WHAT IS THIS PRODUCT?

BNY Mellon Asian Opportunities Fund (the "Fund") is a sub-fund of BNY Mellon Global Funds, plc (the "Company") which is a fund constituted in the form of a mutual fund. It is domiciled in Ireland and its home regulator is Central Bank of Ireland.

OBJECTIVES AND INVESTMENT STRATEGY

OBJECTIVES

To achieve long term capital growth through investment primarily (meaning at least two-thirds of the Fund's assets) in a portfolio of equity and up to one-third of the Fund's assets in a portfolio of equity-related securities of companies located in Asia (excluding Japan) or deriving a preponderant part of their income therefrom.

STRATEGY

The Fund will invest predominantly, meaning at least 75% of the Fund's assets, in a portfolio of equity and up to one-third of the Fund's assets in a portfolio of equity-related securities including convertible bonds (usually unrated), convertible preference shares and warrants (subject to a 10% limit of Net Asset Value of the Fund in the case of warrants) of companies located in Asia (excluding Japan) or deriving a preponderant part of their income from Asia (excluding Japan). Investment may be made in both developed and emerging Asian regions (excluding Japan).

Up to 25% of the Fund's assets may also be invested in equity and equity-related securities of companies neither located in Asia (excluding Japan) nor deriving a preponderant part of their income from Asia (excluding Japan). The Fund may invest less than 30% of its Net Asset Value in A-shares via the Stock Connect, which comprises the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.

The majority of the Fund's investment shall be listed or traded on Eligible Markets located in Asia and the Pacific Region.

In addition, the Sub-Fund will not invest more than 10% of its Net Asset Value in aggregate in collective investment schemes.

The Fund may use financial derivatives instruments ("FDI") for efficient portfolio management purposes. However, FDI are not used extensively or primarily for investment purposes.

USE OF DERIVATIVES / INVESTMENT IN DERIVATIVES

The Fund's net derivative exposure may be up to 50%.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the prospectus for details including the risk factors.

INVESTMENT RISK

The Fund is an investment fund. There is no guarantee of the repayment of principal. The Fund's investment portfolio may fall in value and therefore your investment in the Fund may suffer losses.

CURRENCY RISK

Underlying investments of the Fund may be denominated in currencies other than the base currency of the Fund. The Net Asset Value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

EMERGING MARKET RISK

The Fund may invest in emerging markets. These markets have additional risks due to less developed market infrastructures. These investments may also experience high degree of volatility and fluctuations in their value. Risks include (i) greater risk of expropriation, confiscatory taxation, nationalisation and social, political and economic stability; (ii) the small current size of the markets for securities of emerging markets issuers and the currently low or non-existent volume of trading, resulting in lack of liquidity and in price volatility; (iii) certain national policies which may restrict the Fund's investment opportunities including restrictions on investing in issuers or industries deemed sensitive to relevant national interests; (iv) the absence of developed legal structures governing private or foreign investment and private property; and (v) currency risks/control, settlement risks and custody risks.

DERIVATIVES RISK

Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investments. This could increase the volatility of the Fund's price and cause the Fund to suffer losses.

This Fund may use derivatives for efficient portfolio management (EPM) purposes. EPM restricts the use of derivatives for the reduction of risk, the reduction of cost and the generation of additional capital or income with no or an acceptable low level of risk. This may reduce the opportunity for the Fund to benefit from favourable market movements.

CONCENTRATION RISK

The Fund is managed as a concentrated portfolio due to investment being limited to Asia (excluding Japan) region, giving rise to concentration risk. A fall in the markets of Asia (excluding Japan) region may have a greater impact on the Fund's value and more volatility than if the Fund had a more diversified portfolio. Such geographic concentration may result in the Fund being more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting Asia (excluding Japan) region.

SMALLER COMPANIES RISK

The Fund may invest in smaller companies. Smaller companies may be riskier and less liquid than larger companies. This means that their share prices may be subject to more fluctuations in price, as they are generally more vulnerable to adverse market factors such as unfavourable economic reports, when compared to investment in larger companies.

COUNTERPARTY RISK

The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

HOW HAS THE FUND PERFORMED?

BNY Mellon Asian Opportunities Fund USD A

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.

^ Please note that the current annual rate may be increased with the passing of the majority of shareholder votes at an Extraordinary General Meeting and with the prior regulatory approval.

OTHER FEES

You may have to pay other fees when dealing in the shares of the Fund.

ADDITIONAL INFORMATION

You generally buy and redeem shares at the Fund's next-determined net asset value (NAV) after the Hong Kong Representative (HSBC Institutional Trust Services (Asia) Limited) or the Administrator (BNY Mellon Fund Services (Ireland) Designated Activity

Company) receives your request in good order on or before 5:00 pm Hong Kong time. This may be further extended to 6:00 pm Hong Kong time at the discretion of the Hong Kong Representative to take into account Hong Kong cut-off times during European daylight savings time and/or business contingency measures in place being the dealing cut off time. An earlier cut-off time may be required by different distributors.

The net asset value of this Fund is calculated and the price of shares published on each Valuation Day on BNY Mellon website www.bnymellonim.com (this website has not been reviewed by the SFC and may contain information of funds not authorised by the SFC).

Investors may obtain the past performance information of other share classes offered to Hong Kong investors upon request.

IMPORTANT

If you are in doubt, you should seek professional advice.
