## **What is this product?**

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

## **Objectives and Investment Strategy**

The Sub-Fund aims to achieve capital growth and provide income over the long term primarily through investment in equities issued by UK companies.

The Sub-Fund will focus on equities believed to offer above average opportunities for total returns.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

The Sub-Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Sub-Fund's objectives. The Sub-Fund uses the FTSE All Share (Total Return) Index for performance comparison. The Sub-Fund does not seek to replicate the index. It will generally hold assets that are components of the index, but not in the same proportions, and it is allowed to hold assets which are not components of the index. The assets of the Sub-Fund therefore may be very different from the index.

The Sub-Fund currently does not intend to enter into any securities lending, repurchase and/or reverse repurchase transactions. The prior approval of the SFC will be sought and at least one month's prior notice would be given to

shareholders should there be a change in such intention.

## Use of derivatives / investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of its net asset value.

## What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **Investment risk** – The underlying investments of the Sub-Fund may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. You may not get back the full amount of money you invest. In addition, the Sub-Fund primarily invests in equities or equity-related securities. Generally, equities or equity-related securities are subject to higher volatility and therefore higher risk of loss, compared to other instruments such as bonds, money markets instruments or bank deposits.
- **Geographical risk** – The Sub-Fund invests in a small number of geographical locations (i.e. UK) which may subject it to greater volatility than a more broadly diversified portfolio. The equity markets in these geographical locations may decline even while broader based equity market indices are rising.
- **Derivatives usage risk** – The Sub-Fund may use derivatives for the purposes of hedging and/or EPM. Investments in derivatives involve additional risks such as leverage risk, counterparty risks, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse situations, the Sub-Fund's use of derivatives may become ineffective in hedging and/or in EPM and the Sub-Fund may suffer significant losses.

## How has the fund performed?
