	1.91% [†]	1.87% [†]	1.83% [†]	
	Class A EUR H Shares	Class C USD Shares	Class C EUR Shares	Class C EUR H Shares
	1.90% [†]	2.35% [†]	2.33% [†]	2.43% [†]
Min. investment*:	Initial		Additional	
Classes A and C Shares (and corresponding H Shares)	USD2,000 EUR2,000 HKD15,000		USD750 EUR750 HKD5,000	

[†] The ongoing charges figure is based on expenses for the half year ended 30 November 2021. This figure may vary from year to year. The ongoing charges figure is an annualized figure based on information from the semi-annual report calculated by adding the applicable charges and payments deducted from the assets of the Portfolio and then dividing by the Portfolio's average Net Asset Value for the fiscal year attributable to the relevant share class.

* Different minimum, additional and maximum investment limits may apply to different classes of shares denominated in different currencies. Investors should refer to the offering document of the Fund for details.

What is this product?

The US Small and Mid-Cap Portfolio (the "Portfolio") is a portfolio of AB SICAV I (the "Fund"), an open-ended investment company with variable capital domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and Investment Strategy

Objectives

The Portfolio's investment objective is to increase the value of your investment over time through capital growth.

Strategy

In actively managing the Portfolio, the Investment Manager uses fundamental research and a proprietary quantitative risk/return model to select securities that appear to be undervalued and to offer attractive shareholder returns (bottom-up approach). The Investment Manager aims to exploit pricing opportunities that arise from investors' overreactions to macroeconomic, market, industry or company changes.

Under normal market conditions, the Portfolio typically invests at least 80%, but never less than two thirds, of its net asset value in equity securities of US small and mid-capitalisation companies. At time of purchase, these companies have a market capitalisation that is within the range of the Russell 2500 Index (or is as large as USD 5 billion, whichever is highest). The Portfolio's investments may include real estate investment funds (REITs).

ALLIANCEBERNSTEIN®

The Portfolio uses derivatives for hedging (reducing risks) and efficient portfolio management.

Under exceptional circumstances (e.g. market crash or major crisis), the Portfolio may be invested temporarily up to 100% in cash, cash equivalents (such as bank deposits, certificates of deposit, commercial paper and treasury bills) and high quality short-term securities for cash flow management. To the extent the Portfolio invests defensively, it may not be pursuing its objective.

Use of derivatives / Investment in derivatives

The Portfolio's net derivative exposure may be up to 50% of the Portfolio's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. General Investment Risk

The Portfolio's investment may fall in value due to any of the key risk factors below and therefore your investment in the Portfolio may suffer losses. There is no guarantee of the repayment of principal.

2. Equities Securities Risk

The Portfolio's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

3. Smaller Capitalisation Companies Risk

Small- and mid-cap stocks may have lower liquidity and their prices are more volatile to adverse economic developments than large-cap stocks—smaller companies generally face higher risks due to their limited product lines, markets and financial resources.

4. Concentration Risk

The Portfolio's investments are concentrated in the US market, specific industry sectors or instruments. The value of such Portfolio may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Portfolio may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the market.

5. Risk in Investing in Financial Derivative Instruments

Risks in investing with financial derivative instruments include counterparty / credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element / component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Portfolio. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Portfolio.

ALLIANCEBERNSTEIN®

How has the Portfolio performed?

The bar chart below shows the past performance of Class A USD Shares, which has been designated as the representative share class by the Management Company as it is a focus share class made available to Hong Kong investors.

Portfolio launch year: 2010

Class A USD Shares launch year: 2010

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much Class A USD Shares have increased or decreased in value during the calendar year being shown.
- Performance data has been calculated in USD including ongoing charges and excluding any subscription fee and redemption fee you might have to pay.
- With effect from 4 May 2020, the benchmark of the Portfolio is Russell 2500 Index.

Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

(Different fee structures apply to different classes of shares. Investors should refer to the offering document of the Fund for details.)

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Portfolio:

Fee	What you pay
Subscription fee (Initial Sales Charge)	Class A Shares (and corresponding H Shares): up to 5% of the purchase price Not applicable to other Share Classes
Switching fee ⁺	Not Applicable
