Class A EUR Accumulating (Hedged): 1.48%¹

[#]The ongoing charges figure is expressed as a percentage of the expenses over the average net asset value of the share class for the corresponding period as described below. This figure may vary from year to year.

¹ This figure is based on the expenses for the 12 month period from 1 September 2020 to 31 August 2021 and the average net asset value of the share class for the corresponding period.

Dividend Policy:

For Class A Distributing (M) Share Class – any dividends will be declared and paid monthly

No distributions will be made for Class A Accumulating Share Classes

Minimum Investment:

Class A EUR – EUR 1,000 (Initial)

Class A US\$ – US\$ 1,000 (Initial)

There is no minimum for subsequent investment.

WHAT IS THIS PRODUCT?

Legg Mason Brandywine Global Opportunistic Fixed Income Fund (the “Fund”) is a sub-fund of Legg Mason Global Funds Plc, which is constituted in the form of a mutual fund. It is domiciled in Ireland and its home regulator is Central Bank of Ireland.

OBJECTIVE AND INVESTMENT STRATEGY

Objective: The Fund seeks to maximise total return consisting of income and capital appreciation.

Strategy: The Fund invests at least two-thirds of its net asset value in debt securities that are listed or traded on regulated markets located anywhere in the world, including emerging market countries, as set out in Schedule III of the Base Prospectus, which forms part of the Hong Kong offering document.

The Fund’s investments may include:

- debt securities issued or guaranteed by national governments, their agencies or instrumentalities and political sub-divisions (including inflation-protected securities);
- debt securities of supranational organisations such as freely transferable promissory notes, fixed or floating rate bonds and debentures;
- corporate debt securities of issuers (diversified across a variety of industry sectors, including but not limited to communications, consumer, energy, financial, industrial, technology and utilities, etc.) located in or whose securities are listed

or traded on regulated markets, including freely transferable promissory notes, debentures, fixed or floating rate bonds (including zero coupon bonds), convertible and non-convertible notes, commercial paper, certificates of deposits, and bankers acceptances issued by industrial, utility, finance, commercial banking or bank holding company organisations; and

- mortgage-backed securities (including collateralised debt obligations) and asset-backed securities; preferred shares and other open-ended collective investment schemes that are eligible for investment by the Fund under the UCITS Regulations.

Except to the extent permitted by the UCITS Regulations, the securities in which the Fund will invest will be listed or traded on a regulated market located anywhere in the world, including emerging market countries, and as set out in Schedule III of the Base Prospectus.

The Fund may purchase securities (including high yield debt securities) that at the time of purchase are rated below investment grade (i.e. assigned with a rating by Standard & Poor's, Fitch Ratings or Moody's) or if unrated deemed by the Investment Manager to be of comparable quality, so long as such purchase would not cause more than 35% of the Fund's net asset value to be comprised of investments that are rated below investment grade or if unrated deemed by the Investment Manager to be of comparable credit quality. If the security is unrated by Standard & Poor's, Fitch Ratings and Moody's, the security will be considered unrated.

The Fund may invest up to 30% of its net asset value in loss absorption products, such as contingent convertibles, senior or subordinated debt or senior non-preferred debt that have contingent write down or loss absorption features.

The Fund may invest in securities denominated in local or foreign currency.

The Fund will normally hold a portfolio of debt securities of issuers located in a minimum of six countries. The average weighed duration of the Fund's portfolio generally ranges from 1 to 10 years but for individual markets may be greater or lesser depending on the prospects for lower interest rates and the potential for capital gains.

The Fund may have exposure to Reverse Repurchase agreements (as defined in the Base Prospectus) for efficient portfolio management purposes and subject to the requirements of the Central Bank of Ireland.

USE OF DERIVATIVES/ INVESTMENT IN DERIVATIVES:

The Fund's net derivative exposure¹ may be up to 50% of the Fund's net asset value.

¹ Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **Investment Risk:** The value of investments in the Fund and the income from them can go down as well as up, and investors may not get back the amount originally invested and may suffer a substantial loss to their investments. Past performance is no guide to future returns and may not be repeated. There is no guarantee of the repayment of principal.
- **Downgrading Risk:** The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the Fund may be adversely affected. The manager may or may not be able to dispose of the debt instruments that are being downgraded.
- **Debt Securities Risk:** Investments in debt securities are subject to risks such as credit risk, market risk, liquidity risk, interest rate risk, valuation risk and pricing volatility, which may cause substantial losses to the Fund. The prices of debt securities fluctuate in response to perceptions of the issuer's creditworthiness and also tend to vary inversely with market interest rates. Generally, and in the absence of hedging measures, the longer the average weighted duration of a fund, the greater the sensitivity to interest rates. Investment Grade securities may be subject to the risk of being downgraded to below Investment Grade. Debt securities rated below Investment Grade are deemed by rating agencies to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal and may involve major risk of exposure to adverse conditions.
- **Interest Rate Risk:** The value of debt securities is likely to decline in times of rising interest rates. Conversely, when rates fall, the value of these investments is likely to rise. The longer the time to maturity the greater are such variations.

- **Liquidity Risk:** In certain circumstances it may be difficult to sell the Fund's investments because there may not be enough demand for them in the markets, in which case the Fund may not be able to sell or liquidate such investments or to sell them at a significant discount to the purchase price hence the Fund may suffer a substantial loss.
- **Credit Risk:** The Fund's investment in debt securities expose the Fund to credit risk, i.e. the risk that an issuer of securities will be unable to pay principal and interest when due, or that the value of the security will suffer because investors believe the issuer is less able to pay. Ratings are only the opinions of the agencies issuing them. Such ratings are relative and subjective, and are not absolute standards of quality. The credit rating agency may change their ratings on particular debt securities held by the Fund, and downgrades are likely to adversely affect the price hence the Fund may suffer a substantial loss
- **Risk of Government Securities:** Government-issued debt securities are sensitive to changes in macro policy and associated interest rate trends, political and economic instability, social unrest and potentially default. Not all government debt securities are backed by the full faith and credit of the relevant government. Some are backed only by the credit of the issuing agency, instrumentality or sponsored entity, although they may be implicitly guaranteed by the relevant government. There is a chance of default on all government securities, particularly those not backed by the full faith and credit of the relevant government.
- **Risk related to below investment grade / unrated securities:** Debt securities rated below Investment Grade are deemed by rating agencies to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal and may involve major risk exposures to adverse conditions affecting the issuer. Unrated debt securities are not necessarily of lower quality than rated securities, however, they may not be attractive to as many buyers hence may be less liquid and with higher risks. The Fund may be invested in 'below investment grade' and/or unrated debt securities, which carry a higher degree of pricing volatility, market risk, liquidity risk and default risk than 'investment grade' debt securities. When any such risk materialises, the Fund may suffer a substantial loss.
- **Emerging Markets Risk:** This Fund may have significant exposure in emerging markets which involve increased risks and special considerations not typically associated with investment in more developed markets, including liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility. Emerging market issuers may not be subject to the same accounting, auditing and financial reporting standards as developed countries. Emerging markets may have less reliable custody arrangements than mature markets which may also lead to a higher degree of risk. These factors may adversely affect the value of the securities owned by, hence a substantial loss to, the Fund.
- **Concentration Risk:** This Fund may select fewer securities, countries or regions in which to invest and this concentration carries more risk than funds investing in a larger number of securities, countries or regions. This can increase the volatility of the Fund than that of a fund having a more diverse portfolio of investments and risk of loss to the Fund.
- **Inflation-Protected Securities Risk:** The Fund may invest in inflation-protected securities, whose value generally fluctuates in response to changes to interest rates. If real interest rates rise (i.e. if interest rates rise for reasons other than inflation), the value of the inflation-protected securities in the Fund's portfolio will decline. Moreover, because the principal amount of inflation-protected securities would be adjusted downward during a period of deflation, the Fund will be subject to deflation risk with respect to its investments in these securities. The market for these securities may also be less developed or liquid, and more volatile, than certain other securities markets.
- **Derivatives Risks:** This Fund may use certain types of financial derivative instruments (FDIs). These instruments may involve a higher degree of risk including but not limited to counterparty, volatility, liquidity, leverage and valuation risks, and the Fund may suffer a substantial loss. There is no guarantee that the performance of FDIs will result in a positive effect to the Fund.
- **Currency Risk:** Fluctuations in exchange rates between the currency of the underlying securities and the Fund's base currency may adversely affect the value of an investment and any income derived from it. In addition, the value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the Fund. With respect to any share class with "(Hedged)" in its name, the Fund will attempt to hedge the currency risk between

the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so. The use of share class hedging strategies may substantially limit shareholders in the relevant Hedged Share Class from benefiting if the currency of the Hedged Share Class falls against the base currency and/or the currencies that are significant to the Fund's investment strategy, as applicable. Any hedging transactions, while potentially reducing the currency risks to which the Fund would otherwise be exposed, may involve certain other risks, including the risk of a default by a counterparty, and the risk that the Fund's forecast with respect to currency movements is incorrect. If the abovementioned hedging transactions become ineffective, the Fund may suffer a substantial loss.

- **Hedging Risk:** Any hedging transactions, while potentially reducing the currency risks to which the Fund would otherwise be exposed, may involve certain other risks, including the risk of a default by a counterparty, and the risk that the Fund's forecast with respect to currency movements is incorrect. The Fund may decide not to hedge the currency risk from the underlying securities, or the abovementioned hedging transactions may become ineffective, in both cases the Fund may suffer a substantial loss.
- **Custody and Settlement Risks:** The Fund may invest in markets where custodial and/or settlement systems are not fully developed. Such investments may be subject to additional risks with respect to the safe keeping of assets and making of investments, hence the Fund may suffer a substantial loss.
- **Risk of investing in instruments with loss-absorption features:** The Fund may invest in debt instruments that have contingent write down or loss absorption features. Such instruments may be written-off fully or partially or converted to common stock on the occurrence of a trigger event. These instruments generally absorb losses in a trigger event, for example, where the issuer's capital falls below a certain level, and may be compulsorily redeemed as a result which may be out of the issuer's control. Such trigger events are complex and hard to predict, and may potentially lead to losses to the Fund. The Fund may invest in contingent convertible debt securities, commonly known as CoCos, which are highly complex and are of high risk. Upon the occurrence of the trigger event, CoCos may be converted into shares of the issuer (potentially at a discounted price), or may be subject to the permanent write-down to zero. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time. The Fund may also invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss of principal invested.
- **Mortgage-Backed Securities and Asset-Backed Securities Risk:** The Fund invests in mortgaged-backed securities (including collateralized debt obligations) and asset-backed securities which may be highly illiquid and prone to substantial price volatility. These instruments may be subject to greater credit, liquidity and interest rate risk compared to other debt securities. They are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the returns of the securities.

HOW HAS THE FUND PERFORMED?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Class A US\$ Accumulating* increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Fund launch date: 2010.
- Class A US\$ Accumulating* launch date: 2011.
- The benchmark of the Fund is FTSE World Government Bond Index (USD) (unhedged).

* This share class is a representative share class of the Fund as it represents the total return on the Fund's investment strategy and is one of longest running share class available internationally.

IS THERE ANY GUARANTEE?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund:

Fees in respect of each Class A Share Class	What you pay
Subscription Fee (Initial Sales Charge)	Up to 5.00% of the amount you subscribed
Switching Fee	Not applicable
Redemption Fee	Not applicable

Ongoing fees payable by the Fund

The following expenses will be paid out of the Fund. They affect you because they reduce the return you get on your investments:

Expenses in respect of each Class A Share Class*	Annual rate (as a % of the Fund's NAV)
Management Fee	Up to 1.15%
Combined Administration and Depositary Fee	Up to 0.15%
Performance Fee	Not applicable
Shareholder Servicing Fee	Up to 0.15%

* For Hedged Share Classes, (i) the Currency Administrator is entitled to receive fees for hedging administration services (currently charged at 0.04% per annum of the value of the hedging transactions), which shall be borne exclusively by the relevant Hedged Share Class; and (ii) the Collateral Manager is entitled to receive fees for its collateral management services in relation to currency hedging (such fees not exceeding GBP 340 per month for the Fund), which shall be charged only to the relevant Hedged Share Classes.

Other fees

You may have to pay other fees when dealing in the shares of the Fund.

ADDITIONAL INFORMATION

- You generally buy and redeem shares at the Fund's next-determined net asset value (NAV) after the authorised dealer or sub-distributor receives your request in good order on or before 4:00 p.m. in New York (EST) on any relevant dealing day. Certain dealer or sub-distributors may impose a deadline for receipt of orders that is earlier than this.
- The NAV of this Fund is calculated on each dealing day and published no later than the second business day immediately succeeding each dealing day on www.leggmason.com.hk.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors from our website, www.leggmason.com.hk.
