Dealing frequency:	Daily	Financial year end:	31 August																								
Base currency:	USD																										
Dividend policy: (Class A and D as at the above date)	Non-Distributing Shares: No dividends will be declared or paid ▶ A2, D2 Distributing Shares: Dividends, if declared will be paid in cash or reinvested ▶ Monthly: A3(G) ▶ Quarterly: A5(G)																										

	<p>► Yearly: A4(G) All declared dividends result in an immediate decrease in the Fund's net asset values per share on ex-date, whether paid in cash or reinvested.</p> <p>All distributing share classes in this Fund pay dividends out of gross income while charging all or part of their fees and expenses to capital (i.e. payment of fees and expenses out of capital). This will result in an increase in distributable income available for payment as dividends, and therefore, these share classes may effectively pay dividends out of capital.</p> <p>The Directors may amend the above dividend policy subject to the SFC's prior approval and by giving one month's prior notice to investors.</p>
Minimum investment:	<p>US\$5,000 initial, US\$1,000 additional for Class A Shares US\$100,000 initial, US\$1,000 additional for Class D Shares</p>

What is this product?

Natural Resources Growth & Income Fund (the "Fund") is a sub-fund of BlackRock Global Funds ("BGF"), an open-ended investment company incorporated in Luxembourg. Its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and Investment Strategy

To achieve capital growth and an above average income by investing at least 70% of its total assets in stocks of companies which have the majority of their business in the natural resources sector, such as companies engaged in mining, energy and agriculture.

The Fund may also invest in emerging markets (such as Brazil, South Africa and South Korea).

Subject to applicable regulatory restrictions and internal guidelines, the remaining 30% may be invested in financial instruments of companies or issuers of any size in any sector of the economy globally such as equity securities consistent with the Fund's objective and cash.

The Fund's expected total maximum investment in debt instruments with loss-absorption features, including but not limited to contingent convertible bonds, will be less than 30% of its net asset value. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Use of Derivatives/Investment in Derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. Investment Risks

The Fund is an investment fund. The Fund's investment portfolio may fall in value due to any of the risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Equity Risk

The values of equities fluctuate daily and a Fund investing in equities could incur significant losses. The price of equities can be influenced by many factors at the individual company level, as well as by broader economic and political developments, including changes in investment sentiment, trends in economic growth, inflation and interest rates, issuer-specific factors, corporate earnings reports, demographic trends and catastrophic events.

3. Capital Growth Risks*Risks associated with Income-generating Investment Strategy*

The Fund pursues an investment strategy in order to generate income which may reduce the potential for capital growth and future income of the Fund.

Risks associated with Fees Paid Out of Capital

Any distributions involving payment of dividends out of gross income (i.e. payment of fees and expenses out of capital) (Classes 3(G), 4(G) and 5(G)) amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Whilst all dividends paid result in an immediate reduction of the net asset value per share, these share classes may pay larger dividends (i.e. by paying dividends out of gross income), which may therefore result in a larger reduction in the net asset value per share.

4. Limited Market Sectors Risks

The Fund's investments are concentrated in the natural resources sector. This may subject the Fund to greater volatility and more rapid cyclical changes than more broad-based investments.

5. Currency Risks

The Fund may invest in assets denominated in a currency other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. Changes in exchange rates between such currency and the base currency and changes in exchange rate controls may adversely affect the value of the Fund's assets.

6. Derivatives Risks

Risks associated with derivatives include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the derivative by the Fund. In an adverse situation, if the use of derivatives for hedging and efficient portfolio management becomes ineffective, the Fund may suffer significant losses.

7. Emerging Market Risks

Investment in emerging markets may be subject to a higher than average volatility than more developed markets due to greater political, tax, sustainability related, economic, social, and foreign exchange risks.

The size and trading volume of securities markets in emerging markets may be substantially smaller than developed markets. This may subject the Fund to higher liquidity and volatility risks.

Custody and registration of assets in emerging markets may be less reliable than in developed markets, which may subject the Fund to higher settlement risk.

The Fund may be subject to higher regulatory risks due to low level of regulation, enforcement of regulations and monitoring of investors' activities in emerging markets.

8. Foreign Investments Restrictions Risks

Some countries prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities. The Fund may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the Fund.

9. Small/Mid Cap Companies Risks

Many small/mid cap company stocks trade less frequently and in smaller volume, and may be subject to more abrupt or erratic price movements than stocks of large companies. The securities of small/mid cap companies may also be more sensitive to market changes than the securities of large companies.

10. Liquidity Risks

The size and trading volume of securities in the markets relevant to the Fund may be substantially smaller than developed markets. This may lead to investments in such securities becoming less liquid, making it difficult to dispose of them which may reduce the Fund's returns/lead to losses for investors.

11. Contingent Convertible Bonds Risks

A contingent convertible bond may be converted into the issuer's equity or be partly or wholly written off (a "write-down") if a pre-specified trigger event occurs. Trigger levels differ and the exposure to conversion risk depends on the distance of the capital ratio to the trigger level. In case of conversion into equity, the Fund might be forced to sell these new equity shares. Such a forced sale might have an effect on market liquidity as there may not be sufficient demand for these shares. In the event of a write-down, which may be either temporary or permanent, the Fund may suffer a full, partial or staggered loss of the value of its investment. It might be difficult for the Fund to anticipate the trigger events or how the securities will behave upon conversion.

Investment in contingent convertible bonds may suffer a loss of capital. Further, contingent convertible bonds are usually subordinated to comparable non-convertible securities, and thus are subject to higher risks than other debt securities. Coupon payments on certain contingent convertible bonds may be entirely discretionary and may be cancelled by the issuer, in which event the Fund may experience losses. Investment in contingent convertible bonds may also lead to increased industry concentration risk and thus counterparty risk as such securities are issued by a limited number of banks.

How has the fund performed?

Historic performance to 31 December 2021

**Notes:**

Past performance information is not indicative of future performance. You may not get back the full amount invested. The computation of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested expressed as a % change. These figures show by how much the share class increased or decreased in value during the calendar year shown. Performance data has been calculated in USD, including ongoing charges and taxes and excluding subscription and redemption fees, if applicable. The past performance information reflects the performance of the A2 base currency share class which the Investment Adviser views as the most appropriate representative share class. Please refer to the website www.blackrock.com/hk for performance information regarding other share classes. This website has not been reviewed by the SFC. Where no past performance is shown there was insufficient data available in that year to provide performance.

† The benchmark of the Fund is S&P Global Natural Resources Index.

Fund launch date: 2011

Share class launch date: 2011

Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund:

Fee	What you pay
Subscription Fee (Initial Charge)	Class A and Class D Shares: up to 5% of the price of shares
Switching Fee (Conversion Charge)	Nil [^] , except a delayed Initial Charge of up to 5% of the price of Class A or Class D Shares may be payable upon switching newly acquired Shares in a Reserve Fund into this Fund
Redemption Fee	Nil [^]
Contingent Deferred Sales Charge	Class A and Class D Shares: Nil

[^] A 2% charge on redemptions/conversions may be levied where excessive trading by a shareholder is suspected.
