# As BNP Paribas Funds Ecosystem Restoration is newly set up, this figure is an annualized figure and is a best estimate only. This figure may vary from year to year and may be different upon actual operation of the sub-fund. The ongoing charge is calculated by adding all direct fees, indirect fees and external fees of the sub-fund and then divided by the average net assets. Direct fees refer to charges and payment directly borne by the sub-fund such as operating costs, remuneration and payment to key operators and service providers. Indirect fees refer to the ongoing charges of the underlying funds which the sub-fund invests. External fees refer to any remuneration of the management company or other party that derives from fee-sharing arrangement.

## What is this product?

This sub-fund is a fund constituted in the form of a mutual fund. It is incorporated under Luxembourg law and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

## Objective and Investment Strategy

### Objective

The sub-fund seeks to increase the value of its assets over the medium term by investing primarily in companies engaging in the restoration and preservation of the world's ecosystems and natural capital.

### Strategy

At all times, the sub-fund invests at least 75% of its assets in equities and/or equity equivalent securities issued by companies globally that conduct a significant part of their business (i.e. at least 20% of the total turnover or capital expenditure) in providing solutions to aquatic, terrestrial, and urban ecosystems through their products, services or processes:

- companies providing solutions to aquatic ecosystem covers ocean and water systems including, but not limited to, water pollution control, water treatment and infrastructure, aquaculture, hydropower, ocean and tidal power and biodegradable packaging.
- companies providing solutions to terrestrial ecosystem covers land, food and forestry including, but not limited to, agricultural technology, sustainable farming, sustainable forestry and plantations as well as alternative meat and dairy products.
- companies providing solutions to urban ecosystem covers sustainable cities and buildings including, but not limited to, environmental services, green building solutions providers, green building equipment and materials, recycling, waste management and alternative transportation. Green building refers to the planning, design, construction and operations of buildings with several environmental considerations including energy use, water use, indoor environmental quality, material selection, and the building's impacts to the environment of the community.

The sub-fund follows a flexible asset allocation policy. Allocation of the sub-fund's investments across the three ecosystem themes may vary significantly from time to time. As a result, the sub-fund's investments may be concentrated in only one or two of the ecosystem themes above.

The sub-fund does not invest in any real estate investment trusts (REITs) or directly own any real estate properties.

The remaining portion, namely a maximum of 25% of its assets, may be invested in any other transferable securities (including participatory notes), money market instruments, and/or cash, and also, within a limit of 15% of the assets, in investment grade debt securities and, within a limit of 10% of the assets, in collective investment schemes.

In respect of the above investments limits, the sub-fund's investments into "China A-Shares" via the Stock Connect may reach up to 20% of its assets.

The Investment Manager applies BNP PARIBAS ASSET MANAGEMENT's Sustainable Investment Policy as defined in the Prospectus, which takes into account Environmental, Social and Governance ("ESG") standards and integration in the investment process of the sub-fund.

ESG standards are integrated in the investment process of the sub-fund. The ESG standards comprise 1) the 10 principles of the United Nations Global Compact and OECD Guidelines for Multinational Enterprises and 2) the BNP PARIBAS ASSET MANAGEMENT sector policies.

The United Nations Global Compact is a shared framework, recognized worldwide and applicable to all industry sectors. The 10 principles of the United Nations Global Compact in the areas of human rights, labour standards, environmental stewardship and anti-corruption are integrated in the investment process. Similarly, the OECD Guidelines for Multinational Enterprises set out principles for the responsible business conduct of businesses.

## BNP Paribas Funds Ecosystem Restoration

BNP PARIBAS ASSET MANAGEMENT has also defined a series of ESG guidelines relating to investments in sensitive sectors including but not limited to palm oil, wood pulp, mining activities, nuclear, coal-fired power generation, tobacco, controversial weapons, unconventional oil and gas and asbestos.

The ESG integration involves the evaluation of the three non- financial indicators below:

- Environmental: such as energy efficiency, reduction of emissions of greenhouse gases, treatment of waste;
- Social: such as respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: such as Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The sub-fund would exclude investment in (i) securities issued by companies that violate any of the principles of the United Nations Global Compact or OECD Guidelines for Multinational Enterprises and (ii) securities issued by companies from the sensitive sectors above that do not comply with the guidelines defined by BNP PARIBAS ASSET MANAGEMENT.

### Use of Derivatives/Investment in Derivatives

The sub-fund's net derivative exposure may be up to 50% of the sub-fund's NAV.

### What are the key risks?

**Investment involves risks. Please refer to the offering document for details including the risk factors.**

#### Investment Risk

- When investing in a fund, there is a risk that the final outcome may deviate from the initial expectations. The sub-fund's investment portfolio may fall in value due to any of the key risks below and therefore may suffer losses. In addition, there is no guarantee of principal repayment.

#### Sector Concentration Risk

- The sub-fund's investments are concentrated in companies engaging in environmental sector of restoration and preservation of the world's ecosystems and natural capital. This may result in greater volatility than funds which comprise broad-based investments. The sub-fund may be more susceptible to adverse fluctuations in value resulting from adverse condition in the environmental sector and the sub-fund's value may be adversely affected.
- The sub-fund may be more susceptible to different environmental factors such as government's decision relating to its environment-related policies, changes in energy prices and the political and economic development of the market in which the issuing company of the securities is active in. Moreover during budget process, environmental projects may be given a lower priority and be delayed. Political forces may put priorities on projects in different sectors such as healthcare, infrastructure and education. The growth outlook of environmental companies may be reduced. The sub-fund's value may be adversely affected.

#### Environmental, Social and Governance Risk

- The use of ESG standards and analysis may affect the sub-fund's investment performance and, as such, the sub-fund may perform differently including underperforming compared to similar funds that do not use such standards.
- The use of ESG criteria may also result in the sub-fund being concentrated in companies with ESG focus and its value maybe more volatile than that of fund having a more diverse portfolio of investment.
- ESG-based exclusionary standards used by the sub-fund may result in the sub-fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities due to their ESG characteristics when it might be disadvantageous to do so.
- In evaluating a security based on ESG standard, the investment manager may use information and data from third party providers, which may be incomplete, inaccurate or unavailable.
- Investment selection of the sub-fund is based on subjective judgement from the investment manager. The

## BNP Paribas Funds Ecosystem Restoration

investment manager may incorrectly assess the ESG characteristics of a security and may wrongly exclude eligible security.

- Due to the lack of standardized taxonomy, the investment manager may not apply the relevant ESG standards correctly or that the sub-fund could have indirect exposure to security which do not meet the relevant ESG standards used by the sub-fund.
- ESG standard and expectation are evolving. There is a risk of style drift within the investment limits of the sub-fund.

### **Risk related to Equity Markets**

- Investments in equity include significant fluctuations in prices, negative information about the issuer or market. Moreover, these fluctuations are often amplified in the short term and may have a negative impact on the performance of the overall portfolio at a given time. There is no guarantee that investors will see an appreciation in value. Investment in equity is also subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors. The value of investments of the sub-fund may go down and it is possible that investors will not recover their initial investment.

### **Currency Exchange Risk**

- A share class may be designed in a currency other than the base currency of the sub-fund. Further, the sub-fund may hold assets denominated in currencies that differ from the base currency of the sub-fund, and may be affected by exchange rate fluctuations between the base currency and the other currencies and by changes in exchange rate controls. A depreciation of the denomination currency will lead to a depreciation in the exchange value of the security. There is no guarantee that the hedging of currency exchange risk (if any) will be completely effective and the value of specific share class or sub-fund may be adversely affected.

### **Risk associated with investments in financial derivative instruments**

- Risk associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instruments by the sub-fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the sub-fund.

### **Risk in connection with Dividend Payment**

- The Management Company may at its discretion pay dividends out of the capital of the sub-fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the sub-fund's capital may result in an immediate reduction of net asset value per share. The Management Company may change the policy in relation to payment of dividends out of capital subject to the SFC's prior approval and by giving not less than one month's notice to investors.

## How has the fund performed?

The sub-fund has been launched for less than one year. There was insufficient data available in that year to provide performance and thus performance information is not shown.

## BNP Paribas Funds Ecosystem Restoration
