company), domiciled in Ireland and regulated by the Central Bank of Ireland.

Objective and Investment Strategy

To seek to achieve asset growth through investment in a well-diversified portfolio of securities of issuers worldwide. It is not proposed to concentrate investments in any one geographical region, industry or sector.

The securities will be listed, traded or dealt in on a regulated market. The securities in which the Fund may invest shall include ordinary shares or common stock, American depository receipts ("ADRs"), global depository receipts ("GDRs"), preference shares and warrants, provided that investments in warrants shall not comprise more than 5 per cent. of the net asset value of the Fund. The Fund will aim to achieve its investment objective by investing not less than 70% of its net asset value directly in such securities.

The Fund may invest up to 20 per cent. of its net asset value in companies domiciled in emerging markets or issuers established outside of the emerging markets, which have a predominant proportion of their assets or business operations in the emerging markets and which are listed, traded or dealt in on a regulated market worldwide.

The Fund is permitted to invest in or hold other types of instruments as part of its investment policy including, but not limited to, collective investment schemes and REITs.

The Fund may employ investment techniques and financial derivative instrument such as exchange traded futures solely for efficient portfolio management.

Investment Approach

The Fund is actively managed, which means the Investment Manager has freedom to select the investments in order to seek to achieve the investment objective of the Fund. In seeking to achieve its investment objective, the Fund aims to deliver a return, net of fees, greater than that of the MSCI World Index (the "Index") with net dividends re-invested over rolling 3 year periods.

The Index represents the performance of the large and mid-cap segments of developed markets globally.

The Fund is managed by the Investment Manager adopting a "systematic" investment process, which uses sophisticated computer models to analyse large volumes of data to select investments. Stocks are assessed in terms of the attractiveness of their valuation, quality, price trends, stable growth prospects, sentiment and company management. In addition, the Investment Manager takes other criteria, such as expected risk, trading costs and liquidity into consideration when constructing the Fund's portfolio.

The Index is a representation of the markets in which the Fund primarily invests. Although a large proportion of the Fund's investments may be components of the Index, the Investment Manager does not seek to replicate the performance of the Index; it is seeking to deliver a return, net of fees, greater than the Index. In particular, the Fund may invest in companies which are not included in the Index and the stock selection and portfolio construction process, as set out above, mean that the number of holdings and weightings of the companies, industries, sectors and countries of the holdings of the Fund may diverge materially from the Index. Therefore, the risk and return profile of the Fund will likely be significantly different to that of the Index. As set out above, the portfolio construction of the Fund involves considering risk, trading costs and liquidity. As part of this portfolio construction process, various controls are in place aiming to ensure risks are not concentrated in any one company, industry, sector or country.

Use of derivatives / investment in derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong Offering Document for details including the risk factors.

1. Investment risk

- There can be no assurance that the Fund will achieve its investment objective. The price of the shares may fluctuate and there may be circumstances where no return is generated and the amount invested is lost.

2. Equity risk

- The value of the Fund that invests in equity and equity-related securities will be affected by economic, political, market, and issuer specific changes. Such changes may adversely affect securities and the market value of the equity securities that it invests in may go down and the relevant Fund may suffer losses.

PRODUCT KEY FACTS

3. Volatility risk

- Price of securities in which the Fund will invest may be volatile. During periods of uncertain market conditions, the combination of price volatility and illiquidity in the market may affect the Fund's ability to acquire or dispose of securities at the price and time it wishes to do so, and consequently may have an adverse impact on the investment performance of the Fund.

4. Emerging market risk

- The Fund may invest in developing markets which may be illiquid and subject to higher price and levels of volatility than investments in more developed economies. Therefore, investments in markets of a developing nature may cause the Fund to suffer losses.
- The legal infrastructure and accounting, auditing and reporting standards in emerging markets may not provide the same degree of shareholder protection or information to investors as would generally apply internationally.
- The value of the assets of the Fund may be adversely affected by the uncertainties, such as political developments, changes in government policies, taxation and currency repatriation and restrictions on foreign investment. This may lead to a delay in payment of redemptions to shareholders when the Fund encounters repatriation restrictions. Any fluctuation in currency and interest rate, inflation and changes in relation to currency convertibility in the emerging markets that the Fund invests in may cause an adverse impact on the net asset value of the Fund.

5. Derivatives risk

- The Fund may enter into transactions in over-the-counter markets that expose it to the credit risk of its counterparties. In the event of the bankruptcy or insolvency of a counterparty, the Fund could experience delays in liquidating the position and may incur significant losses.
- In an adverse situation, the use of financial derivative instruments for hedging and efficient portfolio management may become ineffective and as a result, the Fund may suffer significant losses.

6. Currency risk

- The Fund's investment in non-USD denominated securities which is different from the base currency of the Fund (i.e. USD) and may cause the value of the Fund's investments to fluctuate with changes in exchange rates. The value of a shareholder's investment may be affected unfavourably by fluctuations in the rates of exchange of the different currencies.

How has the fund performed?

PRODUCT KEY FACTS

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much class L (USD) Accumulation increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- The benchmark of the Fund is MSCI World Index.
- Fund launch date: 2000
- Class L (USD) Accumulation launch date: 2000
- The Investment Manager views class L (USD) Accumulation being the most appropriate representative share class as this is the focus share class which is offered to the public in Hong Kong.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.
