What is this product?

T. Rowe Price Funds SICAV – US Blue Chip Equity Fund (the “**Sub-Fund**”) is an open-ended investment company incorporated under Luxembourg law and regulated by the Commission de Surveillance du Secteur Financier.

Objective and Investment Policy

Objective

The objective of the Sub-Fund is to increase the value of its shares, over the long term, through growth in the value of its investments.

Investment Policy

The Sub-Fund is actively managed and invests mainly in a diversified portfolio of shares of large and medium sized “blue chip” companies in the United States.

Specifically, the Sub-Fund invests at least 70% of its net asset value in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there, that have a market capitalisation equal to or greater than the smallest company (by market capitalization) in the Russell Mid-cap Index or S&P Mid-cap 400 Index, and that have a leading market position, seasoned management and strong financial fundamentals. Types of securities may include common share, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

The Sub-Fund may use derivatives for hedging and efficient portfolio management.

The Investment Manager’s approach is to identify high-quality companies with leading market positions in fertile growth fields; integrate fundamental research with an emphasis on sustainable growth (as opposed to momentum growth); focus on high-quality earnings, strong free cash flow growth, shareholder-oriented management, and rational competitive environments; and avoid overpaying for growth while broadly diversifying the portfolio. The Investment Manager also assesses environmental, social and governance (“ESG”) factors with particular focus on those considered most likely to have a material impact on the performance of the holdings or potential holdings in the Sub-Fund’s portfolio. These ESG factors, which are incorporated into the investment process alongside financials, valuation, macro-economics and other factors, are components of the investment decision. Consequently, ESG factors are not the sole driver of an investment decision but are instead one of several important inputs considered during investment analysis. See the ‘Environmental, Social and Governance (ESG) Investment Policy’ section in the prospectus for more details.

The Sub-Fund is actively managed but may use S&P 500 Index Net 30% Withholding Tax for performance comparison. The Investment Manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark index and has complete freedom to invest in securities that do not form part of the benchmark. However, at times, market conditions may result in the Sub-Fund’s performance being more closely aligned with that of the benchmark index.

For temporary defensive purposes, the Sub-Fund has the flexibility to invest in money market securities up to 100% of its net asset value.

Use of derivatives / investment in derivatives

The Sub-Fund’s net derivative exposure may be up to 50% of the Sub-Fund’s net asset value.

What are the key risks?

Investment involves risks. The following sets out the key risks. Please refer to the offering document for details of other applicable risk factors.

General investment risk

The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

Equity market risk

In general, equities involve higher risks than bonds or money market instruments. Equities investment is subject to market risks, whose value may fluctuate due to factors such as changes in investment sentiment, political and economic news, issuer-specific factors, government policy and market changes. Equities can lose value rapidly and remain at low prices indefinitely. Equities of rapidly growing companies can be highly sensitive to adverse news, because much of their value is based on high expectations for the future. Equities of companies that appear to be priced below their intrinsic value may continue to be undervalued. If a company goes through bankruptcy or a similar financial restructuring, its equities may lose most or all of their value.

Risks associated with depositary receipts

Investment into a given country may be made via direct investments into that market or by depositary receipts traded on other international exchanges. Investments in depositary receipts may be subject to counterparty risk, in which a significant or even total loss might be suffered in the event of the liquidation of the depositary or custodian bank issuing the depositary receipts.

Investments in depositary receipts may also be subject to liquidity risks as depositary receipts are often less liquid than the corresponding underlying securities. Further, holders of depositary receipts are not direct shareholders of the underlying company and generally do not have voting and other shareholder rights.

Geographic concentration risk

As the Sub-Fund invests a large portion of its assets in the United States, its performance will be more strongly affected by any adverse social, political, government policy, foreign exchange, liquidity, tax, legal, regulatory, economic, environmental or market conditions within that area. This can mean higher volatility and risk of loss as compared to a fund that invests more broadly.

Small and mid-capitalisation shares risk

Shares of small and mid-capitalisation companies can be less liquid and more volatile to adverse economic developments than shares of larger companies in general. Small and mid-capitalisation companies often have less financial resources, shorter operating histories and less diverse business lines which as a result can be at greater risk of long-term or permanent business setbacks. Initial public offerings of small and mid-capitalisation companies can be highly volatile and can be hard to evaluate because of a lack of trading history and relative lack of public information.

Style risk

Different investment styles typically go in and out of favour depending on market conditions and investor sentiment. At any given time, for instance, a growth-style portfolio may underperform a value-style portfolio, or vice-versa, and either may at any time underperform the market as a whole.

Derivative risk

Risk associated with derivatives include credit/counterparty risk, liquidity risk, valuation risk, volatility risk and exchange-traded and over-the-counter transaction risk. The leverage element/component

of derivatives can result in a loss significantly greater than the amount invested in the derivatives by the Sub-Fund. Exposure to derivatives may lead to a risk of significant loss by the Sub-Fund.

How has the Sub-Fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend re-invested.
- These figures show by how much Class A increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- The Investment Manager views Class A, being the most appropriate representative share class as this share class has the lowest minimum investment amount, a long track record, is available for investment by Hong Kong retail investors and broadly indicative of the Sub-Fund's performance characteristics.
- The benchmark used for performance comparison is S&P 500 Index Net 30% Withholding Tax.
- Sub-Fund launch date: 06/2001
- Class A launch date: 02/2003

Is there any guarantee?

This Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Sub-Fund.

Fee	What you pay
Subscription fee (Entry Charge)	Class A: Up to 5% of the subscription amount Class Q: Nil
Switching fee	Class A / Class Q: Nil
Redemption fee	Class A / Class Q: Nil

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the net asset value of the relevant share class unless otherwise indicated)
Management fee (Management Co. fee)	Class A: up to 1.50% Class Q: up to 0.65%
Custodian fee (Custodial fee) ^{#2}	Class A / Class Q: up to 0.017%, subject to a minimum of 0.0005%
Performance fee	N/A
Administration fee (Administration agent fee) ^{#2}	Class A / Class Q: up to 0.07%, subject to a minimum of 0.01% or USD 40,000 per sub-fund whichever is higher

^{#2} The total operating and administrative expenses will be subject to a limit of 0.17% of the respective net asset value of Class A and Class Q. Should the actual total operating and administrative costs attributable to the respective share classes exceed the expense limit, the Management Company will bear the excess. If the actual total operating and administrative costs attributable to the respective share classes fall below the limit, only the actual amount incurred will be deducted from the assets of the respective share classes.

Other fees

You may have to pay other fees when dealing in the shares of the Sub-Fund.

Additional Information

- You generally buy, switch or redeem shares at the Sub-Fund's next determined net asset value after your request is received by the Hong Kong Representative in good order on or before 5pm (Hong Kong time) on a dealing day of the Sub-Fund. Please note that if you submit your application through an authorised distributor of the Sub-Fund, such distributor may apply an earlier deadline.
- There may be share classes with various characteristics and investor eligibility requirements within the Sub-Fund. Each class represents a proportional share of the underlying portfolio of the Sub-Fund. Each share class is identified by a basic share class designation (e.g. A). Where appropriate, one or more suffixes may be added to indicate certain characteristics.

- The net asset value of the Sub-Fund is calculated and the price of shares is published each business day in the South China Morning Post and the Hong Kong Economic Times.
- Investors may obtain the past performance information of other share class(es) offered to Hong Kong investors from the Hong Kong Representative upon request.
