## What is this product?

This fund is a sub-fund of Amundi Funds, a mutual fund domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier.

## Objectives and Investment Strategy

To achieve long-term capital growth.

The fund invests at least 67% of its assets in equities and Equity-Linked Instruments of companies that are headquartered, or do substantial business, in MENA (i.e. The Middle East and North Africa region) countries. The fund may invest in participatory notes for the purpose of efficient portfolio management. There are no currency constraints on these investments.

The fund is actively managed by reference to and seeks to outperform (after applicable fees) the S&P Pan Arab Large Mid Cap Index (the "Benchmark"). The fund is mainly exposed to the issuers of the Benchmark, however, the Benchmark is not used for the purpose of portfolio construction of the fund and the management of the fund is discretionary, and the fund will be exposed to issuers not included in the Benchmark. The fund

monitors risk exposure with reference to the Benchmark however the extent of deviation from the Benchmark is expected to be material.

The investment team actively manages the fund's portfolio by combining top-down and bottom-up strategies: geographical allocation, sector allocation within each country and equity selection based on growth potential and valuation.

### **Use of derivatives / investment in derivatives**

This fund's net derivative exposure may be up to 50% of the fund's net asset value.

### **What are the key risks?**

**Investment involves risks. Please refer to the Prospectus for details including the risk factors.**

**1. Emerging markets risk:** According to the objectives and investment strategy of the fund, it will invest in emerging markets which may subject to emerging markets risk. Investment in securities of issuers of emerging markets involves special considerations and risks, including the risks associated with investment in emerging markets, such as currency fluctuations, the risks of investing in countries with smaller capital markets, limited liquidity, higher price volatility, different conditions applying to transaction and control and restrictions on foreign investment, as well as risks associated with emerging markets, including high inflation and interest rates, large amounts of external debt as well as political and social uncertainties.

**2. Additional risks due to the political and economic situation in MENA region:** As the fund will invest in MENA region, instability in the MENA markets may result from factors such as government or military intervention in decision-making, terrorism, civil unrest, extremism or hostilities between neighbouring countries. An outbreak of hostilities could result in substantial losses for the fund. Extremist groups in certain countries have traditionally held anti-Western views and are opposed to openness to foreign investments. If these movements gain strength they could have a destabilising effect on the investment activities of the fund.

In MENA region, markets may remain closed for several days due to religious celebration, during which no subscription and redemption will be processed. Moreover, exact dates of market closure may be known only a very short time in advance.

The underlying investments of the fund will consist of quoted shares in the MENA region. The marketability of quoted shares is limited due to the restricted opening hours of stock exchanges, a narrow range of investors and a relatively high proportion of market shares being held by a relatively small number of shareholders. Trading volume is generally lower than on more developed stock markets and equities are generally less liquid.

**3. Equity risk:** Investment in common stocks and other equity securities are subject to market risk that historically has resulted in greater price volatility than experienced by bonds and other fixed income securities.

**4. Risk specific for participatory notes:** participatory notes which are the embedded derivatives instruments allowing investors to indirectly invest in securities listed on certain markets having a complicated or restricted access in MENA region, may be subject to counterparty risk which is the risk that the broker, dealer or bank that issues the notes will not fulfill its contractual obligations under the notes.

**5. Risk attached to the use of Financial Derivative Instruments ("FDI"):** The fund may invest in FDI for hedging purpose and for the purpose of efficient portfolio management only. Investment in FDI is subject to additional risks, including credit risk of the issuer, liquidity risk, counterparty risk and valuation risk. In adverse situation, the fund's use of FDI may become ineffective in hedging/efficient portfolio management and the fund may suffer significant losses.

**6. Market risk:** Value of this fund investments could decrease due to movements in financial markets. The value of the fund can be extremely volatile and could go down substantially within a short period of time. It is possible that your investment value could suffer substantial loss.

**7. Risks related to distribution out of capital:** For distribution class, Amundi Funds may at its discretion determine to pay dividends out of income or capital of the fund. In addition, Amundi Funds may at its discretion pay dividends out of gross income while charging / paying all or part of the fund's fees and expenses to the capital of the fund, resulting in an increase in distributable income for the payment of dividends by the fund, in which case, the fund is effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the fund's capital or payment of dividends effectively out of the fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share of the fund. Amundi Funds may change the fund's dividend distribution policy to pay dividends out of capital or effectively out of capital of the fund subject to the SFC's prior approval. For change of distribution policy, not less than one month's prior notice will be provided to affected Shareholders.
