WHAT IS THIS PRODUCT?

The PineBridge Europe Equity Fund is a class of the PineBridge Fund Series, which is constituted in the form of a unit trust domiciled in Hong Kong.

OBJECTIVE AND INVESTMENT STRATEGY

The class seeks to provide capital appreciation through a managed portfolio of shares in European Companies.

“European Companies” shall mean (i) companies domiciled or with their registered office or primary place of business in Europe, (ii) holding companies that are predominantly invested in companies domiciled or with their registered office or primary place of business in Europe, (iii) companies which are listed or to be listed on any approved stock exchange in Europe, or (iv) companies with either the predominant part of their business operations or revenues derived or are expected to be derived from Europe.

This class may invest at least 70% of the total net assets of the class in European equity securities, securities convertible into European equity securities and other investments giving exposure to European equity securities. The equity securities in which the class may invest will include fully paid-up shares, convertible debt securities, depository receipts, other securities that are approved, or are of a kind approved by the Mandatory Provident Fund Schemes Authority (“Authority”) and such other equity securities permissible under the Mandatory Provident Fund Schemes (General) Regulation.

The Manager may invest less than 30% of the total net assets of the class in equity securities listed, issued or giving exposure outside of Europe, and depository receipts or fixed income securities, whether listed, issued or giving exposure within or outside of Europe, as permitted under the General Regulation and the Authority’s Guidelines.

The Manager may, at its discretion, reduce the percentage of the class’ primary investments should the Manager determine, in its opinion, that market or other conditions such as a significant downturn in the European economy or political turmoil in Europe warrant such reduction.

¹ As the sub-class is not yet launched, the ongoing charges figure is based on the estimated expenses for the 12 months ended 31 December 2021 and expressed as a percentage over the estimated average net asset value of the sub-class of Unit for the same period. This figure may change from year to year.

Any remaining assets may be held in cash or invested in other money market instruments such as commercial papers, short-term bonds, treasury bills or money market funds.

The Manager has no intention to prescribe limits in respect of the class' exposure to any particular sectors or industries although the allocation in certain industries or sectors may be relatively significant at particular times, depending on the Manager's assessment at such times. In addition, the class may invest in equity securities issued by companies of any level of capitalisation.

The Manager does not intend to engage in securities lending. Should the Manager decide to engage in securities lending in future, the Manager will seek prior approval of the Securities and Futures Commission ("SFC") and notify the Authority and the unitholders in advance. The Manager may from time to time acquire financial derivative instruments ("FDIs") for hedging purposes in accordance with Schedule 1 to the General Regulation and the Code on Unit Trusts and Mutual Funds.

USE OF DERIVATIVES

The class' net derivative exposure may be up to 50% of its net asset value.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Equity risk

- The class principally invests in equity and equity-related securities and is thus subject to the risks generally associated with equity investment, namely, the market value of the stocks that the class invests in may go down as well as up. Factors affecting the stock values are numerous, including but not limited to changes in investment sentiment, political environment, economic environment, and the business and social conditions in local and global marketplace. Securities exchanges typically have the right to suspend or limit trading in any security traded on the relevant exchange; a suspension will render it impossible to liquidate positions and can thereby expose the class to losses.

Concentration risk

- This class concentrates its investments in equity and equity-related securities of companies related to the economic development and growth of Europe. A concentrated investment strategy may be subject to a greater degree of volatility and risk than a portfolio which is diversified across different geographic regions.
- As the class pursues a concentrated investment strategy, it may be subject to a greater degree of volatility and risk than a fund following a more diversified strategy.

Country selection risk

- The class' performance is often derived from its allocations to certain countries. These allocations may present greater opportunities and potential for capital appreciation, but may subject the class to higher risk of loss.

Eurozone debt crisis and sovereign debt risk

- This class may invest primarily in European countries and in sovereign debt securities, including but not limited to those issued by sovereign/government bodies of countries in the Eurozone. In light of the fiscal conditions and concerns on sovereign debt of certain European countries (in particular, Portugal, Ireland, Italy, Greece, and Spain), the class may be subject to a number of risks (such as higher volatility risk, liquidity risk, currency risk, default risk) arising from a potential crisis in the Eurozone. The crisis could potentially unfold in a number of ways, including but not limited to, credit downgrade of a country, one or several countries exiting the Eurozone, re-introduction of one or more individual currencies within the Eurozone, default of a sovereign within the Eurozone, potential dissolution of the Euro or partial or full break-up of the Eurozone. These potential developments, or market perceptions concerning these and related issues, could adversely affect the value of the Units of the class.

Currency risk

- The class may invest in holdings denominated in other currencies and therefore be exposed to currency movements, which may cause the value of the investments of the class to diminish or increase.

Investment risk

- Investments are subject to the risks inherent in all securities. The value of holdings may rise as well as fall.
- All financial markets and therefore the value of the class may at times be adversely affected by changes in political, economical and social conditions and policies.

Risk of using FDIs for hedging purposes

- The use of FDIs may limit potential gains or be ineffective in hedging the risk exposure of this class and may result in significant losses. The use of FDIs may expose this class to various types of risk, including but not limited to, counterparty,

liquidity, correlation, credit, volatility, valuation and settlement risks which may have an adverse effect on the net asset value of this class.

HOW HAS THE CLASS PERFORMED?

- No units of Standard Units – Accumulation were issued as of 31 December 2021.

IS THERE ANY GUARANTEE?

This class does not have any guarantee. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES?

Charges which may be payable by you

You may have to pay the following fees when dealing in the units of the class.

Fee (applicable to Standard Units – Accumulation)	What you pay
Subscription fee (sales charge)	Up to 6.00% of the net asset value of the amount you buy
Switching fee	Up to 1.00% of the net asset value of the units switched
Redemption fee	Not Applicable

Ongoing fees payable by the class

The following expenses will be paid out of the class. They affect you because they reduce the return you get on your investments.

Fee (applicable to Standard Units Accumulation)	Annual rate (as a % of the class' net asset value)
Management fee	Up to 1.50%
Custodian fee	Up to 0.50%
Performance fee	Not Applicable
Administration fee	US\$1,000 per month in respect of the whole class
Trustee fee	Up to 0.05%

Other fees

You may have to pay other fees when dealing in the units of the class.

ADDITIONAL INFORMATION

- You generally buy and redeem units at the class' next-determined issue price and redemption price after the Application and Redemption Agent (Citicorp Financial Services Limited) receives your request in good order on or before 5:00pm (Hong Kong time) on the relevant dealing day, which is generally every bank business day. Before placing your subscription or redemption orders, please check with your distributor (if different from the Application and Redemption Agent) for the distributor's internal dealing cut-off time (which may be earlier than the Application and Redemption Agent's dealing cut-off time).
- The net asset value of this class is generally calculated on each bank business day and the net asset value per Standard Units - Accumulation in the class will be published on each bank business day at www.pinebridge.com.hk*
