PRODUCT KEY FACTS

Fidelity Funds – Asia Pacific Strategic Income Fund

FIL Investment Management (Luxembourg) S.A. (as Management Company) August 2022

This statement provides you with key information about this product.
This statement is part of the Hong Kong Prospectus.
You should not invest in this product based on this statement alone.

Quick facts

Management Company:	FIL Investment Management (Luxembourg) S.A.
Investment Manager:	FIL Fund Management Limited (Bermuda, internal delegation)
Investment Advisor:	Internal and/or external sub-delegation to one or more Investment Advisors as described in "The Investment Manager" section under Part IV of the Hong Kong Prospectus (~Note) ~ Note: The list of all Investment Advisors having managed all or part of the assets of each fund over the last six or twelve months will be published in the annual and semi-annual financial reports.
Depositary:	Brown Brothers Harriman (Luxembourg) S.C.A.
Ongoing charges over a year^:	Class A-ACC-USD: 1.45% Class A-MINCOME(G)-USD (hedged): 1.45% Class A-MINCOME(G)-HKD (hedged): 1.45% Class A-MINCOME(G)-USD: 1.45% Class A-HMDIST(G)-AUD (hedged): 1.45% Class A-MCDIST(G)-USD: 1.45% Class Y-USD: 0.95% ^ Unless otherwise stated, the ongoing charges figure represents the ongoing expenses based on the annual financial report for the year ended 30 April 2022. This figure may vary from year to year.
Dealing frequency:	Daily
Base currency:	USD
Dividend policy*:	Class A-ACC No dividends will be paid for accumulating shares. All interest and other income earned on the investment will be retained in the fund. Class A-MINCOME(G) & Class A-MINCOME(G) (hedged)# Subject to the Board's discretion, dividends will be declared monthly normally on the first business day of each month and will be paid accordingly. The Board expects to recommend distribution of substantially the whole gross investment income amount for most of the time, and distributions may be paid out of capital. Class A-HMDIST(G) (hedged)# Subject to the Board's discretion, dividends will be declared monthly normally on the first business day of each month and will be paid accordingly. Such distributions may include a premium when the interest rate of the hedged currency is higher than the fund's reference currency interest rate and may be discounted when the interest rate of the hedged currency is lower than the fund's reference currency interest rate. The Board expects to recommend distribution of substantially the whole gross Investment income, and may determine the extent dividends may be paid out of realised and unrealised capital gains as well as capital. Class A-MCDIST(G)# Subject to the Board's discretion, dividends will be declared monthly normally on the first business day of each month and will be paid accordingly. The Board expects to recommend distribution of substantially the whole gross investment income, and distributions will also be paid out of capital in order to seek to achieve a distribution percentage higher than that of the MINCOME share class. Class Y Subject to the Board's discretion, dividends will be declared annually normally on the first business day of August and will be paid accordingly.

Investors should note that as fees and expenses may be charged to capital of the fund, this will result in an increase in distributable income for the payment of dividends. The fund may therefore pay dividend directly out of capital and/or effectively out of capital. Such payment of dividends out of capital represents a return or withdrawal of part of the amount originally invested or from any capital gains attributable to the original investment. Such distributions may result in an immediate decrease in the net asset value per Share of the fund.

* Unless otherwise stated, dividends will not be paid out of capital and/or effectively out of capital.

Financial year end of this fund:	30 April		
Minimum investment:		Initial Investment	Subsequent Investment
	Class A	USD 2,500	USD 1,000
	Class Y	USD 2,500	USD 1,000

What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The fund is a Bond fund and seeks to deliver an attractive income and capital appreciation by primarily (i.e. at least 70% of the fund's assets) investing in a broad range of fixed income instruments of issuers in Asia Pacific that have their head office or exercise a majority of their activity in Asia Pacific. This region includes certain countries considered to be emerging markets. The fund will adopt an active asset allocation approach, which may include investment into high yield instruments and emerging markets.
- The fund invests in Asia Pacific and may invest in different countries in this region. It is unconstrained in the amount that it may invest in any country in this region.
- For the remaining assets, the Investment Manager has the freedom to invest outside the fund's principal geographies, market sectors, credit quality, currency or asset classes, as applicable.
- Within the main asset classes of fixed income instruments, the fund may invest up to 100% of its net assets in emerging markets, up to 90% of its net assets in high yield instruments, up to 80% of its net assets in Asia Pacific local currency bonds and up to 50% of its net assets in offshore China fixed income instruments (including, but not limited to, dim sum bonds).
- Investments will not be required to meet minimum credit rating standards. Not all securities will be rated for creditworthiness by an internationally recognized rating agency.
- The Investment Manager is not restricted in its choice of companies either by market sector or industry, and will choose investments largely determined by the availability of attractive investment opportunities.
- The fund will invest up to 50% of its net assets directly and/or indirectly in onshore China fixed income securities, which may include urban investment bonds, asset-backed securities (including asset-backed commercial papers) and bonds which are rated below investment grade* or unrated bonds, on an aggregated basis.
- Urban investment bonds are debt instruments which are issued by Mainland China local government financing vehicles ("LGFVs"). These LGFVs are separate legal entities established by local governments and/or their affiliates to raise financing for public welfare investment or infrastructure projects.
- For the purpose of the fund, "unrated bond" is defined as a bond which neither the bond itself nor its issuer has a credit rating.
- The fund may directly invest in onshore China fixed income securities listed or traded on any Eligible Market in China through the Qualified Foreign Investor ("QFI") status of FIL Investment Management (Hong Kong) Limited and/or through any permissible means available to the fund under prevailing laws and regulations or indirectly by way of access to products or funds investing in fixed income securities listed or traded on any Eligible Market in China. "Eligible Market in China" refers to the Shanghai Stock Exchange, the Shenzhen Stock Exchange or the mainland China interbank bond market, as the case may be. The fund may also have indirect exposures through financial instruments that invest in or are linked to the performance of onshore China fixed income securities, e.g. via credit-linked notes.
- The fund is actively managed without reference to an index.
- The fund may invest in instruments with loss-absorption features which may include instruments classified as Additional Tier 1/Tier 2 capital instruments, **Contingent Convertible Securities (CoCos)**, non-preferred senior bonds which may also be known as Tier 3 bonds and other instruments eligible to count as loss-absorbing capacity under the resolution regime

* As rated by internationally recognised rating agencies.

for financial institution, in compliance with its investment policy and limits. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). In compliance with the requirements and guidance issued by the SFC, such investment will at all times remain below 50% of the fund's net asset value. Less than 30% of the fund's total net assets will be invested in hybrid securities (which are subordinated instruments that have more equity-like features) and CoCos, with less than 20% of the total net assets to be invested in CoCos. For the avoidance of doubt, less than 30% of the fund's net asset value may be invested in each individual type of instruments with loss-absorption features as described above.

- The fund may invest in assets directly or achieve exposure indirectly through other eligible means including financial derivative instruments ("derivatives"). Such derivatives may include over-the-counter and/or exchange traded instruments such as interest rate or bond futures, options, swaptions and interest rate, total return or inflation swaps, credit default and total return swaps, forwards including non-deliverable forwards and currency swaps. The fund may use derivatives with the aim of risk or cost reduction or to generate additional capital or income (including for investment purposes), in line with the risk profile of the fund.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.
- The fund's source of income will mainly be generated from coupon payments from bond holdings.

Use of derivatives/investment in derivatives

The fund's net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong Prospectus for details including the risk factors.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Bonds and other Debt Instruments

- The value of bonds or other debt instruments will fluctuate depending on e.g. market interest rates, the credit quality of the issuer, the currency of the investment (when it is different from the base currency of the fund) and liquidity considerations. In general, the prices of debt instruments rise when interest rates fall, whilst their prices fall when interest rates rise.

Downgrading risk

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may or may not be able to dispose of the debt instruments that are being downgraded.

Credit/Default Risk

- Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or are otherwise unable to pay interest or principal (default). Credit risk also arises from the uncertainty about the ultimate repayment of principal and interest from bond or other debt instrument investments. In both cases the entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default.

Credit rating risk

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

Valuation Risk

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

Sovereign Debt Risk

- The fund's investments in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the fund to participate in restructuring such debts. The fund may suffer significant losses when there is a default of sovereign debt issuers.

Risk associated with Debt Securities Rated Below Investment Grade/Unrated Securities and High Yielding Debt Instruments

- The fund may invest in debt securities rated below investment grade or unrated securities. Such securities are generally subject to lower liquidity, higher volatility, heightened risk of default and loss of principal and interest than higher-rated/lower yielding debt securities.

Income-producing securities

- Although the fund will generally invest in income-producing securities, it is not guaranteed that all underlying investments will generate income. To the extent that underlying investments of the fund are income producing, higher yields generally mean that there will be increased potential for capital appreciation and/or depreciation for fixed income securities.

China Assets Risk

- Investments by the fund in onshore China fixed income securities and other permissible securities denominated in RMB may be made through any permissible means pursuant to any prevailing regulations, including through the China interbank bond market scheme and any other eligible means. The uncertainty and change of the relevant laws and regulations in the People's Republic of China ("PRC") and the potential for the PRC government and/or the regulators to implement political, social and economic policies that may affect the financial markets may have an adverse impact on the fund.
- High market volatility and potential settlement difficulties in the PRC markets may also result in significant fluctuations in the prices of the securities traded on such markets.

Risks associated with investments in China fixed income instruments

- For investments by the fund in China fixed income securities, there may not be a liquid or active market for the trading of Renminbi-denominated bonds. Therefore, such fund may be subject to the risk of not being able to sell its bonds on a timely basis, or will have to sell at a deep-discount to their face values. The security prices may fluctuate significantly. The fund's value, liquidity and volatility may be adversely affected.

QFI Risk

- The fund's ability to make the relevant investments or to fully implement or pursue its investment objective and strategy is subject to the applicable laws, rules and regulations (including restrictions on investments, minimum investment holding periods and requirements on repatriation of principal and profits) in the PRC, which are subject to change and such change may have potential retrospective effect.
- The fund may suffer substantial losses if the approval of the QFI status is being revoked/terminated or otherwise invalidated as the fund may be required to dispose of its securities holdings or prohibited from trading of relevant securities and repatriation of the fund's monies, or if any of the key operators or parties (including QFI custodian/brokers) is bankrupt/in default and/or is disqualified from performing its obligations (including execution or settlement of any transaction or transfer of monies or securities).

Risks associated with China Interbank Bond Market ("CIBM")

- The fund may invest in China bonds traded on CIBM via foreign access regime and/or bond connect between Hong Kong and China ("Bond Connect"). The relevant rules and regulations are subject to change which may have potential retrospective effect.
- Investments in CIBM traded bonds are subject to risks, such as suspension risk, settlement and counterparty risks, nominee arrangements in holding CIBM bonds, regulatory risk and uncertainty on tax arrangement.
- Where a suspension in the trading through CIBM is effected, the fund's ability to invest in CIBM bonds will be adversely affected. In such event, the fund's ability to achieve its investment objective could be negatively affected.

Chinese Renminbi Currency and Conversion Risk

- Chinese Renminbi (RMB) is currently traded in two markets: one in Mainland China (onshore RMB, or CNY) and one outside Mainland China (primarily in Hong Kong) (offshore RMB, or CNH). Although CNH and CNY are the same currency, they trade at different rates, and any divergence between CNH and CNY may adversely impact investors. CNY is not freely convertible and is subject to exchange controls and certain requirements by the government of Mainland China, whereas CNH is freely tradable. There is no guarantee that the value of RMB against the investors' base currencies will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the fund. Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

Mainland China Tax Risk

- There are risks and uncertainties associated with the current tax laws, regulations and practice of Mainland China in respect of capital gains realised via QFI status or Stock Connect or access products on the fund's investments in Mainland China (which may have retrospective effect). Any increased tax liabilities on the fund may adversely affect the fund's value.
- Based on professional and independent advice, currently no provision is being made by the fund for tax on capital gains on disposals of China fixed income securities listed or traded on exchanges or the mainland China interbank bond market or for tax on interest on such onshore Mainland China fixed income securities without deduction of tax provision made ultimately may prove excessive or inadequate to meet any at source. The actual tax liabilities (if any) will be debited from the fund's assets, and may adversely affect the fund's net asset value.

Volatility and Liquidity Risk associated with Mainland China Debt Securities

- The debt securities in Mainland China markets may be subject to higher volatility and lower liquidity compared to more developed markets. The prices of securities traded in such markets may be subject to fluctuations. The bid and offer spreads of the price of such securities may be large and the funds investing in Mainland China debt securities may incur significant trading costs.

Risk associated with Urban Investment Bonds

- Urban investment bonds are issued by LGFVs, such bonds are typically not guaranteed by local governments or the central government of the Mainland China. In the event that the LGFVs default on payment of principal or interest of the urban investment bonds, the fund investing in urban investment bonds could suffer substantial loss and the net asset value of the fund could be adversely affected.

Risk associated with Collateralised and/or Securitised Debt Instruments

- The fund invests in collateralised and/or securitised products (e.g. asset-backed securities and mortgage-backed securities) which may be highly illiquid and prone to substantial price volatility. These instruments may be subject to greater credit, liquidity and interest rate risk compared to other debt securities. They are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the returns of the securities.

Dim Sum Bond Market

- The fund may invest in “Dim Sum” bonds (i.e. bonds issued outside of Mainland China but denominated in RMB). The “Dim Sum” bond market is a relatively small market. As with some global fixed income markets, it may be more susceptible to volatility and illiquidity, and should there be any new rules which limit or restrict the ability of issuers to raise RMB (offshore CNH) funding by way of bond issuance and/or reversal or suspension of the liberalization of the CNH market by the relevant regulator(s), the operation of the “Dim Sum” bond market and new issuances could be disrupted and potentially cause a fall in the net asset value of the fund.

Risk of investing in CoCos and other instruments with loss-absorption features

- The fund may invest in instruments with loss-absorption features. Those features have been designed to meet specific regulatory requirements imposed on financial institutions and typically include terms and conditions specifying the instrument is subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of the following: (a) when a financial institution is near or at the point of non-viability; or (b) when the capital ratio of a financial institution falls to a specified level.
- Debt instruments with loss-absorption features are subject to greater capital risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events (such as those disclosed above). Such trigger events are likely to be outside of the issuer’s control and are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.
- The fund may invest in CoCos, which are highly complex and are of high risk. CoCos are a form of hybrid debt security with loss-absorption features that are intended to either convert into equity shares of the issuer (potentially at a discounted price) or have their principal written down (including permanently written down to zero) upon the occurrence of certain ‘triggers’. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.
- The fund may also invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss principal invested.

Emerging Markets

- The fund invests in emerging market securities which may involve increased risks and special considerations not typically associated with the investment in securities in more developed markets. The price of these securities may be more volatile and/or less liquid than those of securities in more developed markets.
- This volatility or lack of liquidity may stem from political, economic, legal, taxation, settlement, transfer of securities, custody and currency/currency control factors.
- Although care is taken to understand and manage these risks, the fund and accordingly the shareholders in the fund will ultimately bear the risks associated with investing in these markets.

Foreign Currency Risk

- The fund’s assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund’s net asset value.

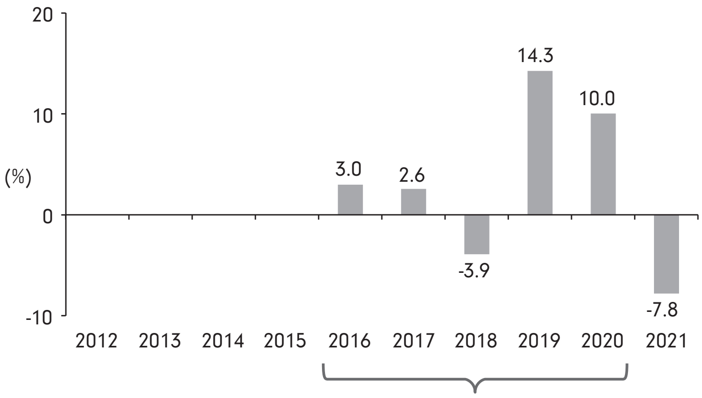
Risks associated with distribution out of/effectively out of the fund's capital

- Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the NAV per share/unit.
- The distribution amount and net asset value of the hedged share class may be adversely affected by differences in the interest rates of the reference currency of the hedged share class and the fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share classes.

Financial Derivative Instruments

- The fund's net derivative exposure may be up to 50% of its net asset value. The use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instrument by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

How has the fund performed?



The performance during the years prior to 2020 was achieved under circumstances that may no longer apply as the investment objective was changed in 2018 and 2020.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-ACC-USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- When no past performance is shown there was insufficient data available in that year to provide performance.
- Fund launch date: 2015
- Class A-ACC-USD launch date: 2015
- Class A-ACC-USD is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund's reference currency.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

Subscription Fee	Class A – Up to 3.5% of NAV Class Y – 0%
Switching Fee	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched into
Redemption Fee	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

Management Fee*	Class A – Up to 1.00% p.a. of NAV Class Y – Up to 0.65% p.a. of NAV
Depositary Fee	Varies from 0.003% to 0.35% of NAV
Performance Fee	N/A
Administration Fee	Up to 0.35% of NAV

* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong Prospectus. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong Prospectus.

Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time on a dealing day, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund (other than Class A) will be published in the South China Morning Post and the Hong Kong Economic Times. Net asset value of Class A will be published on www.fidelity.com.hk *.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from www.fidelity.com.hk *.
- The composition of dividend paid out of net distributable income and capital for the last 12 months are available from the Hong Kong Representative on request and also on the fund's website: https://www.fidelityinternational.com/legal/documents/FF/HK-zh_en/fdpc.ff.HK-zh_en.HK.pdf *.
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
