

ALLIANCEBERNSTEIN®

PRODUCT KEY FACTS

AB SICAV I

AllianceBernstein (Luxembourg) S.à r.l.

International Technology Portfolio

September 2022

*This statement provides you with key information about this product.
This statement is a part of the offering document.
You should not invest in this product based on this statement alone.*

Quick facts

Management Company:	AllianceBernstein (Luxembourg) S.à r.l.		
Investment Manager:	AllianceBernstein L.P. (internal delegation, U.S. Delaware)		
Depository:	Brown Brothers Harriman (Luxembourg) S.C.A.		
Dealing frequency:	Daily		
Base currency:	U.S. Dollar		
Dividend policy:	None		
Financial year end of this Portfolio:	31 May		
Ongoing charges over a fiscal year:	Class A Shares	Class B Shares	Class C Shares
	2.02% [†]	3.01% [†]	2.47% [†]
Min. investment*:	Initial		Additional
Classes A, B [•] and C Shares	USD2,000 EUR2,000		USD750 EUR750

[†] The ongoing charges figure is based on expenses for the half year ended 30 November 2021. This figure may vary from year to year. The ongoing charges figure is an annualized figure based on information from the semi-annual report calculated by adding the applicable charges and payments deducted from the assets of the Portfolio and then dividing by the Portfolio's average Net Asset Value for the fiscal year attributable to the relevant share class.

* Different minimum, additional and maximum investment limits may apply to different classes of shares denominated in different currencies. Investors should refer to the offering document of the Fund for details.

[•] Class B Shares are no longer open for subscription by new and existing investors. However, investors may request the exchange of their holdings of Class B Shares for the same share class of another AB-sponsored Luxembourg-domiciled UCITS fund authorised in Hong Kong for retail distribution or otherwise available through an AB authorised dealer in Hong Kong.

What is this product?

The International Technology Portfolio (the "Portfolio") is a portfolio of AB SICAV I (the "Fund"), an open-ended investment company with variable capital domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and Investment Strategy

Objectives

The Portfolio's objective is to increase the value of your investment over time through capital growth.

Strategy

In actively managing the Portfolio, the Investment Manager uses fundamental research to select securities that it believes offer superior long-term growth characteristics (bottom-up approach).

Under normal market conditions, the Portfolio typically invests at least 80%, and not less than two thirds, of its net asset value in equity securities of companies that are expected to profit from technological advances and innovations. These companies may be located anywhere in the world, including Emerging Markets (i.e. any country not defined as "high income" by the World Bank, or as otherwise determined by the Investment Manager which includes the subcategory of frontier markets).

The Portfolio uses derivatives for hedging (reducing risks) and efficient portfolio management.

Under exceptional circumstances (e.g. market crash or major crisis), the Portfolio may be invested temporarily up to 100% in cash, cash equivalents (such as bank deposits, certificates of deposit, commercial paper and treasury bills) and high quality

ALLIANCEBERNSTEIN®

short-term securities for cash flow management. To the extent the Portfolio invests defensively, it may not be pursuing its objective.

Use of derivatives / Investment in derivatives

The Portfolio's net derivative exposure may be up to 50% of the Portfolio's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. General Investment Risk

The Portfolio's investment may fall in value due to any of the key risk factors below and therefore your investment in the Portfolio may suffer losses. There is no guarantee of the repayment of principal.

2. Equities Securities Risk

The Portfolio's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

3. Technology Industries Risk

The economic prospects of companies benefiting from scientific and technological improvements are generally subject to greater influences from governmental policies and regulations than those of many other industries. A substantial portion of scientific research is funded or subsidised by governments and changes in governmental policies.

4. Concentration Risk

The Portfolio's investments are concentrated in specific industry sectors, instruments or geographical locations. The value of the Portfolio may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Portfolio may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the market.

5. Emerging Markets Risk

The Portfolio will invest in Emerging Markets, which are subject to higher risks (for example, liquidity risk, currency risk, political risk, regulatory risk, economic risk, legal and taxation risk, settlement risk and custody risk) and higher volatility than developed markets. Fluctuations in currency exchange rates may negatively affect the value of an investment or reduce returns – these risks are magnified in Emerging Markets.

6. Currency Risk

Underlying investments may be denominated in one or more currencies different from the Portfolio's base currency. Also, a class of shares may be designated in a currency other than the base currency of the Portfolio. This means changes in exchange rate controls, currency movements in such underlying investments and fluctuations in the exchange rates between these currencies and the base currency may significantly and unfavorably affect the net asset value of the Portfolio's shares.

7. Risk in Investing in Financial Derivative Instruments

Risks in investing with financial derivative instruments include counterparty / credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element / component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Portfolio. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Portfolio.

ALLIANCEBERNSTEIN®

How has the Portfolio performed?

The bar chart below shows the past performance of Class A USD Shares, which has been designated as the representative share class by the Management Company as it is a focus share class made available to Hong Kong investors.

Portfolio launch year: 1995

Class A USD Shares launch year: 1995

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much Class A USD Shares have increased or decreased in value during the calendar year being shown.
- Performance data has been calculated in USD including ongoing charges and excluding any subscription fee and redemption fee you might have to pay.
- With effect from 4 May 2020, the benchmark of the Portfolio is MSCI World Information Technology Index.

Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

(Different fee structures apply to different classes of shares. Investors should refer to the offering document of the Fund for details.)
