#The ongoing charges figure is calculated based on expenses for the year ended 31 December 2021 and may vary from year to year. More information on charges is available in the Prospectus.

\* Share classes which are marked \* are new. The ongoing charges figure is a best estimate of the ongoing charges based on the information available for the year ended 31 December 2021 in respect of other share classes with a similar fee structure. It represents estimated ongoing expenses over a 12-month period chargeable to the relevant share class expressed as a percentage of the estimated average net asset value of such share class over the same period. The actual figure may be different upon actual operation of the Fund and may vary from year to year.

Min. Investment	Class	Initial Investment	Subsequent Investment
	Class USD A	USD 5,000	No additional investment amount restriction
	Class AUD A (Acc.)	AUD 5,000	No additional investment amount restriction
	Class CAD A (Acc.)	CAD 5,000	No additional investment amount restriction
	Class HKD A (Acc.)	HKD 50,000	No additional investment amount restriction
	Class SGD A (Acc.)	SGD 5,000	No additional investment amount restriction
	Class AUD H (Acc.) (hedged)	AUD 5,000	No additional investment amount restriction
	Class CAD H (Acc.) (hedged)	CAD 5,000	No additional investment amount restriction
	Class SGD H (Acc.) (hedged)	SGD 5,000	No additional investment amount restriction
	Class USD B	USD 10,000	No additional investment amount restriction
	Class USD C	USD 5,000,000	No additional investment amount restriction
<b>Financial year end of this fund</b> 31 December			

## WHAT IS THIS PRODUCT?

BNY Mellon Global Opportunities Fund (the "Fund") is a sub-fund of BNY Mellon Global Funds, plc (the "Company") which is a fund constituted in the form of a mutual fund. It is domiciled in Ireland and its home regulator is Central Bank of Ireland.

## OBJECTIVES AND INVESTMENT STRATEGY

### OBJECTIVES

To achieve long term capital growth through investment primarily, (meaning at least two-thirds of the Fund's assets) in a portfolio of equity and equity-related securities of companies located worldwide, the majority of which shall be listed or traded on Eligible Markets located worldwide.

The Fund has no restrictions as to the proportion allocated to any particular geographical area, sector or type of security.

### STRATEGY

The Fund will invest primarily, meaning at least two-thirds of the Fund's assets, in a portfolio of equity and equity-related securities (including convertible bonds (usually unrated), convertible preference shares and warrants (subject to a 10% limit of Net Asset Value of the Fund in the case of warrants) of companies located worldwide which are listed or traded on Eligible Markets.

Up to one-third of the Fund's assets may be invested in international sovereign, government, supranational agency, corporate, bank and other bonds (including mortgage and corporate bonds) and other debt and debt-related securities (such as debentures, notes (including corporate, sovereign, floating and fixed rate notes with a minimum term of one year or more) or asset and mortgage backed securities, certificates of deposit, commercial paper and American and/or Global Depositary Receipts) listed or traded on Eligible Markets located worldwide. Methods of gaining exposure to Chinese securities may include purchasing China A-shares via the Stock Connect. The Fund may invest up to 10% of its Net Asset Value in China A-shares via the Stock Connect.

The minimum credit rating of the debt and debt-related securities in which the Fund may invest at time of purchase is BBB- (or its equivalent), as rated by Standard & Poor's (or equivalent recognized rating agency). In case of a split rating, the highest rating will be considered. If an instrument is unrated, it must be of equivalent quality as determined by the Investment Manager.

The Fund is a global fund insofar as its investments are not confined or concentrated in any particular geographic region or market and consequently, short term performance may be volatile.

The Fund may use financial derivatives instruments ("FDI") for efficient portfolio management purposes. However, FDI are not used extensively or primarily for investment purposes.

In addition, the Fund will not invest more than 10% of its Net Asset Value in aggregate in collective investment schemes.

## USE OF DERIVATIVES / INVESTMENT IN DERIVATIVES

The Fund's net derivative exposure may be up to 50%.

## WHAT ARE THE KEY RISKS?

**Investment involves risks. Please refer to the prospectus for details including the risk factors.**

### INVESTMENT RISK

The Fund is an investment fund. There is no guarantee of the repayment of principal. The Fund's investment portfolio may fall in value and therefore your investment in the Fund may suffer losses.

### CURRENCY RISK

Underlying investments of the Fund may be denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. The Net Asset Value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

### INTEREST RATE RISK

The Fund may hold fixed interest securities, which are particularly affected by trends in interest rates and inflation. This may affect the capital value of your investment. The value of Shares may be affected by substantial adverse movements in interest rates and inflation. In general, the prices of fixed interest securities rise when interest rates fall, whilst their prices fall when interest rates rise.

### EMERGING MARKET RISK

The Fund may invest in emerging markets. These markets have additional risks due to less developed market infrastructures. These investments may also experience high degree of volatility and fluctuations in their value. Risks include (i) greater risk of expropriation, confiscatory taxation, nationalisation and social, political and economic stability; (ii) the small current size of the markets for securities of emerging markets issuers and the currently low or non-existent volume of trading, resulting in lack of liquidity and in price volatility; (iii) certain national policies which may restrict a Fund's investment opportunities including restrictions on investing in issuers or industries deemed sensitive to relevant national interests; (iv) the absence of developed legal structures governing private or foreign investment and private property, and (v) currency risks/control, settlement risks and custody risks.

### DERIVATIVES RISK

Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investments. This could increase the volatility of the Fund's price and cause the Fund to suffer losses.

This Fund may use derivatives for efficient portfolio management (EPM) purposes. EPM restricts the use of derivatives for the reduction of risk, the reduction of cost and the generation of additional capital or income with no or an acceptable low level of risk. This may reduce the opportunity for the Fund to benefit from favourable market movements.

### CONCENTRATION RISK

A fall in the value of a single investment may have a significant impact on the value of the Fund because it typically invests in a limited number of investments. Accordingly, the value of the Fund may be heavily dependent on the performance of these securities and its performance may be more volatile than that of a fund having a more diversified portfolio of investments.

### SMALLER COMPANIES RISK

The Fund may invest in smaller companies. Smaller companies may be riskier and less liquid than larger companies. This means that their share prices may be subject to more fluctuations in price, as they are generally more vulnerable to adverse market factors such as unfavourable economic reports, when compared to investment in larger companies.

### CREDIT RISK

There can be no assurance that issuers of the securities or other instruments in which the Fund invests will not be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities or instruments or payments due on such securities or instruments.

## UNRATED SECURITIES RISK

The Fund may invest in securities which are unrated. Unrated securities may be less liquid than comparable rated securities and involve the risk that the Investment Manager may not accurately evaluate the security's comparative credit rating. Such securities are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than high-rated debt securities.

### Counterparty Risk

The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

## HOW HAS THE FUND PERFORMED?

### BNY Mellon Global Opportunities Fund USD A

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.

---	---

^ Please note that the current annual rate may be increased with the passing of the majority of shareholder votes at an Extraordinary General Meeting and with the prior regulatory approval.

#### OTHER FEES

You may have to pay other fees when dealing in the shares of the Fund.

### ADDITIONAL INFORMATION

You generally buy and redeem shares at the Fund's next-determined net asset value (NAV) after the Hong Kong Representative (HSBC Institutional Trust Services (Asia) Limited) or the Administrator (BNY Mellon Fund Services (Ireland) Designated Activity Company) receives your request in good order on or before 5:00 pm Hong Kong time. This may be further extended to 6:00 pm Hong Kong time at the discretion of the Hong Kong Representative to take into account Hong Kong cut-off times during European daylight savings time and/or business contingency measures in place being the dealing cut off time. An earlier cut-off time may be required by different distributors.

The net asset value of this Fund is calculated and the price of shares published on each Valuation Day on BNY Mellon website [www.bnymellonim.com](http://www.bnymellonim.com) (this website has not been reviewed by the SFC and may contain information of funds not authorised by the SFC).

Investors may obtain the past performance information of other share classes offered to Hong Kong investors upon request.

### IMPORTANT

If you are in doubt, you should seek professional advice.
