Financial year end of this fund:	30 April		
Minimum investment:		<u>Initial Investment</u>	<u>Subsequent Investment</u>
	Class A	USD 2,500	USD 1,000

What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The fund is a Fidelity Lifestyle fund and aims to provide long-term capital growth for Euro investors planning to withdraw substantial portions of their investment in the year 2030.
- The fund will typically invest in a wide range of investments covering markets throughout the world, including emerging markets, and providing exposure to bonds, equities, interest bearing securities and money market securities as well as instruments providing exposure to commodities, in accordance with an asset allocation that will become increasingly conservative as the year 2030 is approached.
- As the fund may invest globally, it may invest across different countries and regions. It is unconstrained in the amount that it may invest in a country or region.
- The Euro to which the name of the fund refers is a currency of reference and not a currency of investments. Accordingly, the fund may also invest its assets in currencies other than the Euro.
- Where initially the fund may be heavily invested in equities, it may also be invested in a more conservative portfolio of bonds, interest bearing debt securities and money market securities throughout the world. The percentage weightings will vary over time as the fund approaches, reaches and passes its target date in 2030.
- The fund is actively managed and references a blend of market indices (each a “Market Index”) in order to set internal guidelines around the weightings allocated to different asset classes. As the fund’s exposure to different asset classes evolves over time in line with the fund’s investment policy, the Market Indices referenced and their weightings will also change accordingly. While the fund may take direct or indirect exposure to the components of the Market Indices, there are no restrictions on the extent to which the fund’s portfolio and performance may deviate from the Market Indices. The Market Indices are represented by a blended index for the purposes of performance comparison. As at 30 June 2021, the Market Indices consist of ICE BofA Euro Large Cap; MSCI Europe (N); MSCI Emerging Markets (N); MSCI World ex Europe (N). Further information on the current list of Market Indices as well as past weightings is available on request.
- The fund may invest in instruments with loss-absorption features which may include instruments classified as Additional Tier 1/Tier 2 capital instruments, **Contingent Convertible Securities (CoCos)**, non-preferred senior bonds which may also be known as Tier 3 bonds and other instruments eligible to count as loss-absorbing capacity under the resolution regime for financial institution, in compliance with its investment policy and limits. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). In compliance with the requirements and guidance issued by the SFC, such investment will at all time remain below 50% of the fund's net asset value. For the avoidance of doubt, less than 30% of the fund’s net asset value may be invested in each individual type of instruments with loss-absorption features as described above.
- The fund may invest in assets directly or achieve exposure indirectly through other eligible means including financial derivative instruments (“derivatives”). Such derivatives may include over-the-counter and/or exchange traded instruments such as futures, contracts for difference, equity swaps, options such as puts, calls and warrants, interest rate or bond futures, swaptions and interest rate, credit default and/or total return or inflation swaps, forwards including non-deliverable forwards and currency swaps. The fund may use derivatives with the aim of risk or cost reduction or to generate additional capital or income (including for investment purposes), in line with the risk profile of the fund.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.

Use of derivatives/investment in derivatives

The fund’s net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong Prospectus for details including the risk factors.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Equities

- The fund's investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

Multi-Asset

- Multi-asset funds invest in multiple asset classes and are being subject to risks inherent in those individual asset classes. The overall risk depends on the correlation of returns between each asset class and could be adversely affected by a change in those correlations which could result in higher volatility and/or lower diversification.

Bonds and other Debt Instruments

- The value of bonds or other debt instruments will fluctuate depending on e.g. market interest rates, the credit quality of the issuer, the currency of the investment (when it is different from the base currency of the fund) and liquidity considerations. In general, the prices of debt instruments rise when interest rates fall, whilst their prices fall when interest rates rise.

Downgrading risk

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may or may not be able to dispose of the debt instruments that are being downgraded.

Credit/Default Risk

- Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or are otherwise unable to pay interest or principal (default). Credit risk also arises from the uncertainty about the ultimate repayment of principal and interest from bond or other debt instrument investments. In both cases the entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default.

Credit rating risk

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

Valuation Risk

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

Risk relating to target date asset allocation strategy

- The performance of the fund is dependent on the outcome of the asset allocation employed by the fund and there is a risk that losses will be realised as the asset allocation changes. While investors will be provided with investment options at the target date, there is no guarantee that the fund will close and so investors may suffer loss after the target date. Investors should not select the fund based solely on their age or retirement date. There is no guarantee that investors will receive the principal invested on the target date.

Risk of investing in CoCos and other instruments with loss-absorption features

- The fund may invest in instruments with loss-absorption features. Those features have been designed to meet specific regulatory requirements imposed on financial institutions and typically include terms and conditions specifying the instrument is subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of the following: (a) when a financial institution is near or at the point of non-viability; or (b) when the capital ratio of a financial institution falls to a specified level.
- Debt instruments with loss-absorption features are subject to greater capital risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events (such as those disclosed above). Such trigger events are likely to be outside of the issuer's control and are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.

- The fund may invest in CoCos, which are highly complex and are of high risk. CoCos are a form of hybrid debt security with loss-absorption features that are intended to either convert into equity shares of the issuer (potentially at a discounted price) or have their principal written down (including permanently written down to zero) upon the occurrence of certain 'triggers'. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.
- The fund may also invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss principal invested.

Eurozone Risk

- In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, the fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of the fund.

Foreign Currency Risk

- The fund's assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund's net asset value.

Financial Derivative Instruments

- The fund's net derivative exposure may be up to 50% of its net asset value. The use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instrument by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

How has the fund performed?

The performance during the years prior to 2012 was achieved under circumstances that may no longer apply as the investment objective was changed in 2007 and in 2012.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-Euro increased or decreased in value during the calendar year being shown. Performance data has been calculated in Euro including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- Fund launch date: 2005
- Class A-Euro launch date: 2005
- Class A-Euro is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund's reference currency.
- As at 30 June 2021, the benchmark is a blend of Market Indices which consist of ICE BofA Euro Large Cap; MSCI Europe (N); MSCI Emerging Markets (N); MSCI World ex Europe (N). Further information on the current list of Market Indices as well as past weightings is available on request.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

Subscription Fee	Class A – Up to 5.25% of NAV
Switching Fee	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched into
Redemption Fee	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

Management Fee*	Class A – Up to 1.50% p.a. of NAV [^]
Depository Fee	Varies from 0.003% to 0.35% of NAV
Performance Fee	N/A
Administration Fee	Up to 0.35% of NAV

* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

[^] The management fee will be reduced to "Up to 1.10%" on 1 January 2023 and reduced further on 1 January 2028 to "Up to 0.85%".

Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong Prospectus. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong Prospectus.

Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time on a dealing day, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund (other than Class A) will be published in the South China Morning Post and the Hong Kong Economic Times. Net asset value of Class A will be published on www.fidelity.com.hk *.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from www.fidelity.com.hk *.
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
