Savings Units	Nil	HKD 8,000
The Manager has discretion to accept subscriptions for lower amounts than specified above.		

What is this product?

Fidelity Advantage Portfolio Fund is a unit trust constituted by the Trust Deed and governed by Hong Kong law. The fund is a feeder fund that invests in the Fidelity Global Investment Fund – Hong Kong Bond Fund.

Objectives and Investment Policy

- The fund aims to achieve long-term capital growth in HK dollar terms for investors including savings plans and retirement benefits schemes.
- The objective of the fund is to produce returns that are related to those achieved on the major bond market indices by investing in world bond markets with a focus on Hong Kong dollar denominated bonds and issuers.
- The fund is a feeder fund that invests in the Fidelity Global Investment Fund – Hong Kong Bond Fund (the “Underlying Fund”). The Underlying Fund focuses investment (i.e. at least 70% of its net asset value) in HK dollar denominated debt securities (including but are not limited to convertible bonds, corporate bonds and government bonds) globally (including emerging markets).
- Subject to the requirements under the Mandatory Provident Fund Schemes (General) Regulation and the requirements and guidance issued by the SFC, the Underlying Fund may invest less than 30% of its net asset value in instruments with loss-absorption features which may include instruments classified as Additional Tier 1, Tier 2 capital instruments or non-preferred senior bonds (which may also be known as Tier 3 bonds) and other instruments eligible to be counted as loss-absorbing capacity under the resolution regime for financial institutions, in compliance with its investment policy and limits. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). However, for the avoidance of doubt, the Underlying Fund will not invest in contingent convertible securities (CoCos).
- The Underlying Fund seeks to minimize currency volatility by implementing a HKD hedged strategy (where investments are made other than in HKD).
- The Underlying Fund intends to limit the volatility of returns in the short term in HK dollar market terms.

Use of derivatives

The fund's net derivative exposure may be up to 50% of the fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Explanatory Memorandum for details including the risk factors. Where applicable, reference to the fund in this section includes reference to the Underlying Fund.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations (increase or decrease) in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Risks of investing in other collective investment schemes/funds

The fund by investing solely in the Underlying Fund is subject to the following risks associated with the Underlying Fund:

- The fund does not have control of the investments of the Underlying Fund and there is no assurance that the investment objective and strategy of the Underlying Fund will be successfully achieved. This may have a negative impact to the net asset value of the fund.
- There may be additional costs involved when investing into the Underlying Fund. There is also no guarantee that the Underlying Fund will always have sufficient liquidity to meet the fund's redemption requests as and when made.

Bonds and Other Debt Instruments

- The value of bonds or other debt instruments will fluctuate depending on e.g. market interest rates, the credit quality of the issuer, the currency of the investment (when it is different from the base currency of the fund) and liquidity considerations. In general, the prices of debt instruments rise when interest rates fall, whilst their prices fall when interest rates rise.

Downgrading risk

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager of the underlying funds may or may not be able to dispose of the debt instruments that are being downgraded.

Credit/Default risk

- Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or are otherwise unable to pay interest or principal (default). Credit risk also arises from the uncertainty about the ultimate repayment of principal and interest from bond or other debt instrument investments by the issuers of such securities. In both cases the entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default.

Credit rating risk

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

Valuation Risk

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

Geographical Concentration

- The fund's investments are concentrated in a single or small number of countries/localities and may have greater exposures to the market, political, policy, foreign exchange, liquidity, tax, legal, regulatory, economic and social risks of those countries/localities, and the value of the fund may be more volatile than a fund which diversifies across a larger number of countries/localities.

Emerging Markets Risks

- The fund invests in emerging market securities which may involve increased risks and special considerations not typically associated with the investment in securities in more developed markets. The price of these securities may be more volatile and/or less liquid than those of securities in more developed markets.
- This volatility or lack of liquidity may stem from political, economic, legal, taxation, settlement, transfer of securities, custody and currency/currency control factors.
- Although care is taken to understand and manage these risks, the fund and accordingly the unitholders in the fund will ultimately bear the risks associated with investing in these markets.

Financial Derivative Instruments

- Although the fund will not use derivatives for investment purposes, the use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Ordinary Units increased or decreased in value during the calendar year being shown. Performance data has been calculated in HKD including ongoing charges and excluding any subscription fees and realisation fees you might have to pay.
- Fund launch date: 2003
- Ordinary Units launch date: 2003
- The Investment Manager views Ordinary Units, having the longest track record and denominated in the fund's base currency, as the most appropriate representative unit class.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in units of the fund.

Classes of Units	Subscription Fee	Switching Fee	Realisation Fee
Ordinary	Currently waived	5.0% of issue price of Unit in New Sub-Fund	N/A
Administration	Currently waived	5.0% of issue price of Unit in New Sub-Fund	N/A
Savings	Currently waived	Nil	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments.

Classes of Units	Investment Management Fee	Trustee Fee	Performance Fee	Administration Fee
Ordinary	0.75% p.a. of net asset value	Currently waived	N/A	N/A
Administration	0.75% p.a. of net asset value	Currently waived	N/A	0.45% p.a. of net asset value attributable to Administration Units
Savings	0.75% p.a. of net asset value	Currently waived	N/A	0.50% p.a. of net asset value attributable to Savings Units

Other Fees

You may have to pay other fees when dealing in units of the fund. Any other fees and charges are described in the Explanatory Memorandum. You should note that some fees may be increased, up to a specified permitted maximum, by giving Unitholders at least three months' prior notice. For details, please refer to the Explanatory Memorandum.

Additional Information

- You generally buy, redeem or switch units at the fund's next-determined net asset value after your request is received in good order at or before 12.00 noon (Hong Kong time) on a dealing day, being the fund's dealing cut-off time.
- The net asset value of this fund is calculated and the price of units is published each business day. Unit prices of the fund will be published on www.fidelity.com.hk.¹
- For further information on the past performance of other unit classes offered to Hong Kong investors, please refer to www.fidelity.com.hk.¹
- Investors may obtain information from Fidelity Investor Hotline at (852) 2629 2629.
