What is this product?

This fund is a sub-fund of Amundi Funds, a mutual fund domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier.

Objectives and Investment Strategy

To increase the value of your investment.

The fund invests mainly (i.e. at least 50% of net asset value) in equities of companies from anywhere in the world. The fund may invest in a broad range of sectors and industries. The fund is not subject to any limitation on the portion of its net asset value that may be invested in any one country or region or any companies with a particular market capitalisation.

The fund may invest up to 10% of its assets in other UCIs (undertaking for collective investment) and UCITS (undertaking for collective investment in transferable securities).

The fund does not intend to invest more than 10% of the fund's net asset value in securities issued and/or guaranteed by a single sovereign issuer (including its government, a public or local authority of that country) which is below investment grade or unrated.

The fund is actively managed by reference to and seeks to outperform (after applicable fees) the MSCI World Index (the "Benchmark"). The fund is mainly exposed to the issuers of the Benchmark, however, the Benchmark is not used for the purpose of portfolio construction of the fund and the management of the fund is discretionary, and the fund will be exposed to issuers not included in the Benchmark. The fund monitors risk exposure with reference to the Benchmark however the extent of deviation from the Benchmark is expected to be significant.

The fund makes use of financial derivative instruments to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on equities and foreign exchange).

The Investment Manager uses fundamental analysis of individual issuers to identify equities with superior long-term prospects.

Use of derivatives / investment in derivatives

This fund's net derivative exposure may be up to 50% of the fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risk factors.

1. General investment risk: The fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the fund may suffer losses. There is no guarantee of the repayment of principal.

2. Market risk: Value of this fund investments could decrease due to movements in financial markets. The value of the fund can be extremely volatile and could go down substantially within a short period of time. It is possible that your investment value could suffer substantial loss.

3. Exchange risk / Currency risk: The fund may be invested, according to variable proportions and limits, in values and instruments expressed in other currencies than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. The net asset value of the fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

4. Equity market risk: The fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

5. Risk of small and medium companies: The stock of smaller and medium companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger companies in general.

6. Volatility risk: The fund may be exposed to the risk of high market volatility and potential settlement difficulties of certain equity markets. This may result in significant fluctuations in the prices of the securities traded on such markets and thereby adversely affect the value of the fund.

7. Risk associated with regulatory/exchange requirements/policies of certain markets/regions: Securities exchanges in certain countries or regions may have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the fund investing in such markets/regions.

8. Risk attached to the use of financial derivative instruments ("FDI"): Investment in FDI is subject to additional risks, including counterparty and credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI by the fund. In adverse situation, the fund's use of FDI may become ineffective in hedging/investment/efficient portfolio management and the fund may suffer significant losses.

9. Risks related to distribution out of capital: For distribution class, Amundi Funds may at its discretion determine to pay dividends out of income or capital of the fund. In addition, Amundi Funds may at its discretion pay dividends out of gross income while charging / paying all or part of the fund's fees and expenses to the capital of the fund, resulting in an increase in distributable income for the payment of dividends by the fund, in which case, the fund is effectively paying dividends out of capital. Payment of dividends out of capital amounts to a

return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the fund's capital or payment of dividends effectively out of the fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share of the fund.
