Min. investment*:	Initial		Additional
Classes A, B [•] and C Shares	USD2,000 EUR2,000		USD750 EUR750

[†] The ongoing charges figure is based on expenses for the year ended 31 August 2021. This figure may vary from year to year. The ongoing charges figure is an annual figure calculated by adding the applicable charges and payments deducted from the assets of the Portfolio and then dividing by the Portfolio's average net asset value for the fiscal year attributable to the relevant share class.

[▲] The ongoing charges of this share class have been capped at this figure and, accordingly, the excess over such figure as at the Fund's fiscal year end has been borne by the Management Company.

* Different minimum, additional and maximum investment limits may apply to different classes of shares denominated in different currencies. Investors should refer to the offering document of the Fund for details.

[•] Class B Shares are no longer open for subscription by new and existing investors. However, investors may request the exchange of their holdings of Class B Shares for the same share class of another AB-sponsored Luxembourg-domiciled UCITS fund authorised in Hong Kong for retail distribution or otherwise available through an AB authorised dealer in Hong Kong.

What is this product?

The Global Equity Blend Portfolio (the "Portfolio") is a portfolio of AB FCP I (the "Fund"), a mutual investment fund domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and Investment Strategy

Objectives

The Portfolio seeks to achieve long-term growth of capital by investing in a global portfolio of equity securities.

Strategy

The Portfolio expects to invest at least 90% of its net asset value in equity securities and in no case will the amount invested in such securities be less than two-thirds of the Portfolio's net asset value. Normally, the Portfolio is divided equally among global growth and global value stocks. The Investment Manager will allow the strategy's relative weightings to change in response to markets, but only within carefully constructed ranges. The Portfolio invests in equities from both developed and emerging-market countries; the Portfolio's investments in securities of issuers domiciled in emerging-market countries are not expected to exceed 30% of the Portfolio's net asset value. The Portfolio is not subject to any limitation on the portion of its total assets that may be invested in any one country or region.

Global Equity Blend Portfolio

The Portfolio may use hedging techniques that include the use of exchange-traded and "over the counter" (OTC) derivative instruments, including swaps, options, futures and currency transactions.

The Portfolio is entitled to use financial derivative instruments for hedging, risk management, efficient portfolio management and investment purposes. Efficient portfolio management and hedging techniques may include use of exchange-traded and OTC derivative instruments, including swaps, options, futures and currency transactions.

Under exceptional circumstances (e.g. market crash or major crisis), the Portfolio may be invested temporarily up to 100% of net asset value in liquid assets such as bank deposits, certificate of deposits, commercial paper and treasury bills for cash flow management.

Use of derivatives / Investment in derivatives

The Portfolio's net derivative exposure may be up to 50% of the Portfolio's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. General Investment Risk

The Portfolio's investment may fall in value due to any of the key risk factors below and therefore your investment in the Portfolio may suffer losses. There is no guarantee of the repayment of principal.

2. Equities Securities Risk

The Portfolio's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

3. Turnover Risk

The Portfolio is an actively managed investment fund - a higher rate of portfolio turnover increases brokerage and other expenses, which must be borne by the Portfolio and its investors.

4. Concentration Risk

The Portfolio's investments are concentrated in equity securities. The value of the Portfolio may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Portfolio may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the market.

5. Emerging Markets Risk

The Portfolio will invest in emerging markets, which are subject to higher risks (for example, liquidity risk, currency risk, political risk, regulatory risk, economic risk, legal and taxation risk, settlement risk and custody risk) and higher volatility than developed markets. Fluctuations in currency exchange rates may negatively affect the value of an investment or reduce returns - these risks are magnified in emerging markets.

6. Currency Risk

Underlying investments may be denominated in one or more currencies different from the Portfolio's base currency. Also, a class of shares may be designated in a currency other than the base currency of the Portfolio. This means changes in exchange rate controls, currency movements in such underlying investments and fluctuations in the exchange rates between these currencies and the base currency may significantly and unfavorably affect the net asset value of the Portfolio's shares.

7. Management Risk

The Portfolio may be subject to management risk because it is an actively managed investment fund. The Investment Manager will apply its investment techniques and risk analyses in making investment decisions for the Portfolio, but there can be no guarantee that its decisions will produce the desired results.

8. Risk in Investing in Financial Derivative Instruments

Risks in investing with financial derivative instruments include counterparty / credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element / component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Portfolio. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Portfolio.

How has the Portfolio performed?

The bar chart below shows the past performance of Class A USD Shares, which has been designated as the representative share class by the Management Company as it is a focus share class made available to Hong Kong investors.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much Class A USD Shares have increased or decreased in value during the calendar year being shown.
- Performance data has been calculated in USD including ongoing charges and excluding any subscription fee and redemption fee you might have to pay.
- With effect from 4 May 2020, the benchmark of the Portfolio is MSCI World Index.

Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the amount of money you invest.
