Minimum subsequent investment:	US\$750 or the approximate equivalent in another approved currency (applicable to A and C Shares)	

What is this product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and Investment Strategy

The Sub-Fund aims to provide long-term capital growth primarily through investment in equities of companies established and listed on a recognised exchange in Asia Pacific, excluding Japan. The Sub-Fund may invest primarily in the markets of Australia, Hong Kong, Singapore, Malaysia, Thailand, Taiwan, South Korea, the Philippines, Indonesia, China, India and New Zealand.

The exposure to companies established and listed on a recognised exchange in Mainland China shall be limited to a maximum of 50% of the net assets of the Sub-Fund. The Sub-Fund may invest up to 50% of its net asset value in shares listed on the ChiNext Market and/or the Science and Technology Innovation Board (STAR Board).

The Sub-Fund's equity holdings in Mainland China companies may consist of China A Shares which may include but is not limited to those traded via Stock Connect. The Sub-Fund may invest, in aggregate, up to 50% of its net asset value in China A-Shares and B-Shares.

The Sub-Fund may also invest less than 30% of its net asset value in other transferable securities, money market

instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

of achieving the Sub-Fund's objectives. The Sub-Fund uses the MSCI AC Asia Pacific ex Japan (Net Return) Index for performance comparison and risk management. The Sub-Fund does not seek to replicate the index. It will generally hold assets that are components of the index, but not in the same proportions, and it is allowed to hold assets which are not components of the index. The Sub-Fund will therefore generally look different from the index, and the Investment Manager will monitor performance differences.

The Sub-Fund currently does not intend to enter into any securities lending, repurchase and/or reverse repurchase transactions. The prior approval of the SFC will be sought and at least one month's prior notice would be given to shareholders should there be a change in such intention.

Use of derivatives / investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **Investment risk** – The underlying investments of the Sub-Fund may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. You may not get back the full amount of money you invest. In addition, the Sub-Fund primarily invests in equities or equity-related securities. Generally, equities or equity-related securities are subject to higher volatility and therefore higher risk of loss, compared to other instruments such as bonds, money markets instruments or bank deposits.

- **Risk associated with equities securities**

Equity market risks – The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

Risks associated with high volatility of the China A Shares markets – High market volatility and potential settlement difficulties in the markets may also result in significant fluctuations in the prices of the China A Shares and thereby may adversely affect the value of the Sub-Fund.

Risks associated with regulatory policies of the China A Shares markets – Securities exchanges in Mainland China typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Sub-Fund.

- **Risks associated with ChiNext Market and/or STAR Board**

Higher fluctuation on stock prices and liquidity risk – Listed companies on ChiNext Market and/or STAR Board are usually of emerging nature with smaller operating scale. Listed companies on ChiNext Market and STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main boards.

Over valuation risk – Stocks listed on ChiNext and/or STAR Board may appear to be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.

Differences in regulation – The rules and regulations regarding companies listed on the ChiNext Market and STAR Board are less stringent in terms of profitability and share capital than those in the main board.

Delisting risk – It may be more common and faster for companies listed on ChiNext Market and/or STAR Board to delist. ChiNext Market and STAR Board have stricter criteria for delisting compared to the main boards. This may have an adverse impact on the Sub-Fund if the companies that it invests in are delisted.

Concentration risk – STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in STAR Board may be concentrated in a small number of stocks and subject the Sub-Fund to higher concentration risk.

Investments in the ChiNext Market and/or STAR Board may result in significant losses for the Sub-Fund and its investor.

- **Risks associated with the Stock Connect** – The relevant rules and regulations on Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations. Where a suspension in the trading through the programme is effected, the Sub-Fund's ability to invest in China A Shares or access the Mainland China market through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

- **RMB currency and conversion risks**

Where a Sub-Fund invests in underlying investments which are denominated in RMB, the Sub-Fund will be subject to RMB currency and conversion risks. RMB is currently not freely convertible and is subject to exchange controls and restrictions.

Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the Sub-Fund's base currencies (i.e. USD) will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Sub-Fund.

Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.

Under exceptional circumstances, payment of redemptions and/or dividend payment may be delayed due to the exchange controls and restrictions applicable to RMB.

- **Concentration risk / geographical risk** – The Sub-Fund invests in a small number of geographical locations (i.e. Asia Pacific excluding Japan) which may subject it to greater volatility than a more broadly diversified portfolio. The equity markets in these geographical locations may decline even while broader based equity market indices are rising. The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the Asia Pacific (but excluding Japan) markets.
- **Emerging market risk** – The Sub-Fund may invest substantially in emerging markets (i.e. Asia Pacific excluding Japan) which may have relatively unstable social, political and economic environments, less regulated securities markets and less developed accounting and disclosure standards. Emerging markets may have higher risk of expropriation and risk of remittance restrictions and be subject to currency exchange controls. Other risks include legal and taxation risks, settlement risk and custody risk. The Sub-Fund may be more volatile and less liquid, and may have higher risk of loss, than funds which primarily invest in developed markets.
- **Investment in China risk** – Investing in China involve high market volatility and the risk of lack of liquidity. In addition, there are greater political, social, economic, legal, accounting and reporting, financial markets stability, regulatory, taxation, foreign exchange risks.
- **Mainland China tax risk** – There are risks and uncertainties associated with the current Mainland China tax laws, regulations and practice in respect of value-added tax and capital gains realised via Stock Connect on the Sub-Fund's investments in the Mainland China (which may have retrospective effect).
Based on professional and independent tax advice, no tax provision will be made on the capital gains derived from the Mainland China investments. Mainland China tax rules are subject to change with potential retrospective effect.
Any shortfall between the provision and the actual tax liabilities, which will be debited from the fund's assets, will adversely affect the fund's NAV. Depending on the timing of their subscriptions and/or redemptions, investors may be disadvantaged as a result of any shortfall of tax provision.
- **Derivatives usage risk** – The Sub-Fund may use derivatives for the purposes of hedging and/or EPM. Investments in derivatives involve additional risks such as leverage risk, counterparty risks, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse situations, the Sub-Fund's use of derivatives may become ineffective in hedging and/or in EPM and the Sub-Fund may suffer significant losses.
- **Exchange rate fluctuation risk** – Currency fluctuations may adversely affect the value of a Sub-Fund's investments and the income thereon. Currency fluctuations may also adversely affect the profitability of an underlying company in which a Sub-Fund invests.

How has the fund performed?

The performance of years prior to 2022 was based on an investment strategy that may no longer apply as the investment policy was changed on 7 December 2018 and 30 November 2021.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the share class increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee (if any) you might have to pay.
- The benchmark is MSCI AC Asia Pacific ex Japan (Net Return) Index.
- Fund launch date: 14 May 2010
- A Inc share class* launch date: 14 May 2010

*This Share Class is a representative share class as it is a focus share class made available to Hong Kong investors.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.
