The ongoing charges figure is calculated based on expenses for the year ended at 31 December 2021. This figure may vary from year to year. The ongoing charge is calculated by adding all direct fees, indirect fees and external fees of the sub-fund and then divided by the average net assets. Direct fees refer to charges and payment directly borne by the sub-fund such as operating costs, remuneration and payment to key operators and service providers. Indirect fees refer to the ongoing charges of the underlying funds which the sub-fund invests. External fees refer to any remuneration of the management company or other party that derives from fee-sharing arrangement.

What is this product?

This sub-fund is a fund constituted in the form of a mutual fund. It is incorporated under Luxembourg law and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objective and Investment Strategy

Objective

To increase the value of its assets over the medium term by investing primarily in US mid cap equities.

Strategy

At all times, this sub-fund invests at least 75% of its assets in equities and/or equity equivalent securities (such as participation rights, which refer to equity instruments like bonus right and/or subscription rights (which may result from a corporate action)) issued by companies having market capitalisation below the highest market capitalisation and/or above the lowest market capitalisation (observed at the beginning of each financial year) of the Russell MidCap index and that have their registered office or conduct a significant proportion of their business in the United States of America.

The remaining portion, namely a maximum of 25% of its assets, may be invested in any other securities, money market instruments and/or cash, provided that investments in debt securities of any kind do not exceed 15% of its assets, and up to 10% of its assets may be invested in collective investment schemes.

The Investment Manager applies BNP PARIBAS ASSET MANAGEMENT's Sustainable Investment Policy, which takes into account Environmental, Social and Governance criteria in the investment process of the sub-fund.

The sub-fund may invest in sovereign debt securities but it does not contemplate to invest more than 10% of its net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade and/or unrated.

Use of Derivatives/Investment in Derivatives

The sub-fund's net derivative exposure may be up to 50% of the sub-fund's NAV.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Mid-Cap Risk

- The sub-fund invests in mid-cap companies and is likely to be subject to a higher than average volatility due to a high degree of concentration and greater uncertainty due to less liquidity, or greater sensitivity to changes in market conditions. Smaller companies may be unable to generate new funds to support their growth and development, lacking vision in management, or developing products for new and uncertain markets. The value of investments of the sub-fund may go down.

Geographical Concentration Risk

- The sub-fund investments are concentrated in the United States of America. This may result in greater volatility than funds which comprise broad-based global investments. The sub-fund may be more susceptible to adverse fluctuations in value resulting from adverse condition in the United States of America and the sub-fund's value may be adversely affected.

Risk linked to Equity Market

- Investments in equity include significant fluctuations in prices, negative information about the issuer or market. Moreover, these fluctuations are often amplified in the short term and may have a negative impact on the performance of the overall portfolio at a given time. There is no guarantee that investors will see an appreciation in value. The value of investments of the sub-fund may go down and it is possible that investors will not recover their initial investment.

Risk associated with investments in financial derivative instruments

- Risk associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instruments by the sub-fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the sub-fund.

Liquidity Risk

- Investments made by the sub-fund may become illiquid. It may not be possible to sell or buy these investments quickly enough to prevent or minimize a loss in the sub-fund.

Currency Exchange Risk

- The sub-fund may hold assets denominated in currencies that differ from the base currency, and may be affected by exchange rate fluctuations between the base currency and the other currencies and by changes in exchange rate controls. A depreciation of the denomination currency will lead to a depreciation in the exchange value of the security. When the manager is willing to hedge the currency exchange risk of a transaction, there is no guarantee that such operation will be completely effective and sub-fund's value may be adversely affected.

Risk in connection with Dividend Payment

- The Management Company may at its discretion pay dividends out of the capital of the sub-fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the sub-fund's capital may result in an immediate reduction of net asset value per share. The Management Company may amend the dividend policy subject to the SFC's prior approval and by giving not less than one month's notice to investors.

Investment Risk

- When investing in a fund, there is a risk that the final outcome may deviate from the initial expectations. The sub-fund's investment portfolio may fall in value and therefore may suffer losses. In addition, there is no guarantee of principal repayment.

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- Classic Capitalisation, being a share class with the same reference currency as the sub-fund with the longest track record among all share classes and not restricted to certain types of clients, is selected as the representative share class.
- These figures show by how much the Classic Capitalisation share class increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- BNP Paribas Funds US Mid Cap launch date: 27 January 2006
- Classic Capitalisation share class launch date: 31 January 2006
