

PRODUCT KEY FACTS

BNP Paribas Funds Sustainable Asia ex-Japan Equity March 2022

- ***This statement provides you with key information about this product.***
- ***This statement is a part of the offering document and should be read in conjunction with the Prospectus, Hong Kong Covering Document and Information for Hong Kong Investors.***
- ***You should not invest in this product based on this statement alone.***

Quick facts

Management Company:	BNP PARIBAS ASSET MANAGEMENT Luxembourg		
Fund Manager:	Internal and/or external delegation to one or more portfolio managers as described in the "General Information" section of the Prospectus and the "Management and Sub-Delegation" section of the Hong Kong Covering Document and Information for Hong Kong Investors		
Custodian:	BNP Paribas Securities Services, Luxembourg Branch		
Ongoing charges over a year#:	Classic		1.98%
Base currency:	USD	Dealing frequency:	Daily
Financial year end of this sub-fund:	31 December	Dividend policy:	Capitalisation shares – No dividend distribution (income, if any, will be reinvested) Distribution shares - Dividend, if declared, will be paid Distributions may be paid out of capital which may result in an immediate reduction of the sub-fund's net asset value per share
	Min. investment:	None	

The ongoing charges figure is calculated based on expenses for the year ended at 31 December 2021. This figure may vary from year to year. The ongoing charge is calculated by adding all direct fees, indirect fees and external fees of the sub-fund and then divided by the average net assets. Direct fees refer to charges and payment directly borne by the sub-fund such as operating costs, remuneration and payment to key operators and service providers. Indirect fees refer to the ongoing charges of the underlying funds which the sub-fund invests. External fees refer to any remuneration of the management company or other party that derives from fee-sharing arrangement.

BNP Paribas Funds Sustainable Asia ex-Japan Equity

What is this product?

This sub-fund is a fund constituted in the form of a mutual fund. It is incorporated under Luxembourg law and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objective and Investment Strategy

Objective

To increase the value of its assets over the medium term by investing primarily in Asian (excluding Japan) equities issued by socially responsible companies.

Strategy

At all times, this sub-fund invests at least 75% of its assets in equities and/or equity equivalent securities (such as participation rights which refer to equity instruments like bonus right and/or subscription rights (which may result from a corporate action)) issued by a limited number of socially responsible companies that have their registered offices or conduct the majority of their business activities in Asia (excluding Japan) and that are characterised by the quality of their financial structure and/or their potential for earnings growth.

Socially responsible companies refers to companies that are expected to work towards high Environmental, Social and Governance (“ESG”) standards including corporate, social and environmental responsibility and environmental sustainability, develop positive relationships with their shareholders, and uphold and support universal human rights.

The remaining portion, namely a maximum of 25% of its assets, may be invested in any other securities (including P-Notes), money market instruments or cash, provided that investments in debt securities of any kind do not exceed 15% of its assets, and up to 10% of its assets may be invested in collective investment schemes.

To further elaborate, in terms of liquidity, while there is no limit on market capitalisation, the portfolio manager would typically filter out any stocks with a market capitalisation less than USD 200 million during the initial screening process. The portfolio manager is cognisant to manage liquidity risk, so the Fund will only invest in liquid stocks due to a concentrated portfolio (less than 50 holdings). The sub-fund will invest in a limited number of securities (about 30 – 50 companies) for which the investment manager has high conviction.

In the respect of the above investments limits, the sub-fund's overall exposure (via both direct and indirect investments) to mainland China securities will not exceed 20% of its assets by investments in “China A-Shares” via the Stock Connect.

The Investment Manager applies BNP PARIBAS ASSET MANAGEMENT's Sustainable Investment Policy as defined in the Prospectus, which takes into account ESG standards and integration in the investment process of the sub-fund.

ESG standards are integrated in the investment process of the sub-fund. The ESG standards comprise 1) the 10 principles of the United Nations Global Compact and OECD Guidelines for Multinational Enterprises and 2) the BNP PARIBAS ASSET MANAGEMENT sector policies.

The United Nations Global Compact is a shared framework, recognized worldwide and applicable to all industry sectors. The 10 principles of the United Nations Global Compact in the areas of human rights, labour standards, environmental stewardship and anti-corruption are integrated in the investment process. Similarly, the OECD Guidelines for Multinational Enterprises set out principles for the responsible business conduct of businesses.

BNP PARIBAS ASSET MANAGEMENT has also defined a series of ESG guidelines relating to investments in sensitive sectors including but not limited to palm oil, wood pulp, mining activities, nuclear, coal-fired power

BNP Paribas Funds Sustainable Asia ex-Japan Equity

generation, tobacco, controversial weapons, unconventional oil and gas and asbestos.

The ESG integration involves the evaluation of the three non-financial indicators below:

- Environmental: such as energy efficiency, reduction of emissions of greenhouse gases, treatment of waste;
- Social: such as respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: such as Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

ESG integration above is reflected in the investment process of the sub-fund by way of ESG scores. The Investment Manager applies a non-financial analysis on a minimum of 90% of the assets of the sub-fund based on the internal proprietary ESG scoring framework. In general, socially responsible companies would have higher ESG score than companies without ESG or sustainability initiatives in the investment universe (i.e. large and mid-cap Asian companies with market capitalization of at least USD 200 million across the main Asian markets).

After eliminating the bottom 20% of the lowest ESG rated securities in the investment universe, a reference ESG score would be calculated from the remaining higher ESG score securities in the reduced investment universe. The portfolio is then constructed so that the average ESG score of the portfolio would be higher than the reference ESG score of the reduced investment universe.

For the avoidance of doubt, the portfolio manager is not restricted to invest only in the reduced investment universe, as long as the portfolio could match the above average ESG score criteria.

The sub-fund would exclude investment in (i) securities issued by companies that violate any of the principles of the United Nations Global Compact or OECD Guidelines for Multinational Enterprises and (ii) securities issued by companies from the sensitive sectors above that do not comply with the guidelines defined by BNP PARIBAS ASSET MANAGEMENT.

The sub-fund may invest in sovereign debt securities but it does not contemplate to invest more than 10% of its net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade and/or unrated.

Use of Derivatives/Investment in Derivatives

The sub-fund's net derivative exposure may be up to 50% of the sub-fund's NAV.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Investment Risk

- When investing in a fund, there is a risk that the final outcome may deviate from the initial expectations. The sub-fund's investment portfolio may fall in value due to any of the key risks below and therefore may suffer losses. In addition, there is no guarantee of principal repayment.

Geographical Concentration Risk

- The sub-fund's investments are concentrated in Asia (excluding Japan). This may result in greater volatility than funds which comprise broad-based global investments. The sub-fund may be more susceptible to adverse fluctuations in value resulting from adverse condition in Asia (excluding Japan) and the sub-fund's value may be adversely affected.

BNP Paribas Funds Sustainable Asia ex-Japan Equity

Portfolio Concentration Risk

- The sub-fund will, whilst respecting diversification principle, invest in a limited number of securities which may result in greater volatility than funds investing in a larger number of securities.

Environmental, Social and Governance Risk

- The use of ESG standards and analysis may affect the sub-fund's investment performance and, as such, the sub-fund may perform differently including underperforming compared to similar funds that do not use such standards.
- The use of ESG criteria may also result in the sub-fund being concentrated in companies with ESG focus and its value maybe more volatile than that of fund having a more diverse portfolio of investment.
- ESG-based exclusionary standards used by the sub-fund may result in the sub-fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities due to their ESG characteristics when it might be disadvantageous to do so.
- In evaluating a security based on ESG standard, the investment manager may use information and data from third party providers, which may be incomplete, inaccurate or unavailable.
- Investment selection of the sub-fund is based on subjective judgement from the investment manager. The investment manager may incorrectly assess the ESG characteristics of a security and may wrongly exclude eligible security.
- Due to the lack of standardized taxonomy, the investment manager may not apply the relevant ESG standards correctly or that the sub-fund could have indirect exposure to security which do not meet the relevant ESG standards used by the sub-fund.
- ESG standard and expectation are evolving. There is a risk of style drift within the investment limits of the sub-fund.

Risk linked to Equity Market

- Investments in equity include significant fluctuations in prices, negative information about the issuer or market. Moreover, these fluctuations are often amplified in the short term and may have a negative impact on the performance of the overall portfolio at a given time. There is no guarantee that investors will see an appreciation in value. Investment in equity is also subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors. The value of investments of the sub-fund may go down and it is possible that investors will not recover their initial investment.

Risk related to Investments in Some Countries

- Investments in some countries (China, India, Indonesia, Japan, Saudi Arabia and Thailand) involve risks linked to the restrictions imposed on foreign investors and counterparties, higher market volatility and the risk of lack of liquidity

Emerging Market Risk

- The sub-fund may invest in emerging markets (examples of emerging countries include China, India, Indonesia, Korea etc.). Investing in emerging markets is likely to be subject to a higher than average volatility, less liquidity and greater sensitivity than investing in more developed markets due to, among other factors, greater uncertainty, greater political, tax, economic, social, foreign exchange, liquidity and regulatory risks. The price fluctuations of the investments are often amplified in the short term and the value of investments of the sub-fund may go down.

Risks related to Stock Connect

- Stock Connect is novel in nature, and will be subject to regulations promulgated by regulatory authorities and implementation rules made by the stock exchanges in the PRC and Hong Kong from time to time. The regulations are untested and there is no certainty as to how they will be applied.
- Stock Connect is subject to quota limitations which may restrict the sub-fund's ability to invest in China A-Shares through Stock Connect on a timely basis, and the sub-fund may not be able to effectively pursue its investment strategies.
- Under the Northbound trading link of the Stock Connect, investors will be able to trade certain eligible stocks listed on the Shanghai Stock Exchange market and the Shenzhen Stock Exchange market. It is expected that the list of eligible securities will be subject to review. If a stock is recalled from the scope of

BNP Paribas Funds Sustainable Asia ex-Japan Equity

eligible securities for trading via Stock Connect, the stock can only be sold and cannot be bought. This may affect the investment portfolio or strategies of investors.

- New regulations may be issued from time to time in connection with operations, legal enforcement and cross-border trades under the Stock Connect. The sub-fund may be adversely affected retrospectively as a result of such changes.
- Where a suspension in the trading through Stock Connect is effected, the sub-fund's ability to access the Mainland China market via the Stock Connect will be adversely affected.

Changes in PRC taxation risk

- Investment in the sub-fund may involve risks due to fiscal measures that the Chinese government could impose on foreign investors. The sub-fund does not make a provision in respect of PRC withholding tax on capital gains derived from direct equity investments in PRC enterprises. In case of any shortfall between the provisions and the actual tax liabilities, which will be debited from the sub-fund's assets, the sub-fund's asset value will be adversely affected. Existing and subsequent investors will be disadvantaged as they will bear for a disproportionately higher amount of tax liabilities as compared to the liability at the time of investment in the sub-fund.

Risk associated with investments in financial derivative instruments

- Risk associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instruments by the sub-fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the sub-fund.

Liquidity Risk

- Investments made by the sub-fund may become illiquid. It may not be possible to sell or buy these investments quickly enough to prevent or minimize a loss in the sub-fund.

Currency Exchange Risk

- A share class may be designed in a currency other than the base currency of the sub-fund. Further, the sub-fund may hold assets denominated in currencies that differ from the base currency of the sub-fund, and may be affected by exchange rate fluctuations between the base currency and the other currencies and by changes in exchange rate controls. A depreciation of the denomination currency will lead to a depreciation in the exchange value of the security. There is no guarantee that the hedging of currency exchange risk (if any) will be completely effective and the value of specific share class or sub-fund may be adversely affected.

Operational & Custody Risk

- Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the sub-fund on such markets could be more risky. In the event of a custodian default, the sub-fund may suffer a delay in recovering its assets, pending the resolution of the relevant default or bankruptcy proceedings.

Risk in connection with Dividend Payment

- The Management Company may at its discretion pay dividends out of the capital of the sub-fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the sub-fund's capital may result in an immediate reduction of the net asset value per share. The Management Company may change the policy in relation to payment of dividends out of capital subject to the SFC's prior approval and by giving not less than one month's notice to investors.

BNP Paribas Funds Sustainable Asia ex-Japan Equity

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- Classic Capitalisation, being a share class with the same reference currency as the sub-fund with the longest track record among all share classes and not restricted to certain types of clients, is selected as the representative share class.
- These figures show by how much the Classic Capitalisation share class increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- The sub-fund changed its investment objective and strategy on 31 January 2022. Prior to this performance of the sub-fund was achieved under circumstances that no longer apply.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- BNP Paribas Funds Sustainable Asia ex-Japan Equity launch date: 21 May 2013
- Classic Capitalisation share class launch date: 21 May 2013
- On 27 May 2013, BNP Paribas Funds Sustainable Asia ex-Japan Equity absorbed a Luxembourg fund which is not authorized by the SFC.
- On 14 June 2019, BNP Paribas Funds Sustainable Asia ex-Japan Equity absorbed two Luxembourg funds which are not authorized by the SFC.

BNP Paribas Funds Sustainable Asia ex-Japan Equity
