Financial year end of this fund:	30 April		
Minimum investment:		<u>Initial Investment</u>	<u>Subsequent Investment</u>
	Class A	USD 2,500	USD 1,000
	Class Y	USD 2,500	USD 1,000

What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The fund is a Multi Asset fund and aims to provide income and moderate capital growth over the medium to longer term by actively allocating to, and within, different asset classes including equity, fixed income, commodity, infrastructure, real estate and cash.
- As the fund may invest globally, it may invest across different countries and regions. It is unconstrained in the amount it may invest in any single country or region. The fund may be exposed to countries considered to be emerging markets, including Russia and China.
- The fund is part of the Fidelity Sustainable Family of Funds and adopts a Sustainable Focused strategy (i.e. the fund will actively seek to select companies that are higher sustainability performers relative to peers with reference to MSCI ESG Ratings and Fidelity Sustainability Ratings) under which a minimum of 70% of the fund's net assets will be invested in securities deemed to maintain sustainable characteristics (defined by reference to a combination of different measurements such as ESG* ratings provided by external agencies or Fidelity Sustainability Ratings). The fund will consider a wide range of environmental and social characteristics on an ongoing basis. Environmental characteristics include carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights. Controversies involving environmental and social characteristics are regularly monitored. Environmental and social characteristics are analysed by Fidelity's fundamental analysts and rated through Fidelity Sustainability Ratings. The fund seeks to promote these characteristics by adhering to the Fidelity Sustainable Family Framework.
- The Investment Manager supplements the study of financial results of potential investments with additional qualitative and quantitative non-financial (or non-fundamental) analysis including ESG risks and will factor them into investment decision making and risk monitoring to the extent they represent potential or actual material risks and/or opportunities to maximise long-term risk-adjusted returns.
- "Qualitative assessments" will be by reference, but not limited, to case studies, environmental, social and governance impacts associated with issuers, product safety documents, customer reviews, company visits or data from proprietary models and local intelligence.
- "Quantitative assessments" will be by reference to ESG ratings which may be from external providers including but not limited to MSCI, or an internal rating assigned by the Investment Manager primarily using Fidelity Sustainability Ratings, relevant data in third-party certificates or labels, assessment reports on carbon footprints, or percentage of revenue or profits of issuers generated from ESG-relevant activities. Fidelity Sustainability Ratings is a proprietary rating system developed by Fidelity's research analysts to assess individual issuers. Those ratings score issuers on an A-E scale on sector-specific factors and a trajectory forecast based on an assessment of expected change of an issuer's sustainability characteristics over time. Such ratings are based on fundamental bottom-up research and materiality assessment using criteria specific to the industry of each issuer relevant to material ESG issues.
- ESG ratings and associated ESG data are maintained on a centralised research platform operated by the Investment Manager. The provision and sourcing of ESG data is reviewed on a regular basis to ensure its continuing suitability, adequacy and effectiveness for the ongoing assessment of sustainability risks.
- The fund adheres to an enhanced principle-based exclusion policy incorporating both norms-based screening and negative screening of certain sectors, companies or practices based on specific ESG criteria to be determined by the Investment Manager from time to time. The norms-based screening includes issuers which the Investment Manager considers have failed to conduct their business in accordance with accepted international norms, including as set out in the United Nations Global Compact. The negative screening includes issuers which have exposure, or ties, to: (i) controversial weapons (biological, chemical, incendiary weapons, depleted uranium, non-detectable fragment, blinding lasers, cluster munitions, landmines and nuclear weapons); (ii) the production of conventional weapons (a weapon of warfare which is not nuclear, chemical or biological in nature); (iii) production of semi-automatic firearms intended for sale to civilians or sale of semi-automatic firearms to civilians; (iv) tobacco production retailing, distribution and licensing; and (v) thermal coal extraction and power generation provided that such will be permitted issuers where the revenue share from renewable energy activities exceeds the revenue share from thermal coal activities or where the issuer has made an effective commitment to a Paris Agreement aligned objective based on approved Science Based Targets or alignment with a Transition Pathway Initiative scenario or a reasonably equivalent public commitment. The Investment Manager may apply revenue thresholds for more refined screens. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices. The Investment Manager has discretion to implement additional sustainable requirements and exclusions having regard to the investment process from time to time.
- A maximum of 30% of the fund's net assets are allowed to invest in issuers that are not deemed to maintain sustainable characteristics, but which demonstrate improving sustainable indicators. Improving sustainable indicators are issuers classified as such through the trajectory outlook of Fidelity Sustainability Ratings or issuers which demonstrate the potential for improvement through the implementation and execution of a formal engagement plan.

* ESG means collectively environment (E), social (S) and governance (G)

- Within the main asset classes described above the fund may, under normal market conditions, invest on a net asset basis:
 - up to 100% in fixed income securities (including up to 100% in investment grade bonds, up to 60% in high yield bonds, up to 50% in government bonds, up to 50% in emerging market bonds and up to 10% in Russian bonds),
 - up to 50% in equities (including up to 50% in emerging market equities and up to 10% in Russian equities),
 - up to 30% in real estate through eligible closed-ended real estate investment trusts (“REITs”),
 - up to 30% in infrastructure securities (e.g. securities related to infrastructure assets including closed end listed vehicles, excluding REITs), and
 - up to 5% in commodities (exposure will be obtained through eligible instruments and derivatives such as (but not limited to) units/shares of UCITS or other UCIs, exchange traded funds and commodity index swap transactions).

In adverse market conditions the fund may hold up to 25% of its net assets in cash or money market instruments (cash and short-term deposits, certificates of deposit and bills, and money market funds).

- The aggregate limit of investment in emerging market equities and bonds is up to 50% of the fund’s net assets.
- To achieve its objective the fund adopts a tactical asset allocation strategy where the fund’s investments may be actively balanced and adjusted. This may result in the fund incurring greater transaction costs than a fund with static allocation strategy.
- The fund will invest less than 30% of its net assets directly and/or indirectly in onshore China A and B Shares and/or onshore China fixed income securities on an aggregated basis. The fund can directly invest in China A Shares and/or onshore China fixed income securities listed or traded on any Eligible Market in China through the Qualified Foreign Investor (“QFI”) status of FIL Investment Management (Hong Kong) Limited and/or through any permissible means available to the fund under prevailing laws and regulations (including through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programmes (collectively, “Stock Connect”), the China Interbank Bond Market scheme or any other eligible means) or indirectly such as by way of access products including, but not limited to, equity linked notes, participation notes, credit-linked notes or funds investing in China A Shares and/or onshore China fixed income securities. Onshore China fixed income securities are listed or traded on any Eligible Market in China, and are issued by a variety of issuers such as government, quasi-government, banks, financial institutions or other corporate entities established or incorporated in China or corporate entities with commercial activities in China. The fund may also invest less than 10% of its net asset value in offshore China fixed income instruments including, but not limited to, dim sum bonds.
- The fund may invest in instruments with loss-absorption features which may include instruments classified as Additional Tier 1/Tier 2 capital instruments, **Contingent Convertible Securities (CoCos)**, non-preferred senior bonds which may also be known as Tier 3 bonds and other instruments eligible to count as loss-absorbing capacity under the resolution regime for financial institution, in compliance with its investment policy and limits. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). In compliance with the requirements and guidance issued by the SFC, such investment will at all times remain below 50% of the fund's net asset value. Less than 30% of the fund’s total net assets will be invested in hybrid securities (which are subordinated instruments that have more equity-like features) and CoCos, with less than 20% of the total net assets to be invested in CoCos. For the avoidance of doubt, less than 30% of the fund’s net asset value may be invested in each individual type of instruments with loss-absorption features as described above.
- The fund may invest up to 10% of its net assets in aggregate in equity linked notes and credit linked notes.
- The fund’s source of income will mainly be generated from dividend payments (from equity securities) and coupon payments (from bond holdings) based on their potential to generate income and capital growth.
- The dividend or payout policy of the underlying closed-ended REITs is not representative of the dividend or payout policy of this fund.
- The fund is actively managed without reference to an index.
- The fund may invest in assets directly or achieve exposure indirectly through other eligible means including financial derivative instruments (“derivatives”). Such derivatives may include over-the-counter and/or exchange traded instruments such as derivatives referencing underlying equity assets (such as futures, contracts for difference, equity swaps, options such as put, calls and warrants) and derivatives referencing underlying fixed income assets or components thereof (such as interest rate or bond futures, options and interest rate, total return or inflation swaps, bond futures, credit default and total return swaps, forwards including non-deliverable forwards and currency swaps). The fund may use derivatives with the aim of risk or cost reduction or to generate additional capital or income (including for investment purposes), in line with the risk profile of the fund.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.

Use of derivatives/investment in derivatives

The fund's net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong Prospectus for details including the risk factors.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Sustainable Investing

- The use of ESG criteria may affect the fund's investment performance and may result in a return that at times compares unfavourably to similar products without such focus. Sustainable characteristics used in the fund's investment policy may result in the fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so and/or selling securities due to their sustainable characteristics when it might be disadvantaged to do so. As such, the application of ESG criteria may restrict the ability of the fund to acquire or dispose of its investments at a price and time that it wishes to do so, and may therefore result in a loss to the fund.
- The ESG characteristics of securities may change over time, which may in some cases require the Investment Manager disposing of such securities when it might be disadvantageous to do so from a financial perspective only. This may lead to a fall in the value of the fund.
- The use of ESG criteria may also result in the fund being concentrated in companies with ESG focus and its value may be volatile when compared to other funds having a more diversified portfolio of investments.
- There is a lack of standardised taxonomy of ESG evaluation methodology and the way in which different ESG funds will apply ESG criteria may vary, as there are not yet commonly agreed principles and metrics for assessing the sustainable characteristics of investments of ESG funds.
- The information and data sources provided by internal research teams and complemented by external ESG rating providers for evaluating sustainable characteristics of the securities may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess a security or issuer.
- Evaluation of sustainable characteristics of the securities and selection of securities may involve the Investment Manager's subjective judgment. As a result, there is a risk that the relevant sustainable characteristics may not be applied correctly or that the fund could have indirect exposure to issuers who do not meet the relevant sustainable characteristics, and sustainable characteristics of a security can change over time.

Risk relating to dynamic asset allocation strategy

- The investments of the fund may be periodically rebalanced and therefore the fund may incur greater transaction costs than a fund with static allocation strategy.

Equities

- The fund's investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

Multi-Asset

- Multi-asset funds invest in multiple asset classes and are being subject to risks inherent in those individual asset classes. The overall risk depends on the correlation of returns between each asset class and could be adversely affected by a change in those correlations which could result in higher volatility and/or lower diversification.

Bonds and other Debt Instruments

- The value of bonds or other debt instruments will fluctuate depending on e.g. market interest rates, the credit quality of the issuer, the currency of the investment (when it is different from the base currency of the fund) and liquidity considerations. In general, the prices of debt instruments rise when interest rates fall, whilst their prices fall when interest rates rise.

Risk associated with Debt Securities Rated Below Investment Grade/Unrated Securities and High Yielding Debt Instruments

- The fund may invest in debt securities rated below investment grade or unrated securities. Such securities are generally subject to lower liquidity, higher volatility, heightened risk of default and loss of principal and interest than higher-rated/lower yielding debt securities.

Downgrading risk

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may or may not be able to dispose of the debt instruments that are being downgraded.

Credit/Default Risk

- Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or are otherwise unable to pay interest or principal (default). Credit risk also arises from the uncertainty about the ultimate repayment of principal and interest from bond or other debt instrument investments. In both cases the entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default.

Sovereign Debt Risk

- The fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the fund to participate in restructuring such debts. The fund may suffer significant losses when there is a default of sovereign debt issuers.

Credit rating risk

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

Valuation Risk

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

Income-producing securities

- Although the fund will generally invest in income-producing securities, it is not guaranteed that all underlying investments will generate income. To the extent that underlying investments of the fund are income producing, higher yields generally mean that there will be (a) reduced potential for capital appreciation for equity securities; and (b) increased potential for capital appreciation and/or depreciation for fixed income securities.

Real Estate related Securities Risk

- The fund may invest in REITs and/or real estate/infrastructure related securities which are generally less liquid and less transparent. The value of real estate/infrastructure related securities (including REITs) fluctuate depending on factors such as economic environment, rental market demand, interest rate changes, political changes, regulatory changes and management of the underlying properties which will potentially lead to declines in property values and hence adversely affect the value of investor investments.

Risk of investing in CoCos and other instruments with loss-absorption features

- The fund may invest in instruments with loss-absorption features. Those features have been designed to meet specific regulatory requirements imposed on financial institutions and typically include terms and conditions specifying the instrument is subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of the following: (a) when a financial institution is near or at the point of non-viability; or (b) when the capital ratio of a financial institution falls to a specified level.
- Debt instruments with loss-absorption features are subject to greater capital risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events (such as those disclosed above). Such trigger events are likely to be outside of the issuer's control and are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.
- The fund may invest in CoCos, which are highly complex and are of high risk. CoCos are a form of hybrid debt security with loss-absorption features that are intended to either convert into equity shares of the issuer (potentially at a discounted price) or have their principal written down (including permanently written down to zero) upon the occurrence of certain 'triggers'. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.
- The fund may also invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss principal invested.

Emerging Markets

- The fund invests in emerging market securities which may involve increased risks and special considerations not typically associated with the investment in securities in more developed markets. The price of these securities may be more volatile and/or less liquid than those of securities in more developed markets.
- This volatility or lack of liquidity may stem from political, economic, legal, taxation, settlement, transfer of securities, custody and currency/currency control factors.
- Although care is taken to understand and manage these risks, the fund and accordingly the shareholders in the fund will ultimately bear the risks associated with investing in these markets.

Eurozone Risk

- In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, the fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of the fund.

Foreign Currency Risk

- The fund's assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund's net asset value.

Financial Derivative Instruments

- The fund's net derivative exposure may be up to 50% of its net asset value. The use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instrument by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

How has the fund performed?

The performance during the years prior to 2021 was achieved under circumstances that may no longer apply as the investment objective was changed in 2021.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- Fund launch date: 2001
- Class A-USD launch date: 2001
- Class A-USD is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund's reference currency.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

Subscription Fee	Class A – Up to 5.25% of NAV Class Y – 0%
Switching Fee	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched into
Redemption Fee	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

Management Fee*	Class A – Up to 1.25% p.a. of NAV Class Y – Up to 0.70% p.a. of NAV
Depository Fee	Varies from 0.003% to 0.35% of NAV
Performance Fee	N/A
Administration Fee	Up to 0.35% of NAV

* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong Prospectus. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong Prospectus.

Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time on a dealing day, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund (other than Class A) will be published in the South China Morning Post and the Hong Kong Economic Times. Net asset value of Class A will be published on www.fidelity.com.hk *.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from www.fidelity.com.hk *.
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
- Additional information is available at <https://www.fidelity.lu/static/luxembourg/media/pdf/downloadmaterial/SFDR-Web-Disclosures-Luxembourg-Retail-ENGLISH.pdf> * in relation to the fund's ESG focus and https://www.fidelity.lu/static/master/media/pdf/esg/fidelity_voting_policy_2021_v17.pdf * in relation to Fidelity's sustainable investing voting principles and guidelines.
