* As the share class has been recently established, the ongoing charges figure is estimated based on the expected annualised total of charges expressed as a percentage of the average net asset value over the same period. This figure may vary from year to year. It excludes portfolio transaction costs.

- The ongoing charges figure is calculated based on annualised expenses for the period ending 31 August 2021 divided by the average net assets over the same period. This figure may vary from year to year. It excludes portfolio transaction costs.

^ As the share class is not yet launched, the ongoing charges figure is estimated based on the expected annualised total of charges expressed as a percentage of the average net asset value over the same period. This figure may vary from year to year. It excludes portfolio transaction costs.

Dividend Policy: Accumulation (Dividends, if any, will be re-invested into the Fund)
 Net Income distribution (Dividends, if any, will be paid to investors)
 Monthly Distribution-1 (Dividends, if any, will be paid to investors monthly. The SICAV may, at its discretion, pay (a) a portion of dividends out of gross income, (b) a portion of dividends out of capital, and (c) with respect to hedged Monthly Distribution-1 Share classes (if applicable), the interest rate differential between the currency in which the share class is denominated and the base currency of the Fund. The Fund may pay dividends out of capital and/or effectively out of capital and may reduce the net asset value per share of this share class immediately after the monthly distribution date)

¹ This share class will be launched at a later date as the SICAV may determine at its absolute discretion.

What is this product?

Invesco Global Investment Grade Corporate Bond Fund (the "Fund") is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

Objectives and Investment Strategy

The Fund intends to achieve, in the medium to long term, a competitive overall investment return with relative security of capital in comparison to equities.

The Fund will invest at least two thirds of its net asset value in investment grade corporate bonds. The Fund does not target any specific corporations, sectors or industries in its investment.

To achieve the Fund's investment objective and for liquidity management purposes, up to one third of the net asset value of the Fund may be invested in money market instruments and other debt securities not meeting the above requirements. In particular, the Fund may invest up to one third of its net asset value in debt securities which are rated below investment grade (below investment grade is defined as credit rating that is below BBB- from Standard & Poor's and Fitch, or below Baa3 from Moody's or an equivalent rating from an internationally recognised rating agency; securities rated at or above such credit ratings are considered investment grade). While it is not the intention of the Investment Manager to invest in equity securities it is possible that such securities may be held as a result of a corporate action or other conversions.

The Fund may invest in debt instruments with loss-absorption features ("LAP"), including contingent convertible debt securities and debt instruments meeting the qualifying criteria to be Additional Tier 1 Capital or Tier 2 Capital under the Banking (Capital) Rules and debt instruments issued under an equivalent regime of non-Hong Kong jurisdictions, in addition to senior non-preferred debt with a bail-in flag on Bloomberg or any other debt security with a bail-in flag, as classified by Bloomberg. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund's expected maximum investments in LAP will be up to 40% of its net asset value. The Fund may invest up to 20% of its net asset value in contingent convertibles.

The Fund will not hold debt securities with a credit rating of below B- by Standard and Poor's rating agency, or equivalent (or in the case of unrated debt securities (i.e. debt securities which are not rated by any international rating agency such as Moody's, Standard & Poor's and Fitch), determined to be of an equivalent rating). Furthermore, the Fund will not hold securitised debt securities, such as asset-backed securities, rated below investment grade. However, the Fund may invest up to 10% of its net asset value in investment grade securitised debt securities.

The Fund may access China onshore bonds in the China Interbank Bond Market via Bond Connect for less

Invesco Global Investment Grade Corporate Bond Fund

than 10% of its net asset value.

Non-USD investments may be hedged back into USD at the discretion of the Investment Manager.

The Fund may enter into financial derivative instruments for efficient portfolio management, hedging purposes and not extensively for investment purposes. The Fund's use of derivatives may include derivatives on credit, rates and currencies and may be used to achieve both long and short positions, which overall will not result in the Fund being directionally short or short any asset class. In addition, the Fund will not have uncovered short positions, in line with appropriate UCITS regulatory requirements. The long and short active financial derivative positions (including active currency/interest rate/credit) implemented by the Fund may not be correlated with the underlying securities positions held by the Fund (i.e. debt securities).

The expected proportion of the net asset value of the Fund subject to total return swaps is 0%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to total return swaps is 30%.

The Fund will engage in securities lending, however, the proportion lent out at any time will be dependent on dynamics including, but not limited to, ensuring a reasonable rate of return for the lending Fund and borrowing demand in the market. As a result of such requirements, it is possible that no securities are lent out at certain times. The expected proportion of the net asset value of the Fund subject to securities lending is 20%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to securities lending is 29%.

Use of derivatives / investment in derivatives

The Fund's net derivative exposure² may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

- **General investment risk** - There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **Currency exchange risk**
 - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
 - For the hedged share class, there is no guarantee that the exposure of the currency in which the shares are denominated can be fully hedged at all times against the base currency of the Fund or the currency or the currencies in which the assets of the Fund are denominated. Investors should also note that the successful implementation of the strategy may substantially reduce the benefit to shareholders in the relevant class of shares as a result of decreases in the value of the share class currency against the base currency of the Fund. In the event that investors request payment of

² Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

Invesco Global Investment Grade Corporate Bond Fund

redemption proceeds in a currency other than the currency in which the shares are denominated, the exposure of that currency to the currency in which the shares are denominated will not be hedged.

- **Volatility risk** - Investors should note that volatility in the Fund's investment portfolio may result in large fluctuations in the net asset value of the Fund which may adversely affect the net asset value per share of the Fund and investors may as a result suffer losses.
- **Credit risk**
 - Investment in bonds, debt or other fixed income securities (including corporate bonds) are subject to the risk that issuers do not make payments on interest and principal of such securities. An issuer suffering from an adverse change in its financial condition could lower the quality of a security leading to greater price volatility on that security.
 - Securities which were investment grade at the time of acquisition may subsequently be downgraded. The risk of any such downgrading will vary over time. The Fund's investment policy does not specifically require the Fund to sell such securities if they should fall below investment grade. Besides, the Investment Manager and/or Investment Sub- Manager (if applicable) may or may not be able to dispose of the debt instruments that are being downgraded. Investments in below investment grade securities carry a higher risk of default and therefore may adversely impact the Fund and/or the interests of investors.
- **Risk of investing in high yield bonds/non-investment grade bonds and un-rated bonds** - The Fund may invest in high yield bonds/ non-investment grade bonds and un-rated bonds which involve substantial risk. High yield bonds/ non-investment grade bonds and un-rated bonds are regarded as being predominantly speculative as to the issuer's ability to make payments of principal and interest. Issuers of high yield bonds/ non-investment grade bonds and unrated bonds may be highly leveraged, subject to lower liquidity and higher volatility and may not have available to them more traditional methods of financing. An economic recession may adversely affect an issuer's financial condition and the market value of high yield bonds/ non-investment grade bonds and un-rated bonds issued by such entity. High yield bonds/ non-investment grade bonds and un-rated bonds are generally subject to greater loss of principal and interest than high-rated bonds. As such, this may adversely impact the Fund and/or the interests of investors.
- **Interest rate risk** - The bonds or fixed income securities that the Fund invests in may fall in value if the interest rates change and this will adversely impact the net asset value of the Fund. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes.
- **Liquidity risk** - The Fund may be adversely affected by a decrease in market liquidity for the securities in which it invests where some of the Fund's securities may become illiquid and the Fund may experience difficulties in selling securities at a fair price within a timely manner. This could impact the Fund's ability to meet redemption requests on demand.
- **Credit rating risk** - Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.
- **Concentration risk** - As the Fund will invest primarily in investment grade corporate bonds, such concentration may exhibit a higher than usual degree of risk and the Fund may be subject to above average volatility. The diversification benefits that would ordinarily accrue from investment in a fund having a more diverse portfolio of investments, may not apply to this Fund.
- **Risks associated with investments in debt instruments with loss-absorption features (LAP)**
 - Debt instruments with loss-absorption features are subject to greater risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of a pre-defined trigger event(s) (e.g. when the issuer is near or at the point of non-viability or when the issuer's capital ratio falls to a specified level), which are likely to be outside of the issuer's control. Such trigger events are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
 - In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with LAP may also be exposed to liquidity, valuation and sector concentration risk.

Invesco Global Investment Grade Corporate Bond Fund

- The Fund may invest in contingent convertible debt securities, commonly known as CoCos, which are highly complex and are of high risk. Upon the occurrence of the trigger event, CoCos may be converted into shares of the issuer (potentially at a discounted price), or may be subject to the permanent write-down to zero. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.
- The Fund may invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss of principal invested.
- **Risk of investing in financial derivative instruments ("FDI")** - Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund. As well as the risks identified above, the Fund may use derivatives for investment purposes and may be exposed to additional leveraged risk, which may result in significant fluctuations of the net asset value of the Fund and/or extreme losses where the Investment Manager is not successful in predicting market movements. This in turn may lead to an increase in the risk profile of the Fund.
- **Risks of implementing active FDI positions not correlated with underlying asset of the Fund** - As the active FDI position (including active currency / interest rate / credit positions) implemented by the Fund may not be correlated with the underlying securities positions held by the Fund (i.e. debt securities), the Fund may suffer a significant or total loss even if there is no loss of the value of the underlying securities positions (i.e. debt securities) held by the Fund.
- **Risks associated with payment of dividends and/or fees and expenses out of capital**
 - Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share in respect of such share class after the monthly distribution date.
 - For Monthly Distribution-1 share classes that are currency hedged, the Fund may take into account the return driven by the interest rate differential between the currency in which the hedged Monthly Distribution-1 share class is denominated and the base currency of the Fund in determining the distribution to be paid. Investors should be aware that the uncertainty of relative interest rates which will have an impact on the return of the hedged Monthly Distribution-1 share class. The net asset value of the Monthly Distribution-1 hedged share class may fluctuate and may significantly differ from other share class due to the fluctuation of the interest rate differential between the currency in which the hedged Monthly Distribution-1 share class is denominated and the base currency of the Fund, and may result in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share class. Investors in such share class may therefore be adversely affected.
- **RMB currency and conversion risks of RMB hedged share classes**
 - RMB is currently not freely convertible and is subject to exchange controls and restrictions.
 - Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Fund.
 - The exchange rate used for RMB denominated share classes is offshore RMB (CNH). Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
 - Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

Invesco Global Investment Grade Corporate Bond Fund

How has the Fund performed?

- The Fund Manager views Class A accumulation - USD (the "Share Class"), being the focus share class of the Fund available to the public of Hong Kong, as the most appropriate representative share class.
- Fund launch date: 1 September 2009.
- Share Class launch date: 20 May 2015.
- The base currency of the Fund is USD.
- Past performance of the Share Class is calculated in USD.
- Performance is calculated after deduction of ongoing charges and is inclusive of gross income reinvested. Any entry/exit charges shown are excluded from the calculation.
- Past performance is not a guide to future performance.
- Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown.
- Where no past performance is shown, there was insufficient data available in that year to provide performance.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund.

Fee	What you pay
