WHAT IS THIS PRODUCT?

PineBridge US Large Cap Research Enhanced Fund is a sub-fund of the PineBridge Global Funds (the “Fund”). The Fund is constituted in the form of a unit trust. It is domiciled in Ireland and its home regulator is the Central Bank of Ireland.

OBJECTIVES AND INVESTMENT STRATEGY
Objectives

The investment objective of the Sub-Fund is to attain long term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies, at least 90% of which have assets, products or operations based in the United States and are included in the Russell 1000 Index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing.

¹ The ongoing charges figure is an annualized figure based on the expenses for the 6 months ended 30 June 2022 and expressed as a percentage over the average net asset value of the class of unit for the corresponding period. This figure may vary from year to year.

² As the Class is not yet launched, the ongoing charges figure is an annualized figure based on the estimated expenses for the 6 months ended 30 June 2022 and expressed as a percentage over the estimated average net asset value of the class of unit for the corresponding period. This figure may change from year to year.

Strategy

The Sub-Fund is an actively managed fund. In order to do this, the Investment Manager will use the Equity Research Enhanced strategy, as described in the “Investment Selection” section of the Prospectus.

The Sub-Fund may use financial derivative instruments (“FDIs”) including, but not limited to futures, options, swaps, forwards, and warrants for efficient portfolio management (including hedging) purposes only. The Sub-Fund will not use FDIs extensively for any purpose.

USE OF DERIVATIVES

The Sub-Fund’s net derivative exposure may be up to 50% of its net asset value.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Equity Investing Risk

- The value of equity and equity-related securities will be affected by economic, political, market, and issuer-specific changes, regardless of company specific performance. Different industries, financial markets, and securities can react differently to these changes.
- The risk that one or more companies in a portfolio will fall, or fail to rise, can adversely affect the overall portfolio performance in any given period.

Quantitative Model Risk

- The Investment Manager may use proprietary or third party quantitative algorithms and models in an effort to enhance returns and/or manage risk. The resulting analysis and investment selections depend on a variety of factors, such as the quality and accuracy of the data inputs into the models, the effective translation of that data into the models’ program codes, the ability of the model to adjust to the speed that market conditions change and the successful integration of the quantitative models into the security selection process within the Sub-Fund.
- Any imperfections, errors or limitations in these models may result in outcomes different from or opposite to those expected or desired by the Investment Manager.

Risk-Constrained Strategy Risk

- Risk constrained strategies may limit the possible differences between the relative weights of investments, sectors, regions, countries, currencies, ratings or other characteristics in the Sub-Fund versus the benchmark index. Constraining the ability of the Sub-Fund to take materially different risk to its benchmark index may mean that the Sub-Fund’s risk and return profile are very similar to that of the index. This similarity may persist over the short or long term.

Concentration Risk

- The Sub-Fund may invest in specific industry sectors / instruments compared to more diversified funds or it may focus its investments and hold relatively large positions in, among other things, particular industries, countries, sectors, currencies or issuers. This may occur directly as a result of portfolio management decisions, or indirectly as a result of security price changes. Where this happens, the Sub-Fund may have a greater level of sensitivity to those industries, sectors, countries, currencies or issuers and the events, developments or issues that affect their prices. This may result in significant losses for the Sub-Fund, may increase the volatility of the value of the Sub-Fund, and may also limit the liquidity of certain securities within the Sub-Fund.

Financial Derivative Instruments Risk

- The leverage effect embedded in derivatives may result in substantial losses including and up to the total value of the assets of the Sub-Fund and the prices of derivatives can be highly volatile. The use of FDIs may expose the Sub-Fund to various types of risk, including but not limited to, counterparty, liquidity, correlation, credit, volatility, valuation and settlement risks which can have an adverse effect on the net asset value of the Sub-Fund.

Counterparty Risk

- A Sub-Fund may have credit exposure to its trading parties and may also bear the risk of settlement default. In addition, misrepresentation or omission on the part of counterparty may adversely affect the valuation of the collateral underlying an investment.

Risk associated with Distribution Out of / Effectively Out of the Sub-Fund's Capital (also known as Capital Growth Risk)

- Dividends, if any, may be paid out of the capital of the Sub-Fund. Where the Manager determines in its discretion to pay distributions in respect of the Sub-Fund, investors should note that such distributions amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
- Such distributions may result in an immediate decrease in the net asset value of the Sub-Fund.

Investment Loss Risk

- The instruments invested by the Sub-Fund may fall in value and therefore your investment in the Sub-Fund may suffer losses.
- The value of the Sub-Fund may be adversely affected by developments in political, economical and social conditions and policies of the markets in which it invests which may result in losses to your investment.

ESG Risks

- The Sub-Fund is subject to environmental, social or governance ("ESG") related risks and sustainability risk. Sustainability risk is an ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. Third party data may be used to determine ESG factors and are based on backward-looking analysis, and the data may be limited and subject to change. The categorisation of the Sub-Fund under the Regulation (European Union) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector may be affected by regulatory change or new technical standards/guidance coming into effect.

HOW HAS THE SUB-FUND PERFORMED?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the unit class increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD, including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Class A is an active unit class available for Hong Kong retail investors. It has been chosen to be the representative unit class for disclosure of past performance information in this statement.
- The benchmark of the Sub-Fund is Standard & Poor's 500 Total Return Net Index which is a total return, market-weighted index, representing the aggregate market value of the common equity of 500 stocks traded on the New York Stock Exchange.
- The Sub-Fund aims to outperform its benchmark through active risk decisions, while constraining certain variations in risk and portfolio characteristics versus the benchmark. The Sub-Fund targets a material tracking error against its benchmark which has typically been approximately 2%. The Sub-Fund also aims to limit the active stock, sector and industry weights of the portfolio versus the benchmark. These have historically been in a range of +/- 2%, though will vary over time and are subject to change. The Sub-Fund rebalances versus the benchmark on a monthly basis to reflect fundamental and valuation changes at the stock level while adhering to constraints built into the portfolio optimization process.

- Sub-Fund launch date: 25 August 2005
- Class A launch date: 15 May 2007

IS THERE ANY GUARANTEE?

This Sub-Fund does not have any guarantee. You may not get back the full amount of money you invest.

Unitholder servicing & maintenance fee ³	Class A Units	0.50%
	Class A4 Units	0.50%
	Class Y Units	nil
Hong Kong Representative fee	Up to 0.05% per annum of the value of the Sub-Fund attributable to Hong Kong investors introduced into the Sub-Fund by the Hong Kong Representative (PineBridge Investments Asia Limited) may be charged.	

Other fees

You may have to pay other fees when dealing in the units of the Sub-Fund.

ADDITIONAL INFORMATION

- The daily dealing cut-off time is 12:00 noon (Irish time) for subscription, redemption and switching orders to be received by the Administrative Agent. The Sub-Fund's next-determined net asset value per unit will be applied to each order. Please check with your distributor who may have a different internal dealing cut-off time.
- The net asset values per unit of this Sub-Fund are calculated and published on each day which is a bank business day in Ireland and also a day on which the Federal Reserve Bank of New York is open for business. Net asset values per unit (for launched classes of units currently available in Hong Kong) are also published at the website address of www.pinebridge.com.hk.*

³ The current annual rates may be increased up to a specified permitted maximum level as set out in the Prospectus of the Fund by giving not less than one month's prior notice to Unitholders.

* This website has not been reviewed by the SFC.

- The past performance information of other unit classes offered to Hong Kong investors are available on the Fund's website www.pinebridge.com.hk.*
- The compositions of the distributions (i.e. the relative amounts paid from (i) net distributable income and (ii) capital) (if any) for the last 12 months are available from the Manager or the Hong Kong Representative on request and also on the Fund's website www.pinebridge.com.hk.*
