Administration Units	USD 500,000	Nil
Savings Units	Nil	USD 1,000
The Manager has discretion to accept subscriptions for lower amounts than specified above.		

### What is this product?

Fidelity Advantage Portfolio Fund is a unit trust constituted by the Trust Deed and governed by Hong Kong law. The fund is a fund of funds that invests in the funds managed by the Fidelity Organisation.

### Objectives and Investment Policy

- The fund aims to achieve long-term capital growth in US dollar terms for investors including savings plans and retirement benefits schemes.
- The fund will be exposed primarily to global equity and bond markets with a bias towards Hong Kong.
- The fund will invest primarily in money market funds and global bond funds with the aim of achieving a stable level of return, minimising volatility whilst achieving some capital appreciation at low risk.
- The fund (via its investments in the underlying funds) will invest around 30% of its latest available net asset value in equities, 60% in bonds and 10% in cash.<sup>#</sup>
- As the fund may invest globally, it may be exposed to countries/regions considered to be emerging markets.
- The fund is a fund of funds and may invest up to 75% of its latest available net asset value in the Fidelity Global Investment Fund – Global Bond Fund. The Fidelity Global Investment Fund – Global Bond Fund aims to produce returns that are related to those achieved on the major bond market indices by focusing investment (i.e. at least 70% of its net asset value) in debt securities (including but are not limited to convertible bonds, corporate bonds and government bonds) globally (including emerging markets). Save as aforesaid, the value of the fund's holding of interests in any one fund would not exceed 30% of its net asset value.

<sup>#</sup> Investors should note that this is an indicative portfolio distribution as at the date hereof only, and the actual asset allocations will at times vary considerably as market, political, structural, economic and other conditions change and subject to the views of the Investment Manager.

## Use of derivatives

The fund's net derivative exposure may be up to 50% of the fund's net asset value.

## What are the key risks?

**Investment involves risks. Please refer to the Explanatory Memorandum for details including the risk factors. Where applicable, reference to the fund in this section includes reference to the underlying funds.**

### Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations (increase or decrease) in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

### Risks of investing in other collective investment schemes/funds

The fund by investing in other funds is subject to the following risks associated with the underlying funds:

- The fund does not have control of the investments of the underlying funds and there is no assurance that the investment objective and strategy of the underlying funds will be successfully achieved. This may have a negative impact to the net asset value of the fund.
- There may be additional costs involved when investing into the underlying funds. There is also no guarantee that the underlying funds will always have sufficient liquidity to meet the fund's redemption requests as and when made.

### Asset Allocation – Dynamic Risk

- The fund may periodically change its allocation across asset classes and therefore may incur greater transaction costs than a fund with static allocation strategy. It may not achieve the desired results under all circumstances and market conditions.

### Foreign Currency Risk

- The fund's assets may be denominated in currencies other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund's net asset value.

### Equities

- The fund's investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

### Bonds and Other Debt Instruments

- The value of bonds or other debt instruments will fluctuate depending on e.g. market interest rates, the credit quality of the issuer, the currency of the investment (when it is different from the base currency of the fund) and liquidity considerations. In general, the prices of debt instruments rise when interest rates fall, whilst their prices fall when interest rates rise.

#### *Downgrading risk*

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager of the underlying funds may or may not be able to dispose of the debt instruments that are being downgraded.

#### *Credit/Default risk*

- Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or are otherwise unable to pay interest or principal (default). Credit risk also arises from the uncertainty about the ultimate repayment of principal and interest from bond or other debt instrument investments by the issuers of such securities. In both cases the entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default.

#### *Credit rating risk*

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

### Sovereign Debt Risk

- The fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the fund to participate in restructuring such debts. The fund may suffer significant losses when there is a default of sovereign debt issuers.

### Risk relating to Multi-Asset Investment

- Multi-asset fund is subject to the risks inherent in individual asset classes to a degree that depends on the exposure over time, the overall risk also depends on the correlation of returns between each asset class and hence could be adversely affected by a change in those correlations which could result in higher volatility and/or lower diversification.

## Fidelity Advantage Portfolio Fund – Capital Stable Fund

### Valuation Risk

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

### Financial Derivative Instruments

- Although the fund will not use derivatives for investment purposes, the use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

### How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Ordinary Units increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fees and realisation fees you might have to pay.
- Fund launch date: 1995
- Ordinary Units launch date: 1995
- The Investment Manager views Ordinary Units, having the longest track record and denominated in the fund's base currency, as the most appropriate representative unit class.

### Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

### What are the fees and charges?

#### Charges which may be payable by you

You have to pay the following fees when dealing in units of the fund.

Classes of Units	Subscription Fee	Switching Fee	Realisation Fee
Ordinary	Currently waived	5.0% of issue price of Unit in New Sub-Fund	N/A
Administration	Currently waived	5.0% of issue price of Unit in New Sub-Fund	N/A
Savings	Currently waived	Nil	N/A

#### Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments.

Classes of Units	Investment Management Fee	Trustee Fee	Performance Fee	Administration Fee
Ordinary	0.75% p.a. of net asset value	Currently waived	N/A	N/A
Administration	0.75% p.a. of net asset value	Currently waived	N/A	0.45% p.a. of net asset value attributable to Administration Units
Savings	0.75% p.a. of net asset value	Currently waived	N/A	0.50% p.a. of net asset value attributable to Savings Units

**Other Fees**

You may have to pay other fees when dealing in units of the fund. Any other fees and charges are described in the Explanatory Memorandum. You should note that some fees may be increased, up to a specified permitted maximum, by giving Unitholders at least three months' prior notice. For details, please refer to the Explanatory Memorandum.

**Additional Information**

- You generally buy, redeem or switch units at the fund's next-determined net asset value after your request is received in good order at or before 12.00 noon (Hong Kong time) on a dealing day, being the fund's dealing cut-off time.
- The net asset value of this fund is calculated and the price of units is published each business day. Unit prices of the fund will be published on [www.fidelity.com.hk](http://www.fidelity.com.hk).<sup>1</sup>
- For further information on the past performance of other unit classes offered to Hong Kong investors, please refer to [www.fidelity.com.hk](http://www.fidelity.com.hk).<sup>1</sup>
- Investors may obtain information from Fidelity Investor Hotline at (852) 2629 2629.
