	Class A	USD 2,500	USD 1,000
	Class I	USD 10,000,000	USD 100,000

**What is this product?**

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

## Objectives and investment policy

- The fund aims to provide long term capital growth by investing in a range of global asset classes. The fund will actively allocate to, and within, different asset classes and geographies (including emerging markets) based on their potential to generate capital growth.
- The main asset classes in which the fund will invest include global investment grade bonds, global high yield bonds, global equities, commodities and closed-ended real estate investment trusts (REITs).
- Within the main asset classes listed above the fund may, under normal market conditions, invest up to 100% in fixed income securities (including up to 50% of its net assets in global investment grade bonds, up to 75% in global high yield bonds (which include below investment grade and unrated bonds) and up to 75% in emerging market bonds), up to 100% in global equities, (including up to 75% emerging market equities), up to 15% in Russian securities, up to 50% in commodities (which include gold, metals and oil), and up to 30% in closed-ended REITs. Any commodity exposure for this fund will be obtained through eligible instruments and derivatives such as (but not limited to) units/shares of UCITS or other UCIs, Exchange Traded Funds and commodity index swap transactions.
- For the purpose of the fund, “unrated bond” is defined as a bond which neither the bond itself nor its issuer has a credit rating.
- The closed-ended REITs that the fund may invest in may not be authorised by the Securities and Futures Commission in Hong Kong. The dividend or payout policy of the underlying closed-ended REITs is not representative of the dividend or payout policy of this fund.
- The fund is actively managed and references a composite of 75% MSCI ACWI Index; 25% Bloomberg Global Aggregate Index (the “Index”) for performance comparison only.
- The fund will invest less than 30% of its assets directly and/or indirectly in China A and B Shares and/or onshore China fixed income securities on an aggregated basis. The fund can directly invest in China A Shares and/or onshore China fixed income securities listed or traded on any eligible market in China through the Qualified Foreign Investor (“QFI”) status of FIL Investment Management (Hong Kong) Limited, the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programmes (collectively, “Stock Connect”), the China Interbank Bond Market scheme and/or via any other permissible means available to the fund under prevailing laws and regulations.
- The fund may invest in instruments with loss-absorption features which may include instruments classified as Additional Tier 1/Tier 2 capital instruments, **Contingent Convertible Securities (CoCos)**, non-preferred senior bonds which may also be known as Tier 3 bonds and other instruments eligible to count as loss-absorbing capacity under the resolution regime for financial institution, in compliance with its investment policy and limits. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). In compliance with the requirements and guidance issued by the SFC, such investment will at all times remain below 50% of the fund's net asset value. Less than 30% of the fund's total net assets will be invested in hybrid securities (which are subordinated instruments that have more equity-like features) and CoCos, with less than 20% of the total net assets to be invested in CoCos. For the avoidance of doubt, less than 30% of the fund's net asset value may be invested in each individual type of instruments with loss-absorption features as described above.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.

## Use of derivatives/investment in derivatives

The fund's net derivative exposure may be up to 50% of its net asset value.

## What are the key risks?

**Investment involves risks. Please refer to the Hong Kong Prospectus for details including the risk factors.**

### Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

### Equities

- The fund's investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

### Multi-Asset

- Multi-asset funds invest in multiple asset classes and are being subject to risks inherent in those individual asset classes. The overall risk depends on the correlation of returns between each asset class and could be adversely affected by a change in those correlations which could result in higher volatility and/or lower diversification.

**Risk relating to dynamic asset allocation strategy**

- The investments of the fund may be periodically rebalanced and therefore the fund may incur greater transaction costs than a fund with static allocation strategy.

**Bonds and other Debt Instruments**

- The value of bonds or other debt instruments will fluctuate depending on e.g. market interest rates, the credit quality of the issuer, the currency of the investment (when it is different from the base currency of the fund) and liquidity considerations. In general, the prices of debt instruments rise when interest rates fall, whilst their prices fall when interest rates rise.

**Downgrading risk**

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may or may not be able to dispose of the debt instruments that are being downgraded.

**Credit/Default Risk**

- Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or are otherwise unable to pay interest or principal (default). Credit risk also arises from the uncertainty about the ultimate repayment of principal and interest from bond or other debt instrument investments. In both cases the entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default.

**Credit rating risk**

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

**Valuation Risk**

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

**Risk associated with Debt Securities Rated Below Investment Grade/Unrated Securities and High Yielding Debt Instruments**

- The fund may invest in debt securities rated below investment grade or unrated securities. Such securities are generally subject to lower liquidity, higher volatility, heightened risk of default and loss of principal and interest than higher-rated/lower yielding debt securities.

**Sovereign Debt Risk**

- The fund's investments in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the fund to participate in restructuring such debts. The fund may suffer significant losses when there is a default of sovereign debt issuers.

**Commodities**

- Exposure to commodities involves additional risks than those resulting from more standard asset classes such as equities and may subject the fund to greater volatility than such investments. The value of commodity-linked instruments may be affected by the overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular commodity industry or the production and trading of commodities, such as natural events (e.g. drought, floods, weather, livestock disease), embargoes, tariffs and international economic, political and regulatory developments.

**Risk of investing in CoCos and other instruments with loss-absorption features**

- The fund may invest in instruments with loss-absorption features. Those features have been designed to meet specific regulatory requirements imposed on financial institutions and typically include terms and conditions specifying the instrument is subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of the following: (a) when a financial institution is near or at the point of non-viability; or (b) when the capital ratio of a financial institution falls to a specified level.
- Debt instruments with loss-absorption features are subject to greater capital risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events (such as those disclosed above). Such trigger events are likely to be outside of the issuer's control and are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.
- The fund may invest in CoCos, which are highly complex and are of high risk. CoCos are a form of hybrid debt security with loss-absorption features that are intended to either convert into equity shares of the issuer (potentially at a discounted price) or have their principal written down (including permanently written down to zero) upon the occurrence of certain 'triggers'. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.
- The fund may also invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss principal invested.

### Eurozone Risk

- In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, the fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of the fund.

### Emerging Markets

- The fund invests in emerging market securities which may involve increased risks and special considerations not typically associated with the investment in securities in more developed markets. The price of these securities may be more volatile and/or less liquid than those of securities in more developed markets.
- This volatility or lack of liquidity may stem from political, economic, legal, taxation, settlement, transfer of securities, custody and currency/currency control factors.
- Although care is taken to understand and manage these risks, the fund and accordingly the shareholders in the fund will ultimately bear the risks associated with investing in these markets.

### Foreign Currency Risk

- The fund's assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund's net asset value.

### Financial Derivative Instruments

- The fund's net derivative exposure may be up to 50% of its net asset value. The use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instrument by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

## How has the fund performed?

The performance during the years prior to 2021 was achieved under circumstances that may no longer apply as the investment objective was changed in 2016 and 2021.

\* On 11 July 2016, Fidelity Funds - Fidelity Portfolio Selector Growth Fund (non SFC-authorized) merged into the repurposed Fidelity Funds - SMART Global Moderate Fund, which was renamed as Fidelity Funds - Global Multi Asset Dynamic Fund with effect from 10 March 2021.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- Fund launch date: 1997
- Class A-USD launch date: 1997
- Class A-USD is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund's reference currency.
- The benchmark is a composite of 75% MSCI ACWI Index; 25% Bloomberg Global Aggregate Index.

## Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

## What are the fees and charges?

### Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

<b>Subscription Fee</b>	Class A – Up to 5.25% of NAV Class I – 0%
<b>Switching Fee</b>	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched into
<b>Redemption Fee</b>	N/A

### Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

<b>Management Fee*</b>	Class A – Up to 1.25% p.a. of NAV Class I – Up to 0.63% p.a. of NAV
<b>Depository Fee</b>	Varies from 0.003% to 0.35% of NAV
<b>Performance Fee</b>	N/A
<b>Administration Fee</b>	Up to 0.35% of NAV

\* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

### Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong Prospectus. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong Prospectus.

## Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time on a dealing day, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund (other than Class A) will be published in the South China Morning Post and the Hong Kong Economic Times. Net asset value of Class A will be published on [www.fidelity.com.hk](http://www.fidelity.com.hk) \*.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from [www.fidelity.com.hk](http://www.fidelity.com.hk) \*.
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
